Ibadan University
Press
This edited book
brings together an
international cast

of contributors to
examine how academic
literacy is learned
and mastered in
different tertiary
education settings
around the world.
Bringing to the fore
the value of
qualitative enquiry
through ethnographic
methods, the authors
illustrate in-depth
descriptions of genre

knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the

backdrop of internationalisation trends in Higher Education and the pressure on academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

History Objective Tests with Solved Questions on WASSCE & Nov., - Dec. Exam for Senior High Schools
Routledge

A man has lived on his own beside a wild,

unforgiving coastline for many years. His companions are the birds, the land and the sea. From a choice made long ago, he keeps himself separate from the world of people and he gains a fierce pleasure from his environment. His solitude is broken by his discovery, one early morning on the flat sands of low tide, of a child washed up on the beach, but still alive. This is a novel of redemption, the story of a man experiencing the world as though for the first time.

Principles of Marketing

Routledge

During the 2016 presidential election, America's election infrastructure was targeted by actors sponsored by the Russian government.

Securing the Vote: Protecting American Democracy examines the challenges arising out of the 2016 federal election, assesses current technology and standards for voting, and recommends steps that the federal government, state and local governments, election administrators, and vendors of voting technology should take to improve the security of election infrastructure. In

doing so, the report provides a vision of voting that is more secure, accessible, reliable, and verifiable.

Preparing Teachers for a Changing World Springer

This is About a pampered boy, Obuechina

Maduabuchi.....Only brother of five older sisters and a younger one, prize pupil in school, apple of his doting mother's eye, eight years old and hopelessly spoilt. In a vain attempt to salvage his character, his father decides he must be sent away as houseboy to a teacher and his wicked wife.

Women of Owu John Wiley & Sons

This is an African retelling of Euripides: an unnervingly topical story of a people and a beloved city destroyed by the brutality of war. The play was first performed in Lagos in 2003 under the distinguished director Chuck Mike, and subsequently toured the UK.

The SAGE Encyclopedia of Educational Research, Measurement, and Evaluation Springer Nature

This edited collection provides a window into Africa's diversity. A wide-ranging body of authors offers a valuable glimpse into the challenges and opportunities presented by globalization to the youth in Africa and its diaspora, while issuing a stern call for action to local governments to act now and tap into the energy of Africa's burgeoning youth population. In doing so, the authors expand extant literature on the continent's coping with globalization in the context of young people in various African nations. Featured in the collection are views on education, language, agriculture, sport and technology, deeply interwoven into the schooling, behavior, and health of youth. Specifically, these practices are found in both formal and non-formal education, agricultural production, and food nutrition, computer

technology, and sport's amelioration of health issues, throughout Africa.

Securing the Vote

Multilingual Matters Limited

Washback refers to the influence of language testing on teaching and learning. This volume, at the important intersection of language testing and teaching practices, presents theoretical, methodological, and practical guidance for current and future washback studies. In the field of language testing, researchers' major interest has traditionally been focused on issues and solving problems inherent in tests in order to increase their reliability and validity. However, the washback effect goes well beyond the test itself to include factors, such as curriculum, teacher and learner behaviors inside and outside the

classroom, their perceptions of the test, and how test scores are used. Only recently have researchers started to empirically investigate the phenomenon of washback. This volume of such research serves two essential purposes by: *providing an overview of the complexity of washback and the various contextual factors entangled within testing, teaching, and learning; and *presenting empirical studies from around the world that offer insights into the effects of washback in specific educational contexts and models of research on which future studies can be based. The extensive use of test scores for various educational and social purposes in society nowadays makes the washback effect a high-interest phenomenon in the day-to-day educational

activities of teachers, researchers, program coordinators/directors, policymakers, and others in the field of education. *Washback in Language Testing: Research Contexts and Methods* is a valuable resource for those who are interested in the application of findings to actual teaching and learning situations or conduct washback research in their own contexts, including educational and psychological testing experts, as well as alternative assessment people in all fields, and for policy- and decision-makers in educational and testing organizations.

Emerging Perspectives on Learning, teaching, and Technology

University Press, Nigeria
Many students, ranging from native English

speakers to recent immigrants, need help in understanding and using the language of school. Language is the lifeblood of learning in all content areas, and it plays a major role in academic achievement. *Building Academic Language* explains the functions and features of academic language that every teacher (language arts, history, math, & science teachers, etc.) should know for supporting academic reading, writing, and discussion. The book includes research-based instructional and assessment activities that content teachers can use to build students' abilities to understand and describe the many abstract concepts, higher-order thinking skills, and

complex relationships in a discipline. The book emphasizes an approach that builds from students' existing ways of learning and communicating, scaffolding them to think and talk as content area experts think and talk about math, science, history, and language arts. Major topics and themes include: What is academic language and how does it differ by content area? How can language-building activities (discussions, small groups, etc.) support content understanding? How can we build language abilities for content reading and writing - and vice versa? How can we build on students' diverse ways of understanding, learning, and communicating about

the world? How can we more effectively model and scaffold academic language in our teaching and assessment?

Popcorn Handbook Lingua Franca Csoport

Since test items are the building blocks of any test, learning how to develop and validate test items has always been critical to the teaching-learning process. As they grow in importance and use, testing programs increasingly supplement the use of selected-response (multiple-choice) items with constructed-response formats. This trend is expected to continue. As a result, a new item writing book is needed, one that provides comprehensive coverage of both types of items and of the validity theory underlying them. This book is an outgrowth of the author's previous book, *Developing and*

Validating Multiple-Choice Test Items, 3e (Haladyna, 2004). That book achieved distinction as the leading source of guidance on creating and validating selected-response test items. Like its predecessor, the content of this new book is based on both an extensive review of the literature and on its author's long experience in the testing field. It is very timely in this era of burgeoning testing programs, especially when these items are delivered in a computer-based environment. Key features include ...

Comprehensive and Flexible – No other book so thoroughly covers the field of test item development and its various applications. **Focus on Validity** – Validity, the most important consideration in testing, is stressed throughout and is based on the Standards for

Educational and Psychological Testing, currently under revision by AERA, APA, and NCME **Illustrative Examples** – The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items. Strategies for training item writers and developing large numbers of items using algorithms and other item-generating methods are also presented. **Based on Theory and Research** – A comprehensive review and synthesis of existing research runs throughout the book and complements the expertise of its authors. WAEC in Review Prentice Hall

This engaging open access book discusses how a values and valuing perspective can facilitate a more effective mathematics

pedagogical experience, and allows readers to explore multiple applications of the values perspective across different education systems. It also clearly shows that teaching mathematics involves not only reasoning and feelings, but also students' interactions with their cultural setting and each other. The book brings together the work of world leaders and new thinkers in mathematics educational research to improve the learning and teaching of mathematics. Addressing themes such as discovering hidden cultural values, a multicultural society and methodological issues in the investigation of values in mathematics, it stimulates readers to consider these topics in cross-cultural ways, and offers suggestions for research and classroom practice. It is a valuable resource for

scholars of mathematics education, from early childhood through to higher education and an inspiring read for all mathematics teachers.

Essentials of Educational Measurement Springer

This book has a practical focus in that it examines the effectiveness of alternatives to traditional assessment and pedagogical practices for bilingual children. It argues that much special education practice with respect to bilingual students is fundamentally misdirected.

Expo '77 John Wiley & Sons

Responsible Science is a comprehensive review of factors that influence the integrity of the research process. Volume I examines reports on the incidence of misconduct in science and reviews institutional and governmental efforts to

handle cases of misconduct. The result of a two-year study by a panel of experts convened by the National Academy of Sciences, this book critically analyzes the impact of today's research environment on the traditional checks and balances that foster integrity in science.

Responsible Science is a provocative examination of the role of educational efforts; research guidelines; and the contributions of individual scientists, mentors, and institutional officials in encouraging responsible research practices.

Assessment of Learning

CreateSpace

This book takes a critical look at how students' achievements are assessed for a range of purposes, from reporting progress to selection

and qualification. It considers the relationship between what is taught, and how, and what and how learning outcomes are assessed. The impact of using assessment results for setting targets and evaluation of provision for learning is also discussed. The pros and cons of using tests and examinations and alternatives based on the judgments of teachers are considered in terms of four key criteria: validity, reliability, impact and required resources. Evidence from research and examples of current practice in different countries within and outside the UK support the case for making more and better use of teachers' judgments in assessment of learning. In this way assessment of learning (summative assessment) can be compatible with assessment for learning (formative assessment).

Building Academic

Language National Academies Press

This volume offers 17

essays on the apocryphal/ God (Renate Egger- deuterocanonical books of Wenzel), Qoheleth Ben Sira (Ecclesiasticus) (Edward Owens), First and Tobit. Four essays Enoch (Benjamin Wright), explore Tobit's Letter of James (Núria connections with Genesis Calduch-Benages), and Matthew's Gospel (Irene Nowell), Job (James Aitken). Psalms (Stephen Ryan), Ama Ata Aidoo, The Dilemma of a Ghost and the New Testament (Vincent Skemp), with a Wipf and Stock Publishers fifth considering the Based on rapid advances in medieval Hebrew and what is known about how Aramaic Tobit texts (Loren people learn and how to Stuckenbruck and Stuart teach effectively, this Weeks). Five further important book examines essays examine Ben the core concepts and Sira's links with Genesis central pedagogies that should be at the heart of any teacher education program. Stemming from the results of a commission sponsored by the National Academy of Education, Preparing Teachers for a Changing World recommends the creation of an informed teacher education

curriculum with the common elements that represent state-of-the-art standards for the profession. Written for teacher educators in both traditional and alternative programs, university and school system leaders, teachers, staff development professionals, researchers, and educational policymakers, the book addresses the key foundational knowledge for teaching and discusses how to implement that knowledge within the classroom.

Preparing Teachers for a Changing World

recommends that, in addition to strong subject matter knowledge, all new teachers have a basic understanding of how people learn and develop, as well as how children acquire and use language, which is the currency of education. In addition, the book suggests that

teaching professionals must be able to apply that knowledge in developing curriculum that attends to students' needs, the demands of the content, and the social purposes of education: in teaching specific subject matter to diverse students, in managing the classroom, assessing student performance, and using technology in the classroom.

The Potter's Wheel
Routledge

WAEC in Review is a practical intervention strategy in transforming the weakening educational system of Liberia where academic excellence is unceasingly diminishing. LIPACE Pilot Study Guide is not only a landmark achievement in the educational history of Liberia but a remarkable stride towards the proper

preparation of Liberian students for future diets of the WAEC exam. As a member of the National Committee of the West African Examinations Council and a Stakeholder in the Liberian Education System, I wish to recommend the use of this study guide to adequately prepare each and every Liberian student for future examinations thereby setting the stage for an easy transition to the emerging West African Senior Secondary Examinations (WASSCE). I am explicitly confident that you will definitely find your journey through this guide very rewarding as you prepare to sit the next WAEC Exam.—David S. Massaquoi Sr., director of Education, The Salvation Army–Liberia Command Education Secretariat Our students sit the exam in constant fear of

proctors and supervisors. They know nothing about the exam and its structure and this fear lead to them failing massively. We need to build the confidence level of our students and help them to study hard and understand the roles of proctors and supervisors to stop the intimidation during the exam. Thanks to LIPACE and the “Turning the Tide” project, we have helped our students achieved an amazing achievement for the first time in the history of Gbarpolu County where all senior students successfully passed the exam.—Lartey Bemah, principal of Bopolu Public School (2012-2013), Gbarpolu County, Liberia
