On August 16th, 2016 Santiago Lange amazed the sporting world when he and his teammate Cecilia Carranza won the gold medal in sailing at the Olympic Games in Rio de Janeiro. At that time he was 54 years old, it was his sixth Olympic participation and he fought against unbelievable obstacles. His victory was an incomparable demonstration of his will to fight – not even one year after he had to undergo surgery because of lung cancer. Santiago Lange gave the world of sailing an unforgettable moment of glory. But how did he manage to get back on his feet in such a short time, to train without rest and to take part at the Olympic Games again? And why did he fight when his body, friends and family thought it was time to stop? "Nothing gives me more joy of life and adrenaline than the challenge of sport. When I'm on the water, my thoughts rest. Time stands still. I feel the wave, I feel the wind turning. The tension of the boat tells me that I have to change course or trim. I react, the boat gets faster and everything else doesn't exist anymore. It's always been like that." Santiago Lange

This book offers a hands-on guide to designing, analyzing and debugging a communication infrastructure based on the Controller Area Network (CAN) bus. Although the CAN bus standard is well established and currently used in most automotive systems, as well as avionics, medical systems and other devices, its features are not fully understood by most developers, who tend to misuse the network. This results in lost opportunities for better efficiency and performance. These authors offer a comprehensive range of architectural solutions and domains of analysis. It also provides formal models and analytical results, with thorough discussion of their applicability, so that it serves as an invaluable reference for researchers and students, as well as practicing engineers.

"My imagination is always skulking about in a wrong place." And now Doyle Redmond, thirty-five-

year-old nowhere writer, has crossed the line between imagination and real live trouble. On the lam in his soon-to-be ex-wife's Volvo, he's running a family errand back in his boyhood home of West Table, Missouri--the heart of the red-dirt Ozarks. The law wants his big brother, Smoke, on a felony warrant, and Doyle's supposed to talk him into giving up. But Smoke is hunkered down in the hills with his partner, Big Annie, and her nineteen-year-old daughter, Niagra, making other plans: they're about to harvest a profitable patch of homegrown marijuana. Doyle takes just one look at Niagra's flattering red boots before joining his brother's scheme. Of course it means dealing with the law and maybe worse--the Dollys. A legendary clan of largely criminal persuasion, the Dollys have been feuding with the Redmonds for generations. Now they want a piece of Smoke's cash crop, even if it means killing to get it. Doyle is fast realizing that yes, you can always put the country back in the boy...but sometimes that's not smart.
