Water Supply Crisis. The water crisis refers to a global situation where people in many areas lack access to sufficient water, clean water, or both. This section describes the global situation involving water shortages, also called water stress. In general, water stress is greatest in areas with very low precipitation (major deserts), large population density (e.g., India), or both.

This specialization is designed for engineers working in water supply companies, municipal assemblies, government ministries and consulting companies dealing with water supply. It is particularly geared to the needs of mid-career engineers who are dealing with: Assessment of groundwater, surface water and drinking water quality;

[Water Supply Engineering By S](#)

A branch of civil engineering concerned with the development of sources of supply, transmission, distribution, and treatment of water. The term is used most frequently in regard to municipal water works, but applies also to water systems for industry, irrigation, and other purposes. Water obtained from subsurface sources, such as sands and gravels and porous or fractured rocks, is called ground water.

The Water Supply Engineering (WSE) Section and the Water Supply Operations (WSO) Section are responsible for the programs associated with the public and private water supply systems of Iowa. Both sections are housed in the Iowa DNR's Water Quality Bureau. In addition, the sections are responsible for Iowa's water allocation and use program; environmental laboratory certification program; certification programs for water operators, wastewater operators, and well drillers; and the ... **Free download water supply engineering by sk garg - byskgarg ...**

The development of the City's first successful public water supply system was a major engineering undertaking. The system was constructed by almost 4,000 immigrants, who began work in 1837. It included the Old Croton Dam, which was built six miles above the junction of the Croton and Hudson Rivers.
