Circular solutions are essential to tackle the eminent challenges of depleting resources and emerging environmental problems. The complex nature of material and energy systems and the changing of economic and technological conditions differ among countries and, therefore, lead to the application of vastly different practices in developed and rapidly developing countries of the world. A wide variety of theoretical approaches can be used to facilitate a shift from the linear use of resources to circular systems, e.g., circular product planning, life cycle planning, sharing and platform economy, refurbishing, and remanufacturing, to name but a few. The introduction and examination of circular solutions can be based on theoretical models in order to guarantee ensure successful application. Successful

application of innovative technology approaches, business solutions, and organizational development can be facilitated through theoretical models and new scientific results that support innovation processes. This Special Issue reprint focuses on sustainable and innovative methods which help and enable the proper use and recovery of resources. We present a collection of research papers, reviews, research reports, and case studies that introduce or discuss circular solutions for the sustainable use of resources.

Here is a unique record of the Beetle's early evolution, chronicled by an English school teacher who spent 20 years digging through untapped sources, including archives he discovered at Porsche. Despite the plethora of books on this evergreen car, most of his material has never previously been published. The book - illustrated with over 300 photographs and designs, most of them not seen since origination - covers the period from the Porsche expose of 17

January 1934 until July 1945, with the final lists of experimental and test cars run by Porsche in Gmund, Austria.

The soft crash of waves that blissfully block out all other noise, the smell of two-stroke and lawn clippings, the first sip of cold beer, the laboured whir of the ceiling fan, the sound of a bag of ice hitting the pavement, that feeling of salt on skin and even the smell of prawns on bin night. Comedian Tim Ross uses the Australian Summer as a backdrop for a new collection of nostalgic short stories.

I cannot confess to know exactly and with 360 of certainty of human understanding, why bullets did not stop the evil I was ready to commit on the night January 21, 1975. I believe it is "universal law," or call it fate or destiny that rules all events. There's no coincidences. As one who's trained in law, I examine the facts based upon the evidence. And these facts that occurred demonstrated John Dillinger's reincarnation via evidence.
