NATIONAL BESTSELLER Named a Best Book of 2021 by Newsweek, the San Francisco Chronicle, The Washington Post, and the Los Angeles Times "A glorious book—an assured novel that's gorgeously told." —The New York Times Book Review "An incredibly moving epic about an unforgettable family." —CBS Sunday Morning "[An] absorbing novel...I felt both grateful to have known these people and bereft at the prospect of leaving them behind." —The Washington Post A stunning novel about love,

work, and marriage that asks how far one family and one community will go to protect their future. Colleen and Rich Gundersen are raising their young son, Chub, on the rugged California coast. It's 1977, and life in this Pacific Northwest logging town isn't what it used to be. For generations, the community has lived and breathed timber; now that way of life is threatened. Colleen is an amateur midwife. Rich is a tree-topper. It's a dangerous job that requires him to scale trees hundreds of feet tall—a job that both his father and grandfather died doing. Colleen and Rich want a better life for their son—and they take steps to assure their future. Rich secretly spends their savings on a swath of ancient redwoods. But when Colleen, grieving the loss of a recent pregnancy and desperate to have a second child, challenges the logging company's use of the herbicides she believes are responsible for the many miscarriages in the community, Colleen and Rich

find themselves on opposite sides of a budding conflict. As tensions in the town rise, they threaten the very thing the Gundersens are trying to protect: their family. Told in prose as clear as a spring-fed creek, *Damnation Spring* is an intimate, compassionate portrait of a family whose bonds are tested and a community clinging to a vanishing way of life. An extraordinary story of the transcendent, enduring power of love—between husband and wife, mother and child, and longtime neighbors. An essential novel for our times.

This book is an authoritative, comprehensive guide to labor inspection and its fundamental principles. It presents policy issues in an international context, while examining how the major, foreseeable developments in economics, the labor market, and technology--as well as national, sectoral, and enterprise social structures--affect labor inspection. Taking into account substantial new developments and major changes in the field, this volume looks at what has occurred in both the policy and practice of labor inspection in the 21st century. It explores the often entirely new systems and strategies that have surfaced, such as "internal control" in the Nordic countries and the merger of parts of social insurance (worker's compensation) with inspection services (in Australia and New Zealand), and explains how these, and other practices, may benefit countries in similar situations. In addition, the book focuses on pivotal trends which are having a profound impact on labor inspection practices, including: the sum effects of globalization; growth of smaller, independent units that are often difficult to supervise; the continuing trend of enterprises to exist

for only a short time, change ownership, and becoming more mobile; the appearance of virtual enterprises of networks; and the increase of cost and competition pressures at the expense of social concerns. The book explores how these trends are forcing labor inspectors to increasingly abandon a rigid, narrow approach based on a single specialization in favor of a truly integrated vision. It stresses the importance of developing an understanding of all the factors influencing and contributing to improved labor protection. Labor protection specialists, policymakers and others involved in the world of work will find a wealth of information on improving and evaluating labor inspection systems.

A shocking exposé of Volkswagen's fraud by the New York Times reporter who covered the scandal. Updated with a New Afterword by the Author. When news of Volkswagen's clean diesel fraud first broke in September 2015, it sent shockwaves around the world. Overnight, the company long associated with quality, reliability and trust became a universal symbol of greed and deception. Consumers were outraged, investors panicked, the company embarrassed and facing bankruptcy. As lawsuits and criminal investigations piled up, by August 2016 VW had settled with American regulators and car-owners for \$15 billion, with additional fines and claims still looming. In *Faster, Higher, Farther*, Jack Ewing rips the lid off the scandal. He describes VW's rise from "the people's car" during the Nazi era to one of Germany's most prestigious and important global brands, touted for being "green." He

paints vivid portraits of Volkswagen chairman Ferdinand Pich and chief executive Martin Winterkorn, arguing that their unremitting ambition drove employees, working feverishly in pursuit of impossible sales targets, to illegal methods. With unprecedented access to key players and a ringside seat during the course of the legal proceedings, *Faster, Higher, Farther* reveals how the succeed-at-all-costs culture prevalent in modern boardrooms led to one of corporate history's farthest-reaching cases of fraud--with potentially devastating consequences. As the future of one of the world's biggest companies remains uncertain, this is the extraordinary story of Volkswagen's downfall.

“ At any price, Herr Dr. Porsche. At any price below 1000 marks (\$250), ” laughed Hitler as he ordered the inauguration of the Volkswagen project in the late summer of 1933. The scene was Berlin ’ s Hotel Kaiserhof where Hitler, meeting with Germany ’ s most famous automotive engineer, Dr. Ferdinand Porsche, was outlining plans for a “ people ’ s car. ” Hitler wanted, for the German worker, a car that would travel the autobahns, at reasonably high speed, provide gasoline mileage in the 30 to 35 miles per gallon class and be simply constructed and inexpensive to repair. Also, it had to cost less than any other car on the European market.

Power Play Doubleday

A Wall Street Journal Business Bestseller “ A deeply reported and business-savvy chronicle of Tesla's wild ride. ” —Walter Isaacson, New

York Times Book Review Power Play is the riveting inside story of Elon Musk and Tesla's bid to build the world's greatest car—from award-winning Wall Street Journal tech and auto reporter Tim Higgins Elon Musk is among the most controversial titans of Silicon Valley. To some he's a genius and a visionary; to others he's a mercurial huckster. Billions of dollars have been gained and lost on his tweets; his personal exploits are the stuff of tabloids. But for all his outrageous talk of mind-uploading and space travel, his most audacious vision is the one closest to the ground: the electric car. When Tesla was founded in the 2000s, electric cars were novelties, trotted out and thrown on the scrap heap by carmakers for more than a century. But where most onlookers saw only failure, a small band of Silicon Valley engineers and entrepreneurs saw opportunity. The gas-guzzling car was in need of disruption. They pitted themselves against the biggest, fiercest business rivals in the world, setting out to make a car that was quicker, sexier, smoother, cleaner than the competition. But as the saying goes, to make a small fortune in cars, start with a big fortune. Tesla would undergo a hellish fifteen years, beset by rivals, pressured by investors, hobbled by whistleblowers, buoyed by its loyal supporters. Musk himself would often prove Tesla's worst enemy—his antics more than once took the company he had initially funded largely with his own money to the brink of collapse. Was he an underdog, an antihero, a conman, or some combination of the three? Wall Street Journal tech and auto reporter Tim Higgins had a front-row seat for the drama: the pileups, wrestling for control, meltdowns, and the unlikeliest outcome of all, success. A story of power, recklessness, struggle, and triumph, Power Play is an exhilarating look at how a team of eccentrics and innovators beat the odds—and changed the future.
