The Nigerian condition has been the subject of conversation among writers, policymakers, and market men and women. There is no where the subject is not broached or discussed and often solutions are proffered, from the rational to the mundane. This is to be applauded because a culture of debate is to be preferred to silence as it is a national asset. Indeed, it is the duty of the ruling elite within the state sphere to distil the feedback from the citizenry and turn it into an outcome that is healthy for the polity.

LIPACE Pilot Study Guide is not only a landmark achievement in the educational history of Liberia but a remarkable strive towards the proper preparation of Liberian students for future diets of the WAEC exam. As a member of the National Committee of the West African Examinations Council and a Stakeholder in the Liberian Education System, I wish to recommend the use of this study guide to adequately prepare each and every Liberian student for future examinations thereby setting the stage for an easy transition to the emerging West African Senior Secondary Examinations (WASSCE). I am explicitly confident that you will definitely find your journey through this guide very rewarding as you prepare to sit the next WAEC Exam.—David S. Massaquoi, Sr., director of Education, The Salvation Army—Liberia Command Education Secretariat Our students sit the exam in constant fear of proctors and supervisors. They know nothing about the exam and its structure and this fear lead to them failing massively. We need to build the confidence level of our students and help them to study hard and understand the roles of proctors and supervisors to stop the intimidation during the exam. Thanks to LIPACE and the "Turning the Tide" project, we have helped our students achieved an amazing achievement for the first time in the history of Gbarpolu County where all senior students successfully passed the exam.—Lartey Bemah, principal of Bopolu Public School (2012-2013), Gbarpolu County, Liberia

This book explores the role of the British Police in home food production during the First World War, a critical time when decreasing food imports threatened population starvation around the country. Drawing from the police's most popular weekly journal, the book provides insights into policemen's lives, the political context in which they worked, and the pressures on police forces throughout Britain during the Great War. Unlike neighbouring countries in Europe, Britain avoided major food riots due to government control of farming from December 1916, which prioritised agriculture to feed the nation. The police force released over 400 policemen in England and Scotland to serve as ploughmen from March 1917 for around two months. Almost a third of policemen throughout Britain had previous agricultural backgrounds and so were welcomed by farmers as experienced workers. This book illustrates not only why the food crisis arose and the state of British farming during the war, but it also sheds light on how individual police forces were approached and encouraged to release their policemen, at a time when police forces themselves were critically short of staff due to recruitment into the war. The author discusses how the release of policemen into agriculture as first responders benefitted the police and provided surveillance over home food production in the national interest.
