Bis nachhaltige technische und wirtschaftliche Lösungen für den Elektroantrieb gefunden sind, behält der Verbrennungsmotor seine dominierende Stellung als Antriebsquelle für Pkw und Nutzfahrzeuge. In den nächsten Jahrzehnten kommt dem klassischen Motor damit weiterhin die Rolle des Schrittmachers für CO2-arme Mobilität zu. Um die ambitionierten

Umweltziele zu erreichen, müssen alle Komponenten, Systeme und Funktionen des Motors weiter optimiert und an die immer komplexeren Anforderungen im Gesamtsystem angepasst werden. Vor dem Hintergrund dieser Entwicklungsaufgaben veranstaltet ATZlive und das VDI Wissensforum erstmals gemeinsam den Internationalen Motorenkongress.

The world is currently undergoing an historic energy transition, driven by increasingly stringent decarbonisation policies and rapid advances in low-carbon technologies. The large-scale shift to low-carbon energy is disrupting the global energy system, impacting whole economies, and changing the political dynamics within and between countries. This open access book, written by leading energy scholars, examines the economic and geopolitical implications of the global energy transition, from both regional and thematic perspectives. The first part of the book addresses the geopolitical implications in the world's main energy-producing and energy-consuming regions, while the second presents in-depth case studies on selected issues, ranging from the geopolitics of renewable energy, to the mineral foundations of the global energy transformation, to governance issues in connection with the changing global energy order. Given its scope, the book will appeal to researchers in energy, climate change and international relations, as well as to professionals working in the energy industry.
