**Autocar** Haynes Publishing Group

The soft crash of waves that blissfully block out all other noise, the smell of two-stroke and lawn clippings, the first sip of cold beer, the laboured whir of the ceiling fan, the sound of a bag of ice hitting the pavement, that feeling of salt on skin and even the smell of prawns on bin night. Comedian Tim Ross uses the Australian Summer as a back drop for a new collection of nostalgic short stories.

Highly original and based on unique empirical research in the fields of organization theory and organization behaviour, this work makes an invaluable contribution to the literature on bureaucracy and innovation. Focusing on a study of two major companies working with innovation and new product development Styhre's critical analysis pushes the boundaries of bureaucracy studies beyond its current entrenched position. Departing from the traditional view that bureaucratic organizations are inefficient, incapable of responding to external changes, unable to orchestrate innovative work and provide meaningful jobs for its co-workers, this empirical study underlines the merits of a functional organization, the presence of specialist and expertise groups and hierarchical structures. Analyzing the literature of bureaucracy, the new forms of post-bureaucratic organizations and drawing on the philosophy of Henri Bergson, the author offers a model of bureaucracy, capable of both apprehending its functional organization and its continuous and ongoing modifications and changes to adapt to external conditions. Innovative and compelling, this book is an excellent text for advanced students of organization and management theory and managerial strategists and decision-makers across the globe.

**Ford Fiesta** CarTech Inc

Volvo revolutionised heavy truck design in 1964 with the introduction of the L4951 Titan TIPTOP. The new model brought the principle of the tilting cab to Europe and provided the foundations for the F88 of the following year. Safe, comfortable, powerful and reliable: the F88 was everything that the competition was not. 'Driver appeal' as a concept was born. Furthermore, it arrived exactly when the rapidly expanding international haulage scene needed it most. The result: Volvo could not fail to make an impact. The F89, with more power, followed in 1970 and the UK only F88 290 was introduced in 1975. Over a twelve-year production life, Volvo built over 60,000 examples of the F88 and F89. This second edition of Patrick Dyer's book includes virtually all the photographs that were in the original publication and also contains 50 additional shots, many from the Volvo company archive. This has enabled Patrick to give greater coverage to the G88 and G89 models which were infrequent visitors to the UK. Patrick has also heavily revised and developed his text. The format of the book is larger than before, in keeping with his books on Scania, DAF and the Ford Transcontinental.

**Volvo S70, C70 and V40** Springer

Traces the development of the 1996 Ford Taurus, and describes the interactions between designers, engineers, marketers, accountants, and manufacturing staff

**Mercedes-Benz C-Class** Robert Bentley, Incorporated
