Spirit of Underwater Encounters St. Louis, Mo. ; Toronto : Mosby Lifeline

Moving to Whidbey Island, surrounded by the Pacific Ocean, I met Monte Merserve and this is where the first chapter begins. Since then I still teach ARC Swim Lessons to others, and became a PADI Swim Instructor teaching scuba diving for fifteen years. Since then I've been Scuba Diving around the world and meeting new friends in the World of waters. In this book I share stories of these underwater encounters both exciting and exhilarating. I also provided photos of these events, including my dive of a lifetime adventure in Antarctica. ~ Virginia Huerlin Long Cross (PADI #3271) ~ Water Safety Instructor's Manual Lippincott Williams & Wilkins

Straightforward Statistics: Understanding the Tools of Research is a clear and direct introduction to statistics for the social, behavioral, and life sciences. Based on the author's extensive experience teaching undergraduate statistics, this book provides a narrative presentation of the core principles that provide the foundation for modern-day statistics. With step-by-step guidance on the nuts and bolts of computing these statistics, the book includes detailed tutorials how to use state-of-the-art software, SPSS, to compute the basic statistics employed in modern academic and applied research. Across 13 succinct chapters, this text presents statistics using a conceptual approach along with information on the relevance of the different tools in different contexts and summaries of current research examples. Students should find this book easy useful and engaging in its presentation while instructors should find it detailed, comprehensive, accessible, and helpful in complementing a basic course in statistics.

Recently, a student in a Maricopa County, Arizona area school district drowned during a physical education class, resulting in a heightened awareness of school aquatics safety guidelines. The goal of this study was to use Wenger's idea of nurturing a Community of Practice (CoP) with the existing physical education CoP at GFJRHs (school pseudonym), to examine the current curriculum and enhance the program and safety standards. The study duration was a five-week period; the participants were 7th grade males. This action research addressed the following questions: 1.) To what extent does the new swim curriculum increase students' (a) self-efficacy for swimming, (b) self-efficacy for water safety, (c) perception of swim skills, and (d) perception of water safety skills? 2.) How, and to what extent, do students value different observational learning techniques presented during the swim unit? 3.) To what extent does the new swim curriculum increase students' swimming capabilities? 4.) How does working as a Community of Practice influence implementing an enhanced swim curriculum? 5.) What challenges and improvements do

participants report during the enhanced curriculum? A triangulation mixed methods design was used to determine whether observational learning techniques and mini aquatics safety lessons incorporated into the curriculum improved students' swimming ability, self-efficacy, and safety knowledge. Pre- and post-test swim assessments, pre- and post-test surveys, focus group interviews and researcher journal observations provided data for the study. Both quantitative and qualitative data were collected to integrate the strengths of the varied forms of research. Cronbach's coefficient -a- was computed for the reliability of the survey and a multivariate repeated measures analysis of variance (ANOVA) was conducted to determine whether the new swim curriculum increased students' self-efficacy for swimming, self-efficacy for water safety, perception of swim skills, perception of water safety skills, and swimming capabilities. Results of this study indicated students' self-efficacy and perception of water safety skills increased, students' ability and perception of swimming skills increased, students valued all observational learning techniques, and teachers felt that functioning as a CoP was crucial to the process.

Just let me turn down that armadillo steak I'm cooking for dinner; then I'll be right with you. Such an easy recipe. You should try it. You just soak your 'dillo meat in a pint of bourbon in which you've been soaking a cup of cactus needles overnight. Keep the 'dillo meat soaking for about two weeks, until it starts to turn good and high. You'll know it's ready when you can get through it fairly easily with a hatchet. . . If you thought the essay was dead, think again. In the hands of Jon Peirce, a writer with a wicked imagination, strong social conscience, and a keen sense of the absurd, the time-honoured genre takes many different forms. The essays in this book range from short, rapier-like skewerings of political hypocrisy and injustice to a leisurely exploration of the metric system and its implications for writers. In between you will find many pieces that will make you laugh, a few that will make you cry, and some that will leave you shaking your head in wonderment. Enjoy...

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.
