rebuilding VW air-cooled engines. Written with genuine enthusiasm and a little humor, this step-by-step guide is like having a knowledgeable friend or older brother sit right next to you at the workbench. Learn how to remove and strip down your engine before taking a really good look at what's inside. Work out what's good and what's not. You will learn to examine components and find that often they are not only serviceable but better than modern reproduction parts. Reusing the original parts wherever possible, you will then learn how to prepare and reassemble your engine with plenty of tips and tricks to make the job easier. The importance of cooling tinware is emphasised and its refitting covered model by model. With the short engine built, we turn our attention to ancillaries such as fuel, air and exhaust systems as well as sensible modifications to make your new engine perform better and last longer.

VW Transporter 1600 Service and Repair Manual Bentley Pub
Since the early 2000s, the apparent explosion of interest in Volkswagens with original paint, rust and patina has

inspired a generation of car fanatics, who might not be able to afford to restore a car to show condition, but still want a good looking, cool car that will stand out from the crowd. Once looked upon as being in need of restoration, cars with original paint, rust and patina, especially within the global Volkswagen community, have gradually become far more popular than restored cars. When walking down a line of cars at a car show, it's easy to see why;

these cars are rare, unspoiled survivors - cars that tell a story of an interesting and varied past. The look of the Volkswagens being built in this style is so honest, unspoiled and characterful, that it has begun to inspire the media; even Hollywood movie stars and celebrities. Whilst this has undoubtedly resulted in increased car values, and turned a brand of cars that had always been a cheap, honest mode of transportation into

something cool with a high price tag, the generation it initially inspired has grown with the hobby, and produced a micro-industry that still manages to embrace the 'Built not bought' ethos. This book, superbly illustrated with stunning colour photographs, takes an inside look at some of the key car builders, dealers, celebrities and hobbyists, as well as the different styles of build, meaning every single car has a style all its own. Foreword

by Drew Pritchard of TV's 'Salvage Hunters' fame.
