Building Blocks for Liberty William Morrow

From New York Times Bestselling Author, Penelope Douglas, comes the latest standalone love-hate romance... "We were perfect together. Until we met." Misha I can't help but smile at the lyrics in her letter. She misses me. In fifth grade, my teacher set us up with pen pals from a different school. Thinking I was a girl, with a name like Misha, the other teacher paired me up with her student, Ryen. My teacher, believing Ryen was a boy like me, agreed. It didn't take long for us to figure out the mistake. And in no time at all, we were arguing about everything. The best take-out pizza. Android vs. iPhone. Whether or not Eminem is the greatest rapper ever... And that was the start. For the next seven years, it was us. Her letters are always on black paper with silver writing. Sometimes there's one a week or three in a day, but I need them. She's the only one who keeps me on track, talks me down, and accepts everything I am. We only had three rules. No social media, no phone numbers, no pictures. We had a good thing going. Why ruin it? Until I run across a photo of a girl online. Name's Ryen, loves Gallo's pizza, and worships her iPhone. What are the chances? F*ck it. I need to meet her. I just don't expect to hate what I find. Ryen He hasn't written in three months. Something's wrong. Did he die? Get arrested? Knowing Misha, neither would be a stretch. Without him around, I'm going crazy. I need to know someone is listening. It's my own fault. I should've gotten his phone number or picture or something. He could be gone forever. Or right under my nose, and I wouldn't even know it. *Punk 57 is a stand alone New Adult romance. It is suitable for ages 18+.

Now a Netflix film starring and directed by Chiwetel Ejiofor, this is a gripping memoir of survival and perseverance about the heroic young inventor who brought electricity to his Malawian village. When a terrible drought struck William Kamkwamba's tiny village in Malawi, his family lost all of the season's crops, leaving them with nothing to eat and nothing to sell. William began to explore science books in his village library, looking for a solution. There, he came up with the idea that would change his family's life forever: he could build a windmill. Made out of scrap metal and old bicycle parts, William's windmill brought electricity to his home and helped his family pump the water they needed to farm the land. Retold for a younger audience, this exciting memoir shows how, even in a desperate situation, one boy's brilliant idea can light up the world. Complete with photographs, illustrations, and an epilogue that will bring readers up to date on William's story, this is the perfect edition to read and share with the whole family.

His Only Weakness Routledge

The author examines the factors which influence terrorists' target selection. In particular he looks at the influence of the ideologies, strategies and tactics of terrorist groups, and describes how these are restricted by the terrorists' resources, by protective and anti-terrorist measures, by the society within which the terrorists operate, and by the nature of the terrorists and their supporters. He concludes that terrorists' target selection is often both explicable and logical.

Shane St. Martin's Griffin

"Beth Jamison had a rough start in life. As a result of a traumatic childhood abduction, she suffers from anxiety and issues with intimacy. Beth doesn't know it, but the man who kidnapped her has just been released early from prison. When Beth's brother hires McIntyre Security, Inc. to protect her, Beth has no idea she has covert bodyguards shadowing her 24/7. CEO Shane McIntyre has never been short on female company, and he's developed a reputation as a player. But that all changes when Shane meets Beth. Their mutual attraction is instant and intense, and Shane falls hard for Beth. This alpha protector has his work cut out for him if he's going to gain Beth's trust and make her his before it's too late." --Back cover.

This book argues that the risk of harm in armed conflict should be divided equally between combatants and enemy non-combatants. International law requires that combatants in war take 'all feasible precautions' to minimize damage to civilian objects, injury to civilians, and incidental loss of civilian life. However, there is no clear explanation of what 'feasible precautions' means in this context, or what would count as sufficiently minimised incidental harm. As a result, it is difficult to judge whether a particular war or offensive actually satisfies this requirement. Just war theorists often consider it common sense that merely not intending to harm innocent civilians is not sufficient, but there is little clarity in the literature regarding what this means. One crucial question that is almost always overlooked is that of what the appropriate baseline distribution of risk should be. This book defends the Minimal Harm Requirement (MHR), which states that combatants should make an effort to reduce merely foreseen harm to enemy non-combatants to the lowest reasonable level. In order to assess which risk impositions are reasonable, and which are not, an egalitarian baseline should be adopted, suggesting that other things being equal risk of harm should be distributed equally between just combatants and unjust non-combatants. This book will be of much interest to students of just war theory, ethics, security studies and international relations.

Decade of Fear Cambridge University Press

Information and its Role in Hunter-Gatherer Bands explores the question of how information, broadly conceived, is acquired, stored, circulated, and utilized in small-scale hunter-gatherer societies, or bands. Given the nature of this question, the volume brings together a group of scholars from multiple disciplines, including archaeology, ethnography, linguistics, and evolutionary ecology. Each of these specialties deals with the question of information in different ways and with different sets of data given different primacy. The fundamental goal of the volume is to bridge disciplines and subdisciplines, open discussion, and see if some common ground-either theoretical perspectives, general principles, or methodologies-can be developed upon which to build future research on the role of information in hunter-gatherer bands.

Vulnerable The first Situationist text to be published in the UK in 1974, 'Leaving the 20th Century' was Chris Gray and the English situationists' attempt to capture and distil the vibrant anti-art, anti-capitalist energy of the original International Situationist texts (1957-74). With its loose translations and irreverent commentary, Gray and co. attempted to capture the "terrorism, wit and general megalomania" of the original publications, whilst faithfully reprinting the "photographs of girls, soldiers, bombings, comic-strip frames, maps of cities and diagrams of labyrinths, cathedrals and gardens." From the art/anti-art beginnings, to the role of the Situationists in the worker-student insurrection of May 68', 'Leaving the 20th Century' remains the definitive English pro-situ text. The Boy Who Harnessed the Wind Independently Published
Disarmament, Demobilization, and Reintegration (DDR) and Security Sector Reform (SSR) have emerged in recent years as promising though generally poorly understood mechanisms for consolidating stability and reasserting state sovereignty after conflict. Despite the considerable experience acquired by the international community, the critical interrelationship between DDR and SSR and the ability to use these mechanisms with consistent success remain less than optimally developed. The chapters in this book reflect a diversity of field experience and research in DDR and SSR, which suggest that these are complex and interrelated systems, with underlying political attributes. Successful application of DDR and SSR requires the setting aside of preconceived assumptions or formulas, and should be viewed flexibly to restore to the state the monopoly of force.
