The Gospel According to Mamma is a collection of twenty-one extraordinary lessons the author learned from her charming and captivating mamma. These "mamma teachings" are packed with sassy inspiration, practical insights and real-life anecdotes. Leaving Georgia with her mamma late one September night when her daddy was en route to end their lives marked the beginning of a lifetime of instruction. How to maintain faith in God and yourself, love the hell out of folks and be happy when there's no obvious reason to be are just a few of the messages you'll find in this book. PRAISE FOR THE GOSPEL ACCORDING TO MAMMA "Annette's first book is a winner! She picked the perfect subject - her irrepressibly joyous mother, who has given her daughter important and inspiring words of wisdom to cherish. If you yearn to help your daughter navigate life experiences with assurance and spunk, give her The Gospel According to Mamma." —Mary Jo Beebe, coauthor of Jesus' Healings and New Testament Healings "If only there were more mothers like Annette Bridges' mamma: always encouraging, always believing the best of her children, a 'steel magnolia' whose motherly advice is based on the Bible and common sense. Remembering events in her own past, Annette gives us 21 valuable life lessons based on the wisdom of her indefatigable Southern mamma." —Renee Corley, former editor at UPI's religionandspirituality.com "Once you get to the end of reading about Mamma and her wonderful lessons, you will walk away a little wiser. Annette puts life in perspective. She lives a fulfilling life, just as her Mamma taught her. Whether to find your faith, believe in your self or master the ability to see the good in others, Mamma lessons help you find the positive. There is much to learn from these strong and

inspiring women." —SingleMom.com "A look into the heart and soul of Annette Bridges. It could be anyone's story, but it couldn't be told any better." —Bob Belcher, Managing Editor, Corsicana Daily Sun "For anyone who has ever had a mother (and you know who you are), synthesizing that experience can leave many of us speechless. It is 'good news' that Annette Bridges is at no loss for words. She liberally shares her mom's gospel in deep drafts of down-to-earth good sense and faith, liberally laced with Southern humor." —Susan J. Cobb, author of Virgin Territory: How I Found My Inner Guadalupe "Irresistibly heartfelt. Perfect for all mothers and daughters, past, present and future!" —Jennifer Bridges, author's daughter and Ph.D. student "I have been hearing stories about Nellie, Annette's Mamma for the last 25 years. Annette makes you feel like you are sitting down with her in her ranch house or on that beach she talks about going to while she shares her Mamma with you from her perspective, with the insights she has gained over her lifetime. I hope you enjoy getting to know Nellie and Annette, 2 Georgia peaches transplanted to Texas. I love the way Annette brings the Bible into her daily life and shares it with us so that we can feel the love of God that is so present today in her life and illustrates how the Bible can show us how to go in ours. Way to go Girlfriend... you finally did it! You wrote a book and it's a winner! I can't wait to share this with my family and friends!" —Kathy Glover, friend to both Annette and her mamma

With the immediacy of today's NASDAQ close and the timeless power of a Greek tragedy, The Quants is at once a masterpiece of explanatory journalism, a gripping tale of ambition and hubris, and an ominous warning about Wall Street's future. In March of 2006, four of the world's richest men sipped champagne in an opulent New York hotel. They were preparing to compete in a poker tournament with million-dollar stakes, but those numbers meant nothing to them. They were accustomed to risking billions. On that night, these four men and their cohorts were the new kings of Wall Street. Muller, Griffin, Asness, and Weinstein were among the best

and brightest of a new breed, the quants. Over the prior twenty years, this species of math whiz--technocrats who make billions not with gut calls or fundamental analysis but with formulas and high-speed computers--had usurped the testosterone-fueled, kill-or-be-killed risk-takers who 'd long been the alpha males the world 's largest casino. The quants helped create a digitized money-trading machine that could shift billions around the globe with the click of a mouse. Few realized, though, that in creating this unprecedented machine, men like Muller, Griffin, Asness and Weinstein had sowed the seeds for history 's greatest financial disaster. Drawing on unprecedented access to these four number-crunching titans, *The Quants* tells the inside story of what they thought and felt in the days and weeks when they helplessly watched much of their net worth vaporize--and wondered just how their mind-bending formulas and genius-level IQ 's had led them so wrong, so fast.

We are facing a future of unbounded complexity. Whether that complexity is harnessed to build a world that is safe, pleasant, humane and profitable, or whether it causes us to careen off a cliff into an abyss of mind-numbing junk is an open question. The challenges and opportunities--technical, business, and human--that this technological sea change will bring are without precedent. Entire industries will be born and others will be laid to ruin as our society navigates this journey. There are already many more computing devices in the world than there are people. In a few more years, their number will climb into the trillions. We put microprocessors into nearly every significant thing that we manufacture, and the cost of routine computing and storage is rapidly becoming negligible. We have literally permeated our world with computation. But more significant than mere numbers is the fact we are quickly figuring out how to make those processors communicate with each other, and with us. We are about to be faced, not with a trillion isolated devices, but with a trillion-node network: a network whose scale and complexity will dwarf that of today's Internet. And, unlike the Internet, this will be a network not of computation that we use, but of computation that we live in. Written by the leaders of one of America's leading pervasive computing design firms, this book gives a no-holds-barred insiders' account of both the promise and the risks of the age of Trillions. It is also a cautionary tale of the head-in-the-sand attitude with which many of today's thought-leaders are at present approaching these issues. Trillions is a field guide to the future--designed to help businesses and their customers prepare to prosper, in the information.

Here's what you'll learn in this book: Ch 1 How social media can hurt your kid's future Ch 2 Common social media mistakes made Ch 3 What social media posts and strategies impress colleges Ch 4 What social media posts and strategies impress future employers Ch 5 Social networks that help you shine online Ch 6 How and when to privatize your image Ch 7 How

to talk to your kids Ch 8 How to make a plan together Ch 9 Case studies from successful students making a difference Over the past several years, I have had the great opportunity to work with some of the world's best brands. My staff and I developed and implemented techniques to help these companies shine online. And they have! By employing a few social media strategies, these great companies are finding the customers they want and deserve. It quickly came to my attention that my techniques would be valuable to families who are preparing their kids for college. Many kids have no idea how their digital footprint might be viewed by others and how others' perceptions can hold them back. During a 2013 Kaplan telephone questionnaire, 31% of college admissions officers said that they did visit applicants Facebook and other social media pages to gain more information on the student. 30% said that they had encountered information on social media that had a negative influence on an applicant's chance of being accepted. This goes to show that anything we put online, no matter how long ago, can be brought up on the first page of Google results and we need to be vigilant on what we allow others to see.¹ In this book, you will receive the same strategies I've used to help many successful companies, but tailored to students and future leaders, to help them impress colleges and future employers. As I've traveled the country for the past year and spoken to over 20,000 students, the feedback has been clear: these methods work, helping kids convey their best selves online. These methods employed keep their online images and communications Light, Bright and Polite(r), which allows colleges and employers find the best people to represent their campus upon graduation. Your kid can be among them. It's a competitive market out there, so let's not be disqualified from something to which you're aspiring without ever having a real chance at interviewing for the opportunity! It is never too early to start planning ahead. Your kids may not be thinking about it, but certainly you understand from experience that what you do now can have lasting effects. At the very least, what you do now lays the foundation for the habits that you will have years from now. Even if your children are not on social media yet, their reputation online starts as soon as their friends are online and posting photos of them, tagging them. So, there's a lot to consider! Since parents have limited time, this book isn't designed to teach everything about social media. I'm not here to give you a list of 100 things not to do on social media. Instead, my goal is to have students and parents skim through this book and be able to pick up one or

two helpful tips that can make all the difference. What accomplishments does your kid want to have in the next five years? Getting into college Full ride scholarship Varsity sports team Study abroad opportunity Leadership award Community service Getting into a prestigious private high school Getting the perfect internship that launches their career If any of these apply, then you need to pay attention to all of the messages that your child sends out on social media. There's a good chance that 50% of their tweets might not be helping them to reach their goals. They need to be vigilant. Josh Ochs @JoshOchs"
