**New York Magazine** Frances Lincoln Children's Books

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

**Directory of United States Importers** Silver Dolphin Books

The Internet of Toys (IoToys) is a developing market within our Internet of Things (IoT) ecosystem. This book examines the rise of internet-connected toys and aims to anticipate the opportunities and risks of IoToys before their widespread diffusion. Contributors to this volume each provide a critical analysis of the design, production, regulation, representation and consumption of internet-connected toys. In order to address the theoretical, methodological and policy questions that arise from the study of these new playthings, and contextualise the diverse opportunities and challenges that IoToys pose to educators, families and children themselves, the chapters engage with notions of mediatization, datafication, robotification, connected and post-digital play. This timely engagement with a key transformation in children ' s play will appeal to all readers interested in understanding the social uses and consequences of IoToys, and primarily to researchers and students in children and media, early childhood studies, media and communications, sociology, education, social psychology, law and design.

Worldwide the application of information and communication technologies to support national health-care services is rapidly expanding and increasingly important. This is especially so at a time when all health systems face stringent economic challenges and greater demands to provide more and better care especially to those most in need. The National eHealth Strategy Toolkit is an expert practical guide that provides governments their ministries and stakeholders with a solid foundation and method for the development and implementation of a national eHealth vision action plan and monitoring fram.

**Taking Flight** IGI Global

How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for How and Why to Read and Create Children's Digital Books 'This is an exciting and innovative book - not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and

recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University

With adorable illustrations by Dawn Machell and a padded cover format, 100 Animal Words is the perfect book for little learners.

**The New York Times Index** CRC Press

Increasing numbers of parents grapple with children who are acting out without obvious reason. Revved up and irritable, many of these children are diagnosed with ADHD, bipolar illness, autism, or other disorders but don't respond well to treatment. They are then medicated, often with poor results and unwanted side effects. Based on emerging scientific research and extensive clinical experience, integrative child psychiatrist Dr. Victoria Duncckley has pioneered a four-week program to treat the frequent underlying cause, Electronic Screen Syndrome (ESS). Dr. Duncckley has found that everyday use of interactive screen devices - such as computers, video games, smartphones, and tablets - can easily overstimulate a child's nervous system, triggering a variety of stubborn symptoms. In contrast, she's discovered that a strict, extended electronic fast single-handedly improves mood, focus, sleep, and behavior, regardless of the child's diagnosis. It also reduces the need for medication and renders other treatments more effective. Offered now in this book, this simple intervention can produce a life-changing shift in brain function and help your child get back on track - all without cost or medication. While no one in today's connected world can completely shun electronic stimuli, Dr. Duncckley provides hope for parents who feel that their child has been misdiagnosed or inappropriately medicated, by presenting an alternative explanation for their child's difficulties and a concrete plan for treating them.

**Impact of New Information and Communication Technologies on Transportation Agencies** New World Library

From birth to adulthood, children now find themselves navigating a network of surveillance devices that attempt to identify, quantify, sort and track their thoughts, movements and actions. This book is the first collection to focus exclusively on technological surveillance and young people. Organised around three key spheres of children's day-to-day life: schooling, the self and social lives, this book chronicles the increasing surveillance that children, of all ages, are subject to. Numerous surveillance apparatus and tools are examined, including, but not limited to: mobile phones, surveillance cameras, online monitoring, GPS and RFID tracking and big data analytics. In addition to chronicling the steady rise of such surveillance practices, the chapters in this volume identify and problematise the consequences of technological surveillance from a range of multidisciplinary perspectives. Bringing together leading scholars working across diverse fields - including sociology, education, health, criminology, anthropology, philosophy, media and information technology - the collection highlights the significant socio-political and ethical implications of technological surveillance throughout childhood and youth.

**Doc McStuffins: Doc's Big Book of Boo-Boos** Palgrave Macmillan

The pioneering Wright brothers dared to dream of being the first men in the world to fly... but would they ever see their dreams take flight? The golden age of aviation is brought vividly to life in this

story of determination, ingenuity and courage from Adam Hancher.

**I Am a Big Brother** Union Square & Co.

TRB's National Cooperative Highway Research Program (NCHRP) Synthesis 296: Impact of New Information and Communication Technologies on Transportation Agencies examines the impact that information and communication (I/C) technologies are having on transportation agencies and offers data to understand how agencies are dealing with these impacts. Four classes of technologies were examined: intelligent transportation systems, communication technology, software tools, and remote work arrangements.

Raising Your Child in a Digital World investigates the most current research on new technology, busts a lot of myths, explores the educational benefits of time online and helps parents to successfully guide their children to balance 'screen time' with 'green time'. Dr Goodwin's message is that mixed messages and confusing information abound about the benefits and traps of new technology on kids. Her book outlines the ways in which technology can help children in their natural development in regards to physical, mental and social relating skills. Raising Your Child in a Digital World explores the obstacles and technology myths that confront modern parents. In doing so, Dr Goodwin provides concrete advice on how to develop healthy digital habits in your children and protect their emotional and mental health. The book is shaped around the seven essential building blocks for young children's development, namely, Attachment and Relationships, Language, Sleep, Play, Physical movement, Nutrition, and Executive function skills.

**The Mysterious Benedict Society: Mr. Benedict's Book of Perplexing Puzzles, Elusive Enigmas, and Curious Conundrums**

Children experience technology in both formal and informal settings as they grow and develop. Despite research indicating the benefits of technology in early childhood education, the gap between parents, teachers, and children continues to grow as our new generation of children enters early childhood classrooms. Child Development and the Use of Technology: Perspectives, Applications and Experiences addresses major issues regarding technology for young children, providing a holistic portrait of technology and early childhood education from the views of practitioners in early childhood education, instructional design technology, special education, and mathematics and science education. Consisting of fifteen chapters developed by multidisciplinary teams, this book includes information, advice, and resources from practitioners, professionals, and university faculty engaged in early childhood education and instructional design technology.

**100 Animal Words**

Green and Social Economy Finance is a compilation of chapters by experts, linking research and practice. This anthology provides a new thinking on social economy green finance, showing emerging themes and trends. It spans from stock markets, green finance, innovations, digitalization to social finance, governance and theories of change. It concentrates on impact, opportunity recognition and development of financial products designed to finance the green and social economy. Without the attraction of capital, social entrepreneurship, and innovations, green finance can face difficulty in addressing business solutions. Green and social economy is a nascent field. The authors address the conceptualization of green and social solutions and identify new trends in the finance industry products and approaches. The book demonstrates that aligning finance and investment with the Paris Agreement, sustainable development goals and needs and interests of society are feasible.
