Electrical issues in European cars can be intimidating. The Hack Mechanic Guide to European Automotive Electrical Systems shows you how to think about electricity in your car and then take on real-world electrical problems. The principles discussed can be applied to most conventional internal-combustion-engined vehicles, with a focus on European cars spanning the past six decades. Drawing on The Hack Mechanic's wisdom and experience, the 38 chapters cover key electrical topics such as battery, starter, alternator, ignition, circuits, and relays. Through a practical and informal approach featuring hundreds of full-color illustrations, author Rob Siegel takes the fear-factor out of projects like making wire repairs, measuring voltage drops, or figuring out if you have a bad fuel pump relay. Essential tools such as multimeters (DVOM), oscilloscopes, and scan tools are discussed, with special attention given to the automotive multimeter needed to troubleshoot many modern sensors. You'll get step-by-step troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed sensors, fuel pumps, solenoids, and actuators. Reading wiring diagrams and decoding the German DIN standard are also covered. Whether you are a DIY mechanic or a professional technician, The Hack Mechanic Guide to European Automotive Electrical Systems will increase your confidence in tackling automotive electrical problem-solving. This book applies to gasoline and diesel powered internal combustion engine vehicles. Not intended for hybrid or electric vehicles.

Red Green's wisdom, wit and whimsy on mankind's greatest challenge . . . now in paperback. Red Green is celebrated as one of the handiest men in North America. But as well as being a purveyor of inventive practical advice on, for example, making a jetpack from two propane tanks, a hybrid car from recycled golf carts and satellite dishes, and a kiddie ride from a bar stool attached to the agitator of a washing machine, Red Green is also noted for his insights into that most difficult of assembly jobs, human relationships. His previous bestselling tome, How to Do Everything, showed Red dipping his toe into the self-help genre with such items as "How to make dinner more romantic" and "The easy way to raise children." Now Red Green—a veteran husband (of Bernice), father, soul-searcher, philosopher and observer—has devoted an entire book to sharing with other battle-weary and confused males all he has learned about the differences between the sexes. Set out in approximately chronological order, from teen dating to the last words of men ("You know, honey, in the last couple of years, you've really packed on the beef"), this is the testosterone owner's manual to every aspect of finding a mate and then learning to deal with her growing disappointment in you. The man who has already shared such morsels as "If you can't be handsome, be handy," and "Quando omni flunkus moritati," ("When all else fails, play dead") here presents a Ph.D. in life-lessons about the most vexing problem facing mankind today, or any day: women.

A straight-from-the-source look at how NFL dynasties are built In Super Bowl Blueprints, Hall of Fame general manager Bill Polian and veteran football scribe Vic Carucci sit down with the architects of the greatest teams of all time, digging into how these dynastic squads did what they did, with more insight and access than any football book in history. Polian, the architect of the Super Bowl XLI-champion Indianapolis Colts, provides a rare glimpse inside the locker rooms, coaches' room, and front offices for the key moments that defined the modern NFL. Whether Polian is discussing variations of the no-huddle with Jim Kelly and Peyton Manning or the culture of the Steel Curtain with Terry Bradshaw and "Mean" Joe Greene or different versions of Bill Walsh's West Coast offense with Mike Holmgren and Steve Young, his command of the game mixed with the perceptions of these legends creates a book like no other. Tom Flores, Ron Wolf, and Mike Haynes debate how Al Davis built the iconic Raiders franchise, while Jimmy Johnson, Jerry Jones, Troy Aikman, and more share how tension and football IQ were married to create the unstoppable Cowboys teams of the '90s. Super Bowl Blueprints tells the story of championship football—how it's attained and what it takes—through the voices of Bill Parcells, Marv Levy, Art Rooney II, Charles Haley, Doug Williams, John Mara, Charley Casserly, Joe Theismann, Harry Carson, Tom Moore, Brian Billick, Frank Reich, Dwight Freeney, Joe Gibbs, Tony Dungy, and many more!
