"Warning: Your career might be in danger of going off the rails. You probably have blind spots that are leaving you closer to the edge than you realize. Fortunately, Carter Cast has the solution. In this smart, engaging book he shows you how to avoid career derailment by becoming more self-aware, more agile, and more effective. This is the book you wish you had twenty years ago, which is why you should read it now." -- Daniel H. Pink, New York Times bestselling author of *Drive* and *To Sell Is Human* The Right -- and Wrong -- Stuff is a candid, unvarnished guide to the bumpy road to success. The shocking truth is that 98 percent of us have at least one career-derailment risk factor, and half to two-thirds actually go off the rails. And the reason why people get fired, demoted, or plateau is because they let the wrong stuff act out, not because they lack talent, energy, experience, or credentials. Carter Cast himself had all the right stuff for a brilliant career, when he was called into his boss's office and berated for being obstinate, resistant, and insubordinate. That defining moment led to a years-long effort to understand why he came so close to getting fired, and what it takes to build a successful career. His wide range of experiences as a rising, falling, and then rising star again at PepsiCo, an entrepreneur, the CEO of Walmart.com, and now a professor and venture capitalist enables him to identify the five archetypes found in every workplace. You'll recognize people you work with (maybe even yourself) in Captain Fantastic, the Solo Flyer, Version 1.0, the One-Trick Pony, and the Whirling Dervish, and, thanks to Cast's insights, they won't be able to trip up your future.

How organizations can anticipate threats, spot opportunities, and act faster when the time is right; with rich examples including Adobe, MasterCard, and Amazon. When turbulence is the new normal, an organization's survival depends on vigilant leadership that can anticipate threats, spot opportunities, and act quickly when the time is right. In *See Sooner, Act Faster*, strategy experts George Day and Paul Schoemaker offer tools for thriving when digital advances intensify turbulence. Vigilant firms have greater foresight than their rivals, while vulnerable firms often miss early signals of external threats and organizational challenges. Charles Schwab, for example, was early to see and act on the promise of "robo-advisors"; Honeywell, on the other hand, stumbled when Nest Labs came out first with a "smart" thermostat. Day and Schoemaker show leaders how to assess their vigilance capabilities and cultivate insight and foresight throughout their organizations. They draw on a range of cases, including Adobe and Intuit's move to the cloud, Shell's investment in clean energy, and MasterCard's early recognition of digital challenges. Day and Schoemaker describe how to allocate the scarce resource of attention, how to detect weak signals and separate them from background noise, and how to respond strategically before competitors do. The challenge is not just to act faster but to act wisely, and the authors suggest ways to create dynamic portfolios of options. Finally, they offer an action agenda, with tips for fostering vigilance and agility throughout an organization. The rewards are stronger market positions, higher profits and growth, more motivated employees, and organization longevity.
