The old masters of dealt only with the static features of the positional rules of chess. But these are insufficient to explain the basics of chess. The problem is that chess, like in other sciences, has undergone a dynamic revolution, but chess literature doesn't yet reflect it. In this major work Aagaard accessibly explains the rules of attack (the exploitation of a dynamic advantage), balanced between understandable examples, and deep analysis. Five years in the making, this book deals with weak kings, sacrifices, various minor attacking themes, intuitive sacrifices, opposite castling, modern king hunts, and enduring initiative.

These days fraudsters operate on a massive scale that was previously unimaginable. Thousands of people from all walks of life are relieved of billions of pounds each year. No-one knows the full scale of fraud because embarrassed victims often fail to report it. Despite all the press coverage, people keep falling for old tricks that often re-emerge in new guises. Scammers are ingenious, utterly ruthless and without conscience. Rodney Hobson, author of the best-selling beginners guide to stock market investing Shares Made Simple, has produced the first definitive guide to scams, categorising the different types, listing tell-tale signs and advising how to spot a fraudster and avoid becoming the next victim. This makes the basic principles behind each type of scam more recognisable and it shows how scams have evolved and re-emerged over time. Danger lurks for those unwary souls who part only too

readily with their hard-earned cash and this book will help you be alert to the risks. It is also meant to entertain, as we learn to grudgingly admire as well as despise the ingenious crooks who lurk in the shadows.
