Geographies of Asylum in Europe and the Role of European Localities CRC Press
In the 1990s, the New Orleans murder rate exploded. In 1996, 350 people were killed—the highest

number in the city ' s history, and the highest rate in the nation. In response to this crisis, gallery owner and artist Jonathan Ferrara and artist Brian Borrello, launched a powerful project: Guns in the Hands of Artists. Over sixty artists, including painters, glass artists, sculptors, photographers, and poets, used decommissioned guns taken off the city streets via a gun buyback program to express a thought, make a statement, open a discussion, and to stimulate thinking about guns and gun violence in America. As gun violence continues to devastate the nation on a daily basis, Guns in the Hands of Artists reemerged in 2012 as a community-based social activist art

project that has since traveled to six cities across the US. Using art as a mirror for life and interweaving the works of thirty diverse artists with the voices of seventeen national thought leaders, this book is an important outgrowth of the exhibition and an extension of its efforts to employ art as a vehicle for dialogue, as a call to action, and—ultimately—as an agent of change. After a mission of vengeance in Helsinki, James Bond returns to London and assumes the workload of a fallen 00 Section agent. His new mission takes him to Berlin, presumably to break up an agile drug-trafficking operation. But

Bond has no idea of the forces gathered in secret against him, the full scope of an operation that's much scarier and more lethal than he could possibly imagine. Berlin is about to catch fire... and James Bond is trapped inside. Dynamite Entertainment proudly presents VARGR, the debut storyline in the all-new James Bond comic book series, as crafted by masterful writer Warren Ellis (Transmetropolitan, The

Authority) and artist Jason Masters (Batman Incorporated, Guardians of the Galaxy). **M1911, M1911A1, Markings, Variants, Ammunition, Accessories** Inkshares Written by the nation's foremost authority on gunshot wounds and forensic techniques as they relate to firearm injuries, **Gunshot Wounds: Practical Aspects of**

Firearms, Ballistics, and Forensic Techniques, Second Edition provides critical information on gunshot wounds and the weapons and ammunition used to inflict them. The book describes practical aspects of ballistics, wound ballistics, and the classification of various wounds

caused by handguns, bang guns, rifles, and shotguns. The final chapters explain autopsy technique and procedure and laboratory analysis relating to weapons and gunshot evidence. *Guns Illustrated*, 2001 Springer Nature "Dr. No" by Ian Fleming. Published by Good Press. Good Press publishes a

reception on
European,
national,
regional and
local level.

It also analyses perceptions and discourses on asylum and refugees, their involvement and the consequences for policy development. Furthermore, it examines practices and policy developments in the field of refugee reception and integration. The volume shows and explains a variety of refugee reception and integration strategies and practices as specific outcome of multilevel governance

processes in Europe. By addressing and contextualizing those multiple experiences of asylum seeker reception, the book is a valuable contribution to the literature on migration and integration, societal development and political culture in Europe. *The Gun Digest Book of the 1911* Krause Publications Simone was raised as a dancer, but she hates performing. Hannah loves nothing more

than dancing, but her adoptive parents think it should only be a hobby. When the two girls meet at camp, they discover they're identical twins. Choreographing a plan to switch places, they realize fooling their friends and family is harder than they expected. **The Makarov Pistol** Penguin The Makarov Pistol entered

service as the primary service pistol in the armed forces and security services of the Soviet Union in 1951. It continues to serve in the forces of the Russian Federation, and the former Soviet Union, and of nations around the world. It has been estimated that some 5 million Makarov

pistols had been produced in the Soviet Union and Russian Federation alone up 2002, and production continues for military, police and civil markets in Russia to this day. Additionally, the Makarov Pistol was also produced under license in East Germany,

Bulgaria and China. The Makarov Pistol has served around the world in conflicts and security duties in all climates and terrains, and can claim the distinction of being the first firearm to be carried into space. Despite the large numbers and the widespread use of the Makarov

Pistol, it remained a rare and little known firearm among western collectors until the end of the Cold War. In the 1990s however, large numbers of Makarov Pistols, accessories and its previously unobtainable 9x18mm cartridge were exported to the west with the end of the Cold War and the collapse of the Eastern Bloc, opening up a new field of firearms collecting. While collectors have been documenting and recording the many aspects of the Makarov Pistol over the last 25 years, this information has never been systematically consolidated into a handy reference book - until now. This book documents the Makarov Pistols produced by the Soviet Union and Russian Federation, and the Pistole M, the version produced in East Germany. This is the first volume of a two volume series documenting the history, features, manufacturing variations and markings of the
