This illustrated history chronicles electric and hybrid cars from the late 19th century to

today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The

important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles,

and the various regulations and market forces that have shaped the industry are also covered.

Lemon-Aid Used Cars and Trucks 2010-2011 American Automobile Association Pounder 's Marine Diesel Engines and Gas Turbines, Tenth

Edition, gives engineering cadets, marine engineers, ship operators and managers insights into currently available engines and auxiliary equipment and trends for the future. This new edition introduces new engine models that will be most commonly installed in ships over the next decade, as well as the latest legislation and pollutant emissions procedures. Since publication of the last edition in 2009, a number of emission control areas (ECAs) have been established

by the International Maritime Organization (IMO) in which exhaust emissions are subject to even more stringent controls. In addition, there are now rules that affect new ships and their emission of CO2 measured as a product of cargo carried. Provides the latest emission control technologies, such as SCR and water scrubbers Contains complete updates of legislation and pollutant emission procedures Includes the latest emission control technologies and

Neo-Industrial Organising Routledge Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region. Autocar Dundurn The international financial value of Grand Prix racing has grown substantially in recent years. This book will focus upon the massive size, value, importance and impact of the industry. It will also investigate the

dominance of UK based Research and Development and design and the development of team strategy and tactics. The authors have based their analysis upon very up-to-date research involving interviews with key individuals at the highest level and visibility within the industry and focus upon the key management themes of teamworking, leadership, strategy and innovation. Automobile Butterworth-Heinemann Neo-Industrial Organising explores an emerging area of importance in management and

organisation studies, namely the trend towards a projectization of the economy as a whole and the inter- and intra-organisational relations of renewal projects. By reporting on the experiences of twenty-five renewal projects from a wide variety of both local and international organisations, the authors develop a theoretical framework based on action and knowledge, in order to answer such key questions as: What is neo-industrial management? What does the future hold for organisations? How will institutions be formed? What effects will neo-industrial organising have on the individual and his/her work situation? Topics covered include: *

industrial renewal, organisation and management * project management and temporary organisation * personnel recruitment, selection and training * societal infrastructure Distinctive, relevant and accessibly written, this book will interest researchers and students in the field of organisational behaviour.
