## **Volvo Penta Gas Engine Forum - Boat Repair Forum**

One possible contaminant is air. If air enters the injector pipes, the engine will stop because the air will act as a shock absorber, preventing the fuel pressure from

rising high or quickly enough to be sprayed into the cylinder. This is a common problem that is easily solved by bleeding the fuel system of air.

Volvo Boat Engine Problems  
Should there ever be a recall or quality campaign on your Volvo Penta product, a letter will be send out to the registered owner to make sure you get this information as quickly as possible. We therefore recommend contacting your local Volvo Penta dealer to make sure your engine is registered.

Volvo Diesel Engine  
Troubleshooting, Part 2

This causes stalling of the engine. If you back off the throttle the fuel demand decreases allowing the sludge to fall off the tube. Now what you can do to verify this as an issue is run the engine on another fuel source. If the engine runs good then you know the fuel tank is dirty causing your issue.

Stern Drive Engines - boats.com

Volvo Penta is a world-leading supplier of engines and complete power systems for both marine and industrial applications. We strive to give our customers the right product, with the right qualities.

Inboard | Volvo Penta

Some modern Volvo Penta Marine Engines have fuel injectors and these should also be checked, preferably by an engineer. The older models have carburetors and although

---

these give little trouble, the main jets, O-rings, and gaskets can become worn allowing excessive fuel to enter the engine. The carburetor is easily stripped and worn parts replaced.

You can easily inspect your engine for this. Just check the casing with the fuel injectors. If you see any leaking, you have identified the problem. Sadly, there isn ' t much else you can do, but at least you know what the issue is, and you can take your boat to the mechanic knowing what the issue was. Fuel contamination
