**Boating** New York Review of Books

Deception—the lies we tell ourselves and the lies we tell others—is the subject of this, Tove Jansson's most unnerving and unpredictable novel. Here Jansson takes a darker look at the subjects that animate the best of her work, from her sensitive tale of island life, *The Summer Book*, to her famous Moomin stories: solitude and community, art and life, love and hate. Snow has been falling on the village all winter long. It covers windows and piles up in front of doors. The sun rises late and sets early, and even during the day there is little to do but trade tales. This year everybody's talking about Katri Kling and Anna Aemelin. Katri is a yellow-eyed outcast who lives with her simpleminded brother and a dog she refuses to name. She has no use for the white lies that smooth social intercourse, and she can see straight to the core of any problem. Anna, an elderly children's book illustrator, appears to be Katri's opposite: a respected member of the village, if an aloof one. Anna lives in a large empty house, venturing out in the spring to paint exquisitely detailed forest scenes. But Anna has something Katri wants, and to get it Katri will take control of Anna's life and livelihood. By the time spring arrives, the two women are caught in a conflict of ideals that threatens to strip them of their most cherished illusions.

The transport sector continues to shift towards alternative powertrains, particularly with the UK Government's announcement to end the sale of petrol and diesel passenger cars by 2030 and increasing support for alternatives. Despite this announcement, the internal combustion continues to play a significant role both in the passenger car market through the use of hybrids and sustainable low carbon fuels, as well as a key role in other sectors such as heavy-duty vehicles and off-highway applications across the globe. Building on the industry-leading IC Engines conference, the 2021 Powertrain Systems for Net-Zero Transport conference (7-8 December 2021, London, UK) focussed on the internal combustion engine's role in Net-Zero transport as well as covered developments in the wide range of propulsion systems available (electric, fuel cell, sustainable fuels etc) and their associated powertrains. To achieve the net-zero transport across the globe, the life-cycle analysis of future powertrain and energy was also discussed. Powertrain Systems for Net-Zero Transport provided a forum for engine, fuels, e-machine, fuel cell and powertrain experts to look closely at developments in powertrain technology required, to meet the demands of the net-zero future and global competition in all sectors of the road transportation, off-highway and stationary power industries.

The word cleaning covers a wide range of activities from good housekeeping and janitorial duties to clinical process cleaning applications that form part of our everyday lives, most people are not aware of their existence, and yet without them, many of the services and products we take for granted would not be available. Most chapters include case studies of various cleaning problems together with the solutions offered. Emphasis is placed on the practical aspects of designing, manufacturing and operating cleaning equipment, this includes a detailed examination of traditional cleaning methods, and considers a number of lesser known techniques that have been developed over recent years together with a glimpse of the future trends in the industry In addition to the actual cleaning techniques, the book examines the effect, of increasing international health, safety, training, and environmental legislation together with regulations that control cleaning standards in the pharmaceuticals, cosmetics, food and drinks manufacturing industries. In this respect, the book is not intended to be a definitive reference book. Legislation and regulations are continually being upgraded, particularly those relating to European Directives. No apologies are given for the fact that the reader will be continually reminded of the need to obtain up to date copies of the various documents referred to, and to secure expert advice on those issues that are crucial in terms

---

of health, safety and hazardous conditions. To assist the reader, useful information sources are listed in the reference section following each chapter. jkljk
