We love our pets. Dogs have always been man's best friend. Our loyal companions, our protectors. They have served us in our homes, in wartime, and the blind. They love us unconditionally. They would lay down their life for us. The domestic dog is a member of the genus *Canis* (canines) that forms part of the wolf-like canids. New research seems to show that the dog's high sociability may be affected by the same genes as in humans. Dogs perform many roles for people, such as hunting, herding, pulling loads, protection, assisting police and military, companionship and, more recently, aiding handicapped individuals. This influence on human society has given them the sobriquet "man's best friend." In this book, you will read about famous dogs, different type of dog breeds, what to feed your dog, how to train your new puppy, dog names, best animal hospitals in the U.S.A., what not to feed your dog, where to get a service dog, signs that your dog may be sick and much more. If you love dogs, this book was written for you!

While the PP and PPK were intended for police work, the Walther P 38 was produced for the Germany military; all three pistols have garnered a formidable international reputation since the 1930s. The innovative Walther PP (Polizeipistole), a double-action semi-automatic pistol intended for the law-enforcement market, became available in 1929 and went on to arm the police of several European countries in the 1930s. Its smaller cousin the PPK, more readily concealed for undercover work but with reduced magazine capacity, was produced from 1931. Intended to replace the P 08 Luger, the Walther P 38 was issued from 1940 and equipped the armed forces of Germany and other countries during and after World War II, but never entirely replaced the Luger in German service. All three pistols went on to have lengthy and varied service across the world after 1945.

Both the PP and the PPK remain in production today, while the P 38 re-emerged as the P1 and equipped West German forces from 1963 until 2004, when it was replaced by the P8. In this study, noted authority John Walter assesses the origins, development, use and legacy of these three high-profile semi-automatic pistols, alongside other Walther variants, such as the tiny .25 ACP Modell 9.

Broccoli's Eon Productions has navigated the ups and downs of the volatile British film industry, enduring both critical wrath and acclaim in equal measure for its now legendary James Bond series. Latterly, this family-run business has been crowned with box office gold and recognised by motion picture academies around the world. However, it has not always been plain sailing. Changing financial regimes forced 007 to relocate to France and Mexico; changing fashions and politics led to box office disappointments; and changing studio regimes and business disputes all but killed the franchise. And the rise of competing action heroes has constantly questioned Bond's place in popular culture. But against all odds the filmmakers continue to wring new life from the series, and 2012's *Skyfall* saw both huge critical and commercial success, crowning 007 as the undisputed king of the action genre. Now, with Daniel Craig back for a fifth turn as Ian Fleming's spy in October 2019, Bond's reign shows no signs of diminishing. Some Kind of Hero recounts this remarkable story, from its origins in the early fifties right through to the present day, and draws on over a hundred unpublished interviews with the cast and crew of this iconic series.
