Designed by a motorcycle racer turned small-arms engineer, George Patchett, the submachine gun that eventually became known as the Sterling was developed during World War II. Some suggest it first saw action during Operation Infatuate with No. 4 Commando, before becoming fully adopted by the British Army in 1953 as the Sterling Machine Carbine (L2A1). It was centre stage for many of Britain's post-colonial conflicts from Malaya to Kenya and from Yemen to Northern Ireland. The silenced L34A1 Sterling-Patchett entered service in 1966 and first saw action deep in the jungles of Vietnam in the hands of the elite special forces of Australia, New Zealand and the United States during prisoner snatches and reconnaissance patrols. Employing first-hand accounts and painstaking technical analysis, this engaging account features carefully selected archive photography and specially commissioned colour

artwork depicting the submachine gun that armed British and other forces for nearly 60 years.

Prepare-se para conhecer Magritte, um sujeito que possui o emprego mais estranho do mundo. Ele trabalha numa biblioteca subterrânea, onde os livros são copiados a mão e não podem ser consultados por ninguém. Quanto mais fundo os livros são armazenados, mais perigo eles representam para a humanidade. O último andar é reservado a um único livro, conhecido simplesmente como O Livro, acessado apenas pelo chefe dos bibliotecários. Ninguém sabe do que trata o texto, mas todos

acreditam que sua divulgação o poderia destruir o mundo como o conhecemos. Quando uma garota fortemente treinada em artes marciais consegue invadir a biblioteca e roubar um dos volumes, a tranquilidade de Magritte chega ao fim. Acusado de ser cúmplice da invasora, ele tem apenas 24 horas para descobrir quem está por trás da coisa — mais importante — quem é o verdadeiro traidor entre os bibliotecários. Mas por que a garota se contentou em roubar um livro intermediário quando poderia ter posto as mãos no próprio Livro com mais facilidade? Afinal, o que são os livros da biblioteca secreta? Quem os escreveu? Por que são copiados a mão em plena era digital? É o que o leitor descobrirá aos poucos, junto à frenética investigação de Magritte.

In addition the pistol has seen service with famous law enforcement agencies such as the Shanghai Municipal Police, LAPD Swat and Texas Rangers. Nearly a century after its introduction, the M1911 pistol remains a popular design and is now produced by virtually every major firearms manufacturer doing business in the USA.

### The Gospel & the Zodiac Simon and Schuster

While the PP and PPK were intended for police work, the Walther P 38 was produced for the Germany military; all three pistols have garnered a formidable international reputation since the 1930s. The innovative Walther PP (Polizeipistole), a double-action semi-automatic pistol intended for the law-enforcement market, became available in 1929 and went on to arm the police of several European countries in the 1930s. Its smaller cousin the PPK, more readily concealed for undercover work but with reduced magazine capacity, was produced from 1931. Intended to replace the P 08 Luger, the Walther P 38 was issued from 1940 and equipped the armed forces of Germany and other countries during and after World War II, but never entirely replaced the Luger in German service. All

three pistols went on to have lengthy and varied service across the world after 1945. Both the PP and the PPK remain in production today, while the P 38 re-emerged as the P1 and equipped West German forces from 1963 until 2004, when it was replaced by the P8. In this study, noted authority John Walter assesses the origins, development, use and legacy of these three high-profile semi-automatic pistols, alongside other Walther variants, such as the tiny .25 ACP Modell 9.

L'arme n'est qu'un objet porteur de nos craintes, de nos désirs et de nos instincts. for guns of less power, especially CO2-powered guns. Several airgun shooters are not required to go through the traditional buying procedures of high-powered pistols and rifles, such as background checks and waiting periods. Plus, companies such as Colt, Smith & Wesson, and Walther manufacture high quality CO2 products that are visually indistinguishable from their traditional firearms. In this new guide to CO2-powered pistols and rifles, James E. House offers a comprehensive history of CO2 guns, dating back to the 1930s, and a discussion of propulsion, pellets, and sights. Beginning shooters are introduced to the market with a complete analysis on performance and accuracy of currently available products. Airgun enthusiasts are reunited with CO2 classics no longer being manufactured. This book also offers additional sections on target shooting, games, and varmints. “ Over half a century has passed since I cut my teeth on an old .36 Navy Colt. For 40 years I have almost never been out of easy reach of a good sixgun. Thirty years I spent in the saddle, packing, punching cows and breaking saddle brones. The sixgun was worn just as regularly as my pants and many times was much more important to my existence. It pulled me out of several tight scrapes with wild horses, wilder

cattle and some big game. Though I have witnessed several gun fights, have had guns pulled on me and have been shot at several times, I have never had to use my gun on a man. Several times it was touch-and-go and perhaps only the current knowledge that I was both fast and accurate with a sixgun saved me from being embroiled. Though I do not recommend a sixgun for big game, thirty head of big game have fallen to mine, including elk, bear, deer, cougar, mountain goat and javelina. I have also trailed up a great many big game animals of various species that were wounded by sportsmen and then I finished them off. No record was kept of these or the many coyotes, bobcats and lesser game, or the livestock I have had to kill. ” This classic includes the following chapters: Introduction I.
