A daring literary masterpiece and winner of the National Book Award. In this magnificent work of fiction, acclaimed author William T. Vollmann turns his trenchant eye on the authoritarian cultures of Germany and the USSR in the twentieth century to render a mesmerizing perspective on human experience during wartime. Through interwoven narratives that paint a composite portrait of these two battling leviathans and the monstrous age they defined, Europe Central captures a chorus of voices both real and fictional—a young German who joins the SS to fight its crimes, two generals who collaborate with the enemy for different reasons, the Soviet composer Dmitri Shostakovich and the Stalinist assaults upon his work and life.

When a Jewish classmate is attacked by bullies, fifteen-year-old Nico just watches - earning him a week's suspension and a typed, yellowing manuscript from his frail Nonno Paolo. A history lesson, his grandfather says, and a secret he must keep from his father. Nico is transported back to the Venice of 1943, an occupied city seething under the Nazis, and to the defining moment of his grandfather's life: when Paolo's support for a murdered Jewish woman brings him into the sights of the city's underground resistance. Hooked and unsettled, Nico can't stop reading - but he soon wonders if he ever knew his beloved grandfather at all.

Born August 16, 1956, in Danville, Illinois.... forty miles due east of Champaign - Urbana, site of the U. of I. (home of H.A.L.). In school, during my formative years, I pulled myself up from having a report card like an alphabet to graduating #20 out of a graduating class of 780, plus 50 other students who failed grade 12. Still not good enough for the U. of I., I enrolled at Eastern Illinois University in Charleston, Illinois as an Art Studio Major and an English Minor. Several jobs later (including a year as an Assistant Park Ranger at Kickapoo State Park during my Senior year of High School and a two year stint full time as an architectural draftsman at I.B.C. Homes) I graduated with a B.A. in 1981 with a failed marriage disintegrating on me and the worst job market since 1929. I began writing novels in 1977, and have been doing it, on and off, ever since. In 1983 I began on a prolific writing spurt that is still going strong.... resulting in several million words worth of manuscripts. I write primarily science fiction and fantasy genre material.

Gun Trader's Guide, Forty-First Edition Canongate Books

While the PP and PPK were intended for police work, the Walther P 38 was produced for the Germany military; all three pistols have garnered a formidable international reputation since the 1930s. The innovative Walther PP (Polizeipistole), a double-action semi-automatic pistol intended for the law-enforcement market, became available in 1929 and went on to arm the police of several European countries in the 1930s. Its smaller cousin the PPK, more readily concealed for undercover work but with reduced magazine capacity, was produced from 1931. Intended to replace the P 08 Luger, the Walther P 38 was issued from 1940 and equipped the armed forces of Germany and other countries during and after World War II, but never entirely replaced the Luger in German service. All three pistols went on to have lengthy and varied service across the world after 1945. Both the PP and the PPK remain in production today, while the P 38 re-emerged as the P1 and equipped West German forces from 1963 until 2004, when it was replaced by the P8. In this study, noted authority John Walter assesses the origins, development, use and legacy of these three high-profile semi-automatic pistols, alongside other Walther variants, such as the tiny .25 ACP Modell 9.

Patented in 1898 and produced from 1900, Georg Luger's iconic semi-automatic pistol became synonymous with Germany's armed forces throughout both world wars. Initially chambered for the 7.65 x 21mm round, from 1902 the Luger was designed for DWM's 9 x 19mm round, which even today remains the most popular military handgun cartridge. It was adopted by the Imperial German Navy in 1904, followed by the German Army in 1908, receiving the name Pistole 08. Despite being supplanted by the Walther P38, the Luger remained in widespread service with all arms of Nazi Germany's armed forces throughout World War II, and even equipped East Germany's Volkspolizei in the years after 1945. Featuring full-colour artwork, expert analysis and archive and present-day photographs, this engaging study tells the story of the Luger, the distinctive and deadly semi-automatic pistol that has come to symbolize Germany's armed forces in the 20th century.

Adopted by the German Wehrmacht at the end of 1939, more than 1.2 million P.38s were manufactured up to 1945. Designed by the Walther company from its civilian model PP, it was the first double-action military pistol. Its robustness and simplicity of manufacture made it a worthy successor to the legendary P.08 Luger in the Second World War. This illustrated book presents the design, manufacturing, and development of the various models, from initial acceptance by the German military in 1938 through their production and use from 1939 to 1945. Details include close-up views of markings and other details, as well as a visual breakdown of the weapon. Accessories such as magazines, ammunition, holsters, and cleaning kits are featured throughout the book, as are rarely seen combat-related uniform and equipment items.

Casemate

A comprehensive illustrated history of snipers, their training and their battlefield role in all theaters in World War II. Thousands of volumes have been published about World War II but relatively little attention has been given to the sniper. Drawing from memoirs, government documents and interviews, Snipers of World War II incorporates eyewitness accounts to weave a comprehensive narrative of snipers in

World War II. While certain common traits were shared among belligerents, each had its unique methodology for selecting and training snipers and, as casualties were high, their replacements. Drawn from hunters, competitive shooters, natural marksmen, outdoorsmen, city dwellers, farmers and veteran soldiers, they fought to assert local battlefield dominance and instill among their enemy a paralyzing fear. Sometimes admired and other times reviled by their own comrades because of the retaliation they drew, they were always too few in number. Their battlefield role, their victories and their defeats are retold here from neglected or forgotten sources. The scope of Snipers of World War II is extensive with three chapters each on the major theaters of the war including Western Europe, Eastern Europe and the Pacific. This is supported by a lengthy chapter on the sniper rifles used by the snipers and their equipment. Finally, the last chapter discusses many overlooked or ignored subjects not raised by other researchers and provides much food for thought. The bibliography is a valuable resource to future researchers and writers. For the long-range rifle shooter and today's snipers, the lessons of the past are as relevant today as they were when learned and practiced in World War II.
