*How can I find out what my*

*...*

Hi Karen, The system sets its  
own, and there is a menu  
option to see what it is, you  
can change it in increments  
of 10 (advisable - because  
the initial code is the  
factory default). I've  
created a little cheat sheet  
from the manual here - for  
you to follow to see what the  
code is and how to change it.

Thanks, Rod

Answering system remote access - IS8101 / IS8151 / IS8152 series Dial your telephone number from any touch-tone telephone. Once the system answers, enter the two-digit remote access code (19 is the default code). The system automatically announces the number of new or old messages (if any), and then begins to play them.

Vtech Answering Machine Default Code

To operate your answering system when you are  
away from home, you will need to enter a two-digit  
security code or Personal Identification Number  
(PIN). The default security code is 80. On all  
900mhz & analog models that have this feature,  
please see below: 1) Press Menu/Clock on base until  
you hear "Security Code"

- 1) Make sure your answering system is plugged  
into a live telephone jack and power source.
- 2) Make sure your answering system is turned on.
- 3) Some answering systems have an announce  
only option, which plays your greeting but  
won't record messages. Make sure your system  
is set to record messages.
