First used in combat during the Punitive Expedition into Mexico and then extensively during the world

wars, the Colt Government Model (1911) pistol remained the standard issue handgun in the US armed forces for nearly 80 years and has continued in service with some units to this day. In fact, the M1911 has seen a resurgence amongst US Special Operations units as US Marine MARSOC and MEUSOC

personnel are issued current generation 1911-type pistols. In addition the pistol has seen service with famous law enforcement agencies such as the Shanghai Municipal Police, LAPD Swat and Texas Rangers. Nearly a century after its introduction, the M1911 pistol remains a popular design and is now produced by

virtually every major firearms manufacturer doing business in the USA.

The Modern Day Gunslinger

Erik Lawrence

The M1911 is a single-action, semi-automatic pistol chambered for the .45 ACP cartridge, and served as the standard-issue sidearm for the United States military from 1911 to 1985. It was widely used from the First World War all the way up to the Vietnam War. Modern M1911 variants are still in use by some units within the

U.S. Army Special Forces, the U.S. Navy and U.S. Marine Corps. The Automatic Pistol, Caliber .45, M1911 was designed by John Browning, and is the best known of his designs to use the short recoil principle in its basic design. The design was widely copied, and this operating system rose to become the most renowned type of the twentieth century. In total, the United States purchased around 2.7 million M1911 and M1911A1 pistols in military contracts during its service life. Created in 1940,

this field manual reveals a great deal about the M1911's design and capabilities. Intended as a manual for those charged with operation, it details many strategies for achieving outstanding marksmanship. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text. The reasons for handloading ammunition may be summed up as (a) permitting one to obtain the greatest possible accuracy from his rifle, pistol or revolver and (b) providing one with an abundance of ammunition at small expense. If you have a firearm that you do not shoot as much as you would like to because of the expense, it will pay you to reload your fired cartridge cases. This document summarizes the
main findings and implications of
the first empirical study
investigating the scale and scope
of arms trafficking on the dark
web, which was conducted by
RAND Europe and the
University of Manchester from
September 2016 to July 2017.

There is an ongoing debate over
the extent to which online black
markets on the so-called "dark
web," the part of the Internet not
searchable by traditional search
engines and hidden behind
anonymity software, facilitate
arms trafficking. Details have
emerged in the media following
the Munich shooting in 2016
linking the weapons used by the
attacker to vendors on dark web
marketplaces (also known as
cryptomarkets). Some media
reports have also linked the Paris
terrorist attacks in November
2015 to these platforms. While
these reports appear to have
raised concerns about the role of
such dark web markets in arms
trade, evidence on the subject is

largely anecdotal, based on
secondary data as reported after
events such as terrorist attacks or
successful law enforcement
operations.
