Internet-based information systems, the second covering the large-scale integration of heterogeneous computing systems and data resources with the aim of providing a global computing space.

Each of these four conferences encourages researchers to treat their respective topics within a framework that incorporates jointly (a) theory, (b) conceptual design and development, and (c) applications, in particular case studies and industrial solutions. Following and expanding the model created in 2003, we again solicited and selected quality workshop proposals to complement the more "archival" nature of the main conferences with research results in a number of selected and more "avant-garde" areas related to the general topic of Web-based distributed computing. For instance, the so-called Semantic Web has given rise to several novel research areas combining linguistics, information systems technology, and artificial intelligence, such as the modeling of (legal) regulatory systems and the ubiquitous nature of their usage. We were glad to see that ten of our earlier successful workshops (ADI, CAMS, EI2N, SWWS, ORM, OnToContent, MONET, SEMELS, COMBEK, IWSSA) re-appeared in 2008 with a second, third or even fourth edition, sometimes by alliance with other newly emerging workshops, and that no fewer than three brand-new independent workshops could be selected from proposals and hosted: ISDE, ODIS and Beyond SAWSDL. Workshop sessions productively mingled with each other and with those of the main conferences, and there was considerable overlap in authors.

The study of estuaries and coasts has seen enormous growth in recent years, since changes in these areas have a large effect on the food chain, as well as on the physics and chemistry of the ocean. As the coasts and river banks around the world become more densely populated, the pressure on these ecosystems intensifies, putting a new focus on environmental, socio-economic and policy issues. Written by a team of international expert scientists, under the guidance of Chief Editors Eric Wolanski and Donald McClusky, the *Treatise on Estuarine and Coastal Science, Ten Volume Set* examines topics in depth, and aims to provide a comprehensive scientific resource for all professionals and students in the area of estuarine and coastal science. Most up-to-date reference for system-based coastal and estuarine science and management, from the inland watershed to the ocean shelf. Chief editors have assembled a world-class team of volume editors and contributing authors. Approach focuses on the physical, biological, chemistry, ecosystem, human, ecological and economics processes, to show how to best use multidisciplinary science to ensure earth's sustainability. Provides a comprehensive scientific resource for all professionals and students in the area of estuarine and coastal science. Features up-to-date chapters covering a full range of topics. Body area networks (BANs) are networks of wireless sensors and medical devices embedded in clothing, worn on or implanted in the body, and have the potential to revolutionize healthcare by enabling pervasive healthcare. However, due to their critical applications affecting human health, challenges arise when designing them to ensure they are safe for the user, sustainable without requiring frequent battery replacements and secure from interference and malicious attacks. This book lays the foundations of how BANs can be redesigned from a cyber-physical systems perspective (CPS) to overcome these issues. Introducing cutting-edge theoretical and practical techniques and taking into account the unique environment-coupled characteristics of BANs, the book examines how we can re-imagine the design of safe, secure and sustainable BANs. It features real-world case studies, suggestions for further investigation and project ideas, making it invaluable for anyone involved in pervasive and mobile healthcare, telemedicine, medical apps and other cyber-physical systems.

Retail Service Quality is a vital driver in determining customer satisfaction, which in turn promotes customer loyalty and reduces switching intentions. Service quality is a solution to build customer satisfaction which could lead to customer loyalty hence reducing switching intentions. The current study has investigated the interrelationship between service quality, customer satisfaction, customer loyalty with switching

intentions of customers, and the moderating role of price discounts and store ethnicity, in a single framework. Random sampling was used by administering standardized questionnaires personally to 450 hypermarket customers located in the Eastern Province of Saudi Arabia. The results confirmed that retail service quality has significant positive influence on customer satisfaction, and the positive effect of customer satisfaction on customer loyalty. Besides, the study verified store ethnicity and price discounts acted as moderating mechanism for explaining the switching intentions of satisfied and loyal customers. The results serve as a guideline for top managers of the hypermarkets to design appropriate policies and strategies in terms of retail service quality, price discounts and identifying the needs of ethnic groups in a particular region. This will help to enhance customer satisfaction and customer loyalty hence reducing switching intentions of customers.

The book evaluates the premise and consequences of financial behaviour in the new economy. It provides information about the financial and innovative behaviours of consumers in the new economy, where changing technology and knowledge are the main tools. It consists of two sections and nine chapters based on the financial behaviours of consumers and businesses in the new economy and the innovative approaches used in the employment, entrepreneurship and production processes. Today, both the consumers and the market-oriented enterprises are subject to financial contraction and expansion. Consumers now pay more attention to their budgets, and consumption habits are changing. In this context, consumer decisions are rational or psychological; they also depend on the proactive personality structure that can predict the future. Globalization and the convergence of markets, on the other hand, put the enterprises into tough competition. Businesses can change the financial behaviour

of consumers through innovative methods. Moreover, the damage caused by enterprises to the environment can be reduced by improving their economic performance (eco-innovation).

Pentecostals and Nonviolence explores how a distinctly Pentecostal-charismatic peace witness might be reinvigorated and sustained in the twenty-first century. To do so, the book examines the nature of the early Pentecostal commitment to nonviolence, and investigates the possibilities that might emerge from Pentecostals and Anabaptists entering into conversation and worship with each other. Contributors engage the arguments surrounding the heritage of Pentecostal pacifism in the United States and then move toward exploring nonviolence and peacemaking as crucial for contemporary Christianity as a whole. Ranging from theology, testimony, and pastoral ministry to interchurch relations, activism, and protest, this diverse collection of essays challenge and invite the whole church to the task of peacemaking while exploring the distinctive, and often neglected, contributions from the Pentecostal-charismatic tradition.

WIRING DIAGRAMS This Owners' Edition - Workshop Manual covers the VW Transporter Type 4 (T4) which was introduced in December 1990 fitted with 2.0 and 2.5 litre petrol engines and 1.9 and 2.4 litre diesel engines. It has been specially written for the practical owner who wants to maintain a vehicle in first-class condition and carry out the bulk of his or her own servicing and repairs. Comprehensive step-by-step instructions are provided for service and overhaul operations to guide the reader through what might otherwise be unfamiliar and complicated tasks. Numerous drawings are included to amplify the text. With the aid of this manual, many aspects of service, overhaul and repair are within the scope of an owner with a reasonable degree of mechanical aptitude. Some operations however demand more skill. Other jobs require the use of special tools and in some cases testing facilities and techniques that are not generally available. Only you can judge whether a job is within your capabilities. We do however try to assist the reader to come to an informed decision. Whilst every effort has been made to ensure that the information provided is correct, it is obviously not possible to guarantee complete freedom from errors or omissions. Information to be found in the driver's handbook is not necessarily duplicated here and it is not possible within this volume to cover every aspect to be found in the manufacturer's own workshop manual which is of much greater size and complexity. However, it should be consulted if more detailed information is needed. Always remember that you are responsible for your own safety and that of others when working on a vehicle. Take particular care with safety-related systems like the brakes and steering, and seek professional advice if in any doubt. Never work under a vehicle unless it is properly supported (a single jack is not enough). Take care with power tools, also regard as potentially harmful fuel, lubricants, solvents and sealers which should always be and kept in labelled, sealed containers. With care and common sense, the practical owner can make an excellent job of maintenance and overhaul. The benefits include money saved and the satisfaction of work well done. You will be adding to your knowledge, too: knowing more about the vehicle you own will help you to make logical decisions about what needs to be done, even if it does in some instances have to go into a professional repair shop. The Volkswagen Transporter T4 is a vehicle that will respond to careful regular servicing and is built to a standard that will ensure a long life if this is remembered.

Tourism has often been described as being about 'selling dreams', tourist experiences being conceptualized as purely a marketing confection, a socially constructed need. However, the reality is that travel for leisure, business, meetings, sports

or visiting loved ones has grown to be a very real sector of the global economy, requiring sophisticated business and marketing practices. The Routledge Handbook of Tourism Marketing explores and critically evaluates the current debates and controversies inherent to the theoretical, methodological and practical processes of marketing within this complex and multi-sector industry. It brings together leading specialists from range of disciplinary backgrounds and geographical regions to provide reflection and empirical research on this complex relationship. The Handbook is divided in to nine inter-related sections: Part 1 deals with shifts in the context of marketing practice and our understanding of what constitutes value for tourists; Part 2 explores macromarketing and tourism; Part 3 deals with strategic issues; Part 4 addresses recent advances in research; Part 5 focuses on developments in tourist consumer behaviour; Part 6 looks at micromarketing; Part 7 moves on to destination marketing and branding issues; Part 8 looks at the influence of technological change on tourism marketing; and Part 9 explores future directions. This timely book offers the reader a comprehensive synthesis of this sub-discipline, conveying the latest thinking and research. It will provide an invaluable resource for all those with an interest in tourism and marketing, encouraging dialogue across disciplinary boundaries and areas of study. This is essential reading for Tourism students, researchers and academics as well as those of Marketing, Business, Events Management and Hospitality Management.
