Ethan's now the sheriff of Maple Junction, and he realizes he never should have let Kelsey go the first time. This could be his second (and last?) chance at happiness...if Kelsey will let him help. A key topic of many technical discussions has been the development of alternative fuels to power the compression ignition engine. Reasons for this include the desire to reduce the dependency on petroleum-based fuel and, at the same time, to reduce the particulate matter (PM) and NOx emissions. Also, there has been interest generated in the diesel engine because of the reduction in greenhouse gases that has been proposed during the 2008-2012 time frame in Europe and the regulations that affect diesel engines in the United States.

Volkswagen owners get dewey-eyed with nostalgia just thinking about their old Beetles. This was a vehicle of a thousand stories, and My Bug presents some of the best of them in all their tie-dyed glory. More than forty brand-new stories, poems, anecdotes, and general love letters plus 100 treasured photographs, illustrations, and cartoons from smitten owners recall the highs and lows of the golden days of Beetlemania: water splashing through holes in the rusted floor; trying to make out in the backseat (indeed, trying to make it out of the backseat; the mystery test button on the dash, the secret panel behind the footrest, the battery so conveniently(!) located under the backseat), the scalding blast of sudden heat as the car chugged up an incline. No self-respecting Boomer can forget the Beetle, even if he or she is driving a Beemer today. Now is the time to get out the bellbottoms and put those memory cells in gear. The Bug is back. The way in which we live is changing under the influence of different factors - be they financial, environment of respective, technological or geopolitical nature, quickly. What was equated with "home" has change, the "home" has turned into a Handeslware whose value is measured in Quadratmetern. 'SQM: The Quantified Home' is less concerned with the house as a physical , protective shell, it presents it as a complex universe of overlapping cultural references, daily rituals, practical needs, unexpressed wishes and aspirations which develop steadily and flow together in an architectural space. The book presents the fundamental changes in the perception of the home, evaluates relevant data, makes assumptions and shows a selection of houses and interiors - from Osama bin Laden's fortress to examples of "living" in the era of Airbnb. In essays by architects, designers, artists and theorists will examine how the space in which we live, has become recognisable and yet so foreign. 140 illustrations
