"With this book, Prof. Dr. Vantsevich brings a tremendous contribution to the field of Automotive Transmission and Driveline Engineering, including his innovative methods for optimum driveline synthesis, as well as his experience with the development of various hardware solutions, from the basic limited slip differentials to the most sophisticated mechatronic systems." —Dr.-Ing. Mircea Gradu Director, Transmission and Driveline Engineering Head, Virtual Analysis Tools Chrysler Group LLC Now that vehicles with four and more driving wheels are firmly ensconced in the consumer market, they must provide energy/fuel-saving benefits and improved operational quality including terrain mobility, traction and velocity properties, turnability, and stability of motion. A first-of-its-kind resource, Driveline Systems of Ground Vehicles: Theory and Design presents a comprehensive and analytical treatment of driveline research, design, and tests based on energy efficiency, vehicle dynamics, and operational properties requirements. This volume addresses fundamental engineering problems including how to investigate the effect of different driveline systems on the properties of vehicles and how to determined the optimal characteristics of the driveline system and its power-dividing units (PDUs) and design it for a specific vehicle to ensure high level of vehicle dynamics, energy efficiency, and performance. The authors develop an analytical apparatus for math modeling of driveline systems that can be compiled from different types of PDUs. They also introduce methodologies for the synthesis of optimal characteristics of PDUs for different types of vehicles. Structured to be useful to engineers of all levels of experience, university professors and graduate students, the book is based on the R&D projects conducted by the authors. It explores intriguing engineering dilemmas such as how to achieve higher energy and fuel efficiency by driving either all the wheels or not all the wheels, solve oversteering issues by managing wheel power distribution, and many other technical problems.

Who would want to kill a beautiful young German model? When her body is found washed up in a harbour near Eastbourne, England, two characters tasked with solving the murder clash as they work together. One is Inspector Carpenter, an Englishman who is outwardly cool but full of self-doubt. The second is straight off the weekly extradition plane from Poland Lieutenant (soon to become DS) Kaminska, a very religious but efficient policewoman. Carpenter cant even guess the right drinks to order in social situations, but he can listen, tell a lie from

the truth, and plod through the leads until he hits the right one.

Kaminska is fluent in several languages, but her English isnt that good. Like most continental police, she can use a gun. It is a clash of cultures and personalities. By chance, Carpenters laptop is stolen, but in an odd way this helps with solving the murder. Carpenter and Kaminska crash through the Kent countryside and London, trying to get a working relationship together. They follow leads that take them to the island of Sark. They concentrate on the forensic information given by a flash mobile phone. The story climaxes at Eastbourne, where Serena Williams is making her comeback. Carpenter and Kaminska corner the hit man but will they be able to catch them alive?

An expert on business strategy offers a pragmatic take on how businesses of all sizes balance the competing demands of profitability and employment with sustainability. The demands and stresses on companies only grow as executives face a multitude of competing business goals. Their stakeholders are interested in corporate profits, jobs, business growth, and environmental sustainability. In this book, business strategy expert Yossi Sheffi offers a pragmatic take on how businesses of all sizes—from Coca Cola and Siemens to Dr. Bronner's Magical Soaps and Patagonia—navigate these competing goals. Drawing on extensive interviews with more than 250 executives, Sheffi examines the challenges, solutions, and implications of balancing traditional business goals with sustainability. Sheffi, author of the widely read *The Resilient Enterprise*, argues that business executives' personal opinions on environmental sustainability are irrelevant. The business merits of environmental sustainability are based on the fact that even the most ardent climate change skeptics in the C-suite face natural resource costs, public relations problems, regulatory burdens, and a green consumer segment. Sheffi presents three basic business rationales for corporate sustainability efforts: cutting costs, reducing risk, and achieving growth. For companies, sustainability is not a simple case of “ profits versus planet ” but is instead a more subtle issue of (some) people versus (other) people—those looking for jobs and inexpensive goods versus others who seek a pristine environment. This book aims to help companies satisfy these conflicting motivations for both economic growth and environmental sustainability.

Text: Murder Dundurn

When the former Deputy Director of the CIA, Bill Remington, takes off after charges of selling secrets to the Chinese, Jake Adams is hired off the books to find the rogue Agency officer. But with many friends in the Agency, and money siphoned to numerous off-shore accounts, this will not be an easy task. In fact, Remington has managed to hide for nearly a month without the Agency, Interpol, or any foreign agencies discovering his location. Jake finds himself in Taiwan, where he is attacked almost immediately and set up as a murderer. At the same time, a Chinese jet attacks a Taiwanese Navy ship, bringing the two Chinese countries to the brink of war. Jake races against time to uncover a conspiracy of factions trying to use this crisis to their advantage. Will Jake bring this traitor to justice before the Pacific Rim goes up in flames? With bullets flying from all directions, Jake's adventure in Southeast Asia could be his last battle.
