The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work.

The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for

the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.)

The book appears in the Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and complements the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC

International Centre for women, and people
TVET ' in Bonn, Germany (with disabilities).

focus on vulnerable society (i.e.
groups (i.e. youth, housing, health,
migrants, cultural employment, and
groups e.g. Roma, social and

political participation). Many studies have already diagnosed and described the causes of educational and social exclusion of these vulnerable groups. This monograph, however, provides solutions, that is, actions for success identified through the INCLUD-ED project, thus providing both, contrasted data and solid theoretical background and development. Some examples of these actions are interactive groups (or heterogeneous grouping in the classroom with reorganisation of human resources), extension of the learning time, homework clubs, tutored libraries, family and community educative participation, family education, or dialogic literary gatherings. All these actions have been defined as successful educational actions, which mean that they lead to both efficiency and equity. Finally, recommendations for policy and practice are included and discussed.

Evaluating and Improving Undergraduate Teaching in Science, Technology,

Engineering, and

Mathematics United Nations Educational

Economic, academic, and social forces are causing undergraduate schools to start a fresh examination of teaching effectiveness.

Administrators face the complex task of developing equitable, predictable ways to evaluate, encourage, and reward good teaching in science, math, engineering, and technology. Evaluating, and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics offers a vision for systematic evaluation of teaching practices and academic programs, with recommendations to the various stakeholders in higher education about how to achieve change. What is good undergraduate teaching? This book discusses how to evaluate undergraduate teaching of science, mathematics, engineering, and technology and what characterizes effective

teaching in these fields. Why has it been difficult for colleges and universities to address the question of teaching effectiveness? The committee explores the implications of differences between the research and teaching cultures- and how practices in rewarding researchers could be transferred to the teaching enterprise. How should administrators approach the evaluation of individual faculty members? And how should evaluation results be used? The committee discusses methodologies, offers practical guidelines, and points out pitfalls. Evaluating, and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics provides a blueprint for institutions ready to build effective evaluation programs for teaching in science fields. Operations of the Civil Service World Scientific This book provides two thousand multiple choice questions on human anatomy and physiology,

separated into 40 categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in examinations for undergraduate introductory courses and as such reflect the focus of these particular courses and are pitched at the level to challenge students that are beginning their training in anatomy and physiology. The questions and answer combinations are to be used both by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition & dietetics, health sciences and students taking an anatomy and physiology course as an elective.

Curriculum problems are everywhere: alert observers with a practiced eye and educated mind will find it almost impossible to read a newspaper without discovering curricular issues. The media often report about educational reforms or even about curriculum wars with opposing parties fiercely debating the aims, content and organization of learning. Few people analyze these trends and discussions from a curricular conceptual framework. In addition, people sometimes think that their curriculum approaches and problems are unique and context-specific. However, international experience shows us that we can learn a lot from curriculum issues elsewhere. This book aims to sharpen the eyes and minds of a broader audience in identifying, understanding, addressing and reflecting upon

curriculum problems. It also aims to contribute to the increased exchange, discussion and reflection on all the current curriculum problems that form such a crucial part of learning worldwide.

Perspectives on Education and Science Teaching

Hyperion Books

This is an African retelling of Euripides: an unnervingly topical story of a people and a beloved city destroyed by the brutality of war. The play was first performed in Lagos in 2003 under the distinguished director Chuck Mike, and subsequently toured the UK.

Princeton University Press

Négritude has been defined by Léopold Sédar Senghor as "the sum of the cultural values of the black world as they are expressed in the life, the institutions, and the works of black men." Sylvia Washington Bâ analyzes Senghor's poetry to show how the concept of

negritude infuses it at every level.

A biographical sketch describes his childhood in Senegal, his distinguished academic career in France, and his election as President of Senegal. Themes of alienation and exile pervade Senghor's poetry, but it was by the opposition of his sensitivity and values to those of Europe that he was able to formulate his credo. Its key theme, and the supreme value of black African civilization, is the concept of life forces, which are not attributes or accidents of being, but the very essence of being. Life is an essentially dynamic mode of being for the black African, and it has been Senghor's achievement to communicate African intensity and vitality through his use of the nuances, subtleties, and sonorities of the French language. In the final chapter Sylvia Washington Bâ discusses the future of Senghor's belief that the black man's culture should be recognized as valid not simply as a matter of

human justice, but because the values of negritude could be instrumental in the reintegration of positive values into western civilization and the reorientation of contemporary man toward life and love. Originally published in 1973. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Tell your story and connect with the college of your dreams for admission and financial aid "If everyone wrote essays like this, admissions officers would have to take every student's essay seriously." --Steve LeMenager, founder of Edvice Princeton and former director of admission at Princeton University "With patience, contagious confidence, and plenty of real-life examples, Carol illuminates a process that can help anyone discover and articulate those stories that will help them stand out in their own way, and in their own words." --Shelley Krause, college counselor, Rutgers Preparatory School, and curator of the College Lists Wiki "Because the college essay offers applicants their lone opportunity to demonstrate what truly matters to them, and to share the qualities that make them unique, the stakes could not be any higher. With meticulous detail, Barash delivers a foolproof plan

for helping college applicants strike essay gold." --Chad Troutwine, cofounder and CEO of Veritas Prep To write out loud is to write and speak in a way that makes people pay attention. Write Out Loud teaches the Story To College program--with its proven storytelling-based approach, the Moments Method. This program has helped more than 8,000 students from high schools in the United States and around the world create effective, authentic application essays to win admission and financial aid at their top college choices. Write Out Loud enables anyone to masterfully integrate past experiences and future ambitions into successful application essays and interviews. The guided exercises help college essay writers get past the stress and confusion of writing about themselves. Write Out Loud reveals how to find unique topics for compelling essays, shows how to make the transition from a spoken story to a written essay, and provides examples of successful essays. The book also walks students through the Common Application, the online college application form used by more than 500 colleges and universities in the US and abroad. Inside, students will find: The 12 tools of the Moments Method Specific guidance for completing the Common Application Charts and checklists to organize essays and supplements Insight from admissions officers on what characterizes a successful college application essay With Write Out Loud, students build confidence to show their best selves in writing and to gain admission into the college or university they desire. Refocusing Research in Science, Technology, and Mathematics (STM) Education Springer Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to

Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country'. This story of migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of 'alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - 'home'. The novel thus touches on concerns of deeper relevance to the politics of race and migration of the twenty first century.

The West African Examinations Council: the First 21 Years (1952-1973) CreateSpace
Street life in the slums of Accra is realistically portrayed in this socially-committed, subtle novel about four educated women who are inspired by the plight of a 14-year old girl, Fofo. As the main characters convert their library center into a practical street initiative, the novel invokes the squalor, health risks, and vicious cycles of poverty and violence that drive children to the streets and women to prostitution; and, from which, ultimately, no one in the society is free. Harmonies of the World Sub-Saharan Pub & Traders

This volume deals with the propagation of three-dimensional shock waves and their reflection from curved walls. It is divided into two parts. The first part presents a ray method. This is based on the expansion of fluid properties in power series at an arbitrary point on the shock front. Continuous fractions are used. Results for shock propagation in non-uniform fluids are given. The second part discusses the shock reflection from a concave body. The important shock-focusing problem is included. The work is supported by both numerical and experimental results. Many interesting features, such as formation of a jet, vortices and the appearance of disturbances on the shock front, are discussed. Besides shock waves in gases, the distinctive features of shock propagation through a weakly ionized plasma are considered.

Obi Okonkwo is an idealistic young man who, thanks to the privileges of an education in

Britain, has now returned to Nigeria for a job in the civil service. However in his new role he finds that the way of government seems to be backhanders and corruption. Obi manages to resist the bribes that are offered to him, but when he falls in love with an unsuitable girl - to the disapproval of his parents - he sinks further into emotional and financial turmoil. The lure of easy money becomes harder to refuse, and Obi becomes caught in a trap he cannot escape. Showing a man lost in cultural limbo, and a Nigeria entering a new age of disillusionment, *No Longer at Ease* concludes Achebe's remarkable trilogy charting three generations of an African community under the impact of colonialism, the first two volumes of which are *Things Fall Apart* and *Arrow of God*.

The monograph "Explicit Biology: A Revision Course" for UTME, POST-UTME and other related examinations written by O.J. Olaoye is a complementary text to the various textbooks that have been written in the subject area. The book has five sections and twenty six chapters on all the biology topics. This book has become timely in view of the poor results that are being witnessed in the UTME examination especially in the

sciences and mathematics, biology inclusive. These majorly are due to poor or inadequate access to good study materials. Each chapter has annotated topics followed by copious specimen questions on some past UTME and POST -UTME examination, for practice and emphasis. The topics in each chapter are adequately treated and with clarity. The illustrations are simple but effective. The author has done a lot of work and put in efforts to come out with a very readable and useful text. It is highly recommended to all the students aspiring to undertake the UTME and POST-UTME examination, in order to improve highly their chances of success. O.A. Sofola B.Sc, M.Sc, M.B.B.S (Lagos), Ph.D (Leeds), FAS (Nig.) Professor of physiology, College of Medicine, University of Lagos Former Vice Chancellor, OOU, Ago- Iwoye. Ogun State. An Essay on Criticism University Press Llc

Johannes Kepler published *Harmonies of the World* in 1619. This was the summation of his theories about celestial correspondences, and ties together the ratios of the planetary orbits, musical theory, and the Platonic solids. Kepler's speculations are long discredited. However, this work stands as a bridge between the Hermetic philosophy of the Renaissance, which sought systems of symbolic correspondences in the fabric of nature, and modern science. And today, we finally have heard the music of the spheres: data from outer system probes have been translated into acoustic form, and we can listen to strange clicks and moans from Jupiter's magnetosphere.

From legendary playwright

August Wilson comes the

powerful, stunning dramatic bestseller that won him

critical acclaim, including the

Tony Award for Best Play

and the Pulitzer Prize. Troy

Maxson is a strong man, a

hard man. He has had to be to survive. Troy Maxson has

gone through life in an

America where to be proud

and black is to face pressures

that could crush a man, body

and soul. But the 1950s are

yielding to the new spirit of

liberation in the 1960s, a spirit

that is changing the world

Troy Maxson has learned to

deal with the only way he can,

a spirit that is making him a

stranger, angry and afraid, in a

world he never knew and to a

wife and son he understands

less and less. This is a modern

classic, a book that deals with

the impossibly difficult

themes of race in America, set

during the Civil Rights

Movement of the 1950s and

60s. Now an Academy Award-

winning film directed by and

starring Denzel Washington,

along with Academy Award

and Golden Globe winner

Viola Davis.
