Hallelujah, it's a book! After
proving itself to be the
"funniest calendar of the year"
(according to Gene Shalit),
"irresistible" (USA Weekend),
and "habit-forming" (Maxim
magazine), the Nuns Having

Fun calendar has inspired
Nuns Having Fun, a book of
endearing nuttiness. Catholic
kitsch doesn't get any funnier.
Written by Maureen Kelly and
Jeffrey Stone, pitch-perfect co-
authors of the nuns calendar
and the New York Times
bestseller Growing Up
Catholic, Nuns Having Fun
features hundreds of sisters in
full habit, cutting loose and
having a hoot. Here are nuns
in the surf ("This is even more
fun than walking on water"),
nuns in bumper cars ("We
brake for Jesus"), nuns in a
beer hall ("Ale Marys"), and

nuns in the museum, huddled
in front of a study of nudes
("It's okay to open your eyes.
Sister Wendy says it's art").
There are nuns on skates, at
bat, at the theater, skeet
shooting (nuns with guns!),
even hitting the slots (you
know it's for a good cause).
The 125 images are from the
1950s and '60s, black-and-
white and possessing a pure
retro charm; the written
material is all-new. Drawing
on their years as parochial
school students, the authors
explore the lore and legends
surrounding nuns, including

Favorite Punishments from Nuns, Nuns Say the Darndest Things, How to Recognize a Nun After Vatican II, a Wimble Watch, and List of People Who Could Have Been Nuns. As Sister says, "To err is human. To laugh is divine."

Falling in Love

Countryside is
travel writing at
its best by New
York Times best-
selling author

Susan Branch. This charming book is part love story, part travel guide - a hand-written and watercolored diary/journal of Branch's six-day transatlantic crossing on board the Queen Mary 2 and two-month ramble over the backroads of rural England. There are over three hundred photos, countless watercolor

illustrations, wonderful quotes, recipes, a book list, a movie list, hand-drawn maps and much more. Travel with Susan as she makes her way around hedgerows and through wildflower meadows to visit the homes and gardens of her literary and artistic heroes, including Beatrix Potter and Jane Austen. It's a

travel guide that will help you plan a trip of your own, lovely for the armchair traveler because Susan really does take you there, and perfect for all Downton Abbey anglophiles. When you are finished, go to Susan's website where there is an interactive Appendix to the book you can experience driving	across the Dales with Susan's own videos and find links to everything she writes about, the cottages and gardens you will want to see yourself. A Fine Romance is book three of Susan Branch's autobiographical trilogy. First in order is The Fairy Tale Girl, followed by Martha's Vineyard - Isle of	Dreams, and finally A Fine Romance - Falling in Love with the English Countryside. All three are hand- lettered, watercolored, filled with photos, recipes and quotes and, as Susan says, "as much magic as I could possibly stuff between the covers." The world is warming,
our portfolios will
have to adapt, and the
stocks we own can help
shape our future;
James Ellman shows how
to invest wisely as
climate change impacts
multiple sectors
across the stock
market. The costs of
global warming and its
mitigation will have a
major impact on equity
market performance

over the next two
decades. As the climate
changes, investors will
need to understand
which are the best-
positioned market
sectors and stocks as
well as those to avoid.
Hot Stocks provides a
roadmap detailing how
to invest in this new
reality. It evaluates
the many ways global
warming will affect
profit flows in the
economy: • Impacts of a
warmer climate, rising
ocean levels, more
frequent extreme storm
events, land
desertification and

ocean acidification. • Potential for government taxation on greenhouse gas emissions. • Accelerating switching to renewable power systems that are increasingly cost competitive with those powered by oil fossil fuels. • Government bans on sales of cars powered by internal combustion engines and the electrification of the terrestrial vehicle fleet. • Potential for hydrocarbon reserves and equipment becoming impaired or 'stranded	assets'. • Rising demand for major infrastructure projects to protect valuable coastal real estate from inundation. • Litigation aimed at forcing legacy polluters to pay mitigation costs. The book drills down on how these changes will depress or support stocks in sectors such as the petroleum industry, automakers, renewable power providers, regional banking, property insurance, heavy equipment	manufacturers, Real Estate Investment Trusts (REITs) and agricultural chemicals. The analysis then pivots away from a US-centric focus to identify those nations around the world whose economies are best positioned to successfully adjust to the impact of rising prevailing temperatures, as well as those likely to suffer the most from the trend.
