"This is a detailed yet practical guide to planning, developing, and evaluating nursing curricula and educational programs. It provides a comprehensive and critical perspective on the totality of variables impacting curricular decisions...

This book provides readers with a comprehensive overview of curriculum development, redesign, and evaluation processes and exposes them to the variables impacting curricular decisions... 92 - 4 Stars."Kathleen A. Poindexter, PhD, MSN, RN, CNE, Doody's Book Reviews New Edition of The Leading Nursing Text on Curriculum Development and

Evaluation! This third edition of the leading nursing text on curriculum development and evaluation continues to address relevant NLN and AACN core competencies for curricula in all undergraduate and graduate nursing programs. Written for graduate students and faculty, this new edition responds to the many changes that have occurred in nursing and education since the second edition was published. These include the continued shortage of nursing faculty and the projected additional losses of experienced faculty due to impending retirements, as well as the implementation of the Affordable Care Act and Consensus Model for Advanced Practice Nursing. This third edition covers curriculum development and evaluation in detail and provides the knowledge and practical applications needed by new and experienced faculty to confidently embrace the academic role. With an emphasis on interdisciplinary collaboration throughout, the text focuses on the growth of simulation, guidance for new faculty transitioning from a clinical to academic role, developing curricula for practice and academic settings, program evaluation, accreditation activities, and recommendation for research in nursing education. Also addressed is the explosion of DNP programs across the country and its effect on practice and education, as well as the controversy surrounding the use of simulation. Chapter objectives, discussion

points, learning activities, references and a glossary enhance learning and retention of material. The text is a valuable resource for CNE certification review. New to the Third Edition: New chapter: Role of Faculty in Curriculum Development and Evaluation  
New chapter: Financial Support and Budget Management for Curriculum Development  
New chapter: Research and Evidence-Based Practice in Nursing Education  
Emphasis on guiding the assimilation of new instructors into faculty roles of program and curriculum development, instructional design, and student evaluation  
New content on curriculum evaluation, financial support, and budget management  
Strong focus on Interdisciplinary Educational Collaboration throughout  
Addresses the need for preparing more faculty to educate thousands of new nurses as defined by the IOM Report, the Affordable Care Act, and the Consensus Model  
Instructor Materials including: PowerPoint slides, syllabi, teaching/learning strategies, learning activities and associated rubrics for grading.

Used as both a core textbook in PT programs and as a clinical reference, *Physical Therapy for Children*, 4th Edition, provides the essential information needed by PTs, both student and professional, when working with children. Like the previous bestselling editions, the 4th edition follows the practice pattern categories of the *Guide to Physical Therapist Practice* and uses the ICF model of the disabling process as it presents up-to-date evidence-based coverage of treatment. In this latest edition, Suzann Campbell DeLapp, Robert J. Palisano, and Margo N. Orlin have added more case studies and video clips, additional chapters and Medline-linked references online, and Evidence to Practice boxes to make it easy to find

and remember important information. Provides comprehensive foundational knowledge in decision making, screening, development, motor control, and motor learning, the impairments of body function and structure, and the PT management of pediatric disorders. Reflects a family-centered care model throughout to help you understand how to involve children and their caregivers in developing and implementing intervention plans. Emphasizes an evidence-based approach that incorporates the latest research for the best outcomes. Follows the practice pattern guidelines of the *Guide to Physical Therapist Practice*, 2nd Edition which sets the standard for physical therapy practice. Features the International Classification of Function, Disability, and Health (ICF) of the World Health Organization (WHO) as the model for the disabling process, emphasizing activity rather than functional limitations and participation rather than disability in keeping with the book's focus on prevention of disability. Provides extensive case studies that show the practical application of material covered in the text and are often accompanied by online video clips illustrating the condition and its management. Makes it easy to access key information with plenty of tables and boxes that organize and summarize important points. Clearly demonstrates important concepts and clinical conditions you'll encounter in practice with over 800 illustrations. Takes learning to a deeper level with additional resources on the Evolve website featuring: Over 40 video clips that correspond to case studies and demonstrate conditions found in each chapter  
Helpful resources, including web links  
Questions and exercises you'll find helpful when preparing for the pediatric specialist certification exam

The goal to improve the resilience of social systems – communities and their economies – is increasingly adopted by decision makers. This unique and comprehensive Handbook focuses on the interdependencies of these social systems and the technologies that support them. Special attention is given to the ways in which resilience is conceptualized by different

### Developmental-behavioral Pediatrics

The third edition of the Gross Motor

Function Measure (GMFM-66 &

GMFM-88) User ' s Manual has

retained the information contained in

the original 2002 and 2013

publications which included the

conceptual background to the

development of the GMFM, and the

administration and scoring guidelines

for people to be able to administer this

clinical and research assessment tool

appropriately. This includes

information on the development and

validation of two abbreviated methods

of estimating GMFM-66 scores using

the GMFM-66- Item sets (GMFM-66-

IS) and the GMFM-66- B&C (Basal &

Ceiling) and a chapter providing a

longitudinal case illustration of how the

measure and the short forms of the

GMFM can be applied and interpreted

in clinical practice. The new edition

includes information and an Appendix

on the updated version of the Gross

Motor Ability Estimator scoring

program (GMAE-3), which is available

through the GMFM App+ (see the

CanChild website at (<https://www.canchild.ca/en/shop/38-the-gross-motor-function-measure-app>)).
