First published over thirty years ago, War in European History is a brilliantly written survey of the changing ways

that war has been waged in Europe, from the Norse invasions to the present day. Far more than a simple military history, the book serves as a succinct and enlightening overview of the development of European society as a whole over the last millennium. From the Norsemen and the world of the medieval knights, through to the industrialized mass warfare of the twentieth century, Michael Howard illuminates the way in which warfare has shaped the history of the Continent, its effect on social and political institutions, and the ways in which technological and social change have in turn shaped the way in which wars are fought. This new edition includes a fully updated further reading and a new final chapter bringing the story into the twenty-first century, including the invasion of Iraq and the so-called 'War against Terror'. The American Yawp John Wiley & Sons The book covers the most important historical events of the twentieth century and the new millennium, from a very special standpoint, that one of the judgments of the European Court of Human Rights. In this respect, we have both a reading of history and a brief legal analysis, almost a “divertissement” that combines two different areas of the humanities.

U.S. History by OpenStax (Print Version, Paperback, B&W, Volume 1 & 2) Pearson College Division Merriam Press Military Monograph 82. Second Edition (January 2012). The first and only history of the Royal Canadian Air Force's little-known "Air Observation Post" squadrons: 664, 665, and 666 (AOP) Squadrons, from their creation in 1944 during World War II. Includes coverage of the Auster aircraft they flew, operational training, and their combat history. With the end of the war, these squadrons were disbanded. An AOP-trained pilot holding the rank of Major in the Royal Regiment of Canadian Artillery-not airforce personnel-commanded each of the three RCAF AOP squadrons. Every pilot assigned to duty in the three squadrons-664 (AOP), 665 (AOP) and 666 (AOP)-was a Canadian artillery officer (or, in a few

instances, a British artillery officer) whose previous employment had been in Field, Medium, or Light Anti-Aircraft regiments, serving as a Gun Position Officer (GPO) or Forward Observation Officer (FOO), tasked with laying and firing artillery guns in support of Canadian or Allied fighting units, most often for the Infantry. The author's father a member of 665 (AOP) Squadron. Pursuing information about Canada's AOP squadrons became an obsession while hunting for the day-to-day written records and flight logs and photographs of this obscure group of wartime flyers, virtually all of the aircrew having been seconded from His Majesty's Royal Regiment of Canadian Artillery, and all of its riggers, fitters and instrumentation mechanics having previously serviced Lancasters, Halifaxes, Hurricanes and Spitfires while wearing the blue of the Royal Canadian Air Force. In time, a rich harvest of evidence surfaced, and is now presented in this work.

A History of World Societies, Volume C: 1775 to the Present Oxford University Press, USA

What was the Cold War that shook world politics for the second half of the twentieth century? Standard narratives focus on Soviet-American rivalry as if the superpowers were the exclusive driving forces of the international system. Lorenz M. Lüthi offers a radically different account, restoring agency to regional powers in Asia, the Middle East and Europe and revealing how regional and national developments shaped the course of the global Cold War. Despite their elevated

position in 1945, the United States, Soviet Union and United Kingdom quickly realized that their political, economic, and military power had surprisingly tight limits given the challenges of decolonization, Asian-African internationalism, pan-Arabism, pan-Islamism, Arab – Israeli antagonism, and European economic developments. A series of Cold Wars ebbed and flowed as the three world regions underwent structural changes that weakened or even severed their links to the global ideological clash, leaving the superpower Cold War as the only major conflict that remained by the 1980s.
