Peterson's
Peterson's Graduate
Programs in the
Humanities, Arts &
Social Sciences 2014
contains comprehensive
profiles of more than
11,000 graduate
programs in
disciplines such as,
applied arts & design,
area & cultural
studies, art & art
history, conflict
resolution &
mediation/peace
studies, criminology &
forensics, language &
literature, psychology
& counseling,
religious studies,
sociology,
anthropology,
archaeology and more.
Up-to-date data,
collected through
Peterson's Annual

Survey of Graduate and
Professional
Institutions, provides
valuable information on
degree offerings,
professional
accreditation, jointly
offered degrees, part-
time and
evening/weekend
programs,
postbaccalaureate
distance degrees,
faculty, students,
requirements, expenses,
financial support,
faculty research, and
unit head and
application contact
information. There are
helpful links to in-
depth descriptions
about a specific
graduate program or
department, faculty
members and their
research, and more.
There are also valuable
articles on financial
assistance, the
graduate admissions
process, advice for
international and
minority students, and
facts about
accreditation, with a
current list of

accrediting agencies.
Indigenous Storywork
Peterson's
Peterson's Graduate Programs in
Engineering & Applied Sciences,
Aerospace/Aeronautical
Engineering, Agricultural
Engineering & Bioengineering, and
Architectural Engineering contains
a wealth of information on colleges
and universities that offer graduate
work these exciting fields. The
institutions listed include those in
the United States and Canada, as
well as international institutions
that are accredited by U.S.
accrediting bodies. Up-to-date
information, collected through
Peterson's Annual Survey of
Graduate and Professional
Institutions, provides valuable
information on degree offerings,
professional accreditation, jointly
offered degrees, part-time and
evening/weekend programs,
postbaccalaureate distance degrees,
faculty, students, degree
requirements, entrance
requirements, expenses, financial
support, faculty research, and unit
head and application contact
information. Readers will find
helpful links to in-depth
descriptions that offer additional
detailed information about a
specific program or department,
faculty members and their
research, and much more. In

addition, there are valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Engineering-contracting
Peterson's

"This is an urban history of London during the pivotal years of the 1960s and 1970s, when the metropolis was transformed from an industrial city that the Victorians might have recognised to an embryonic modern 'world city.'

Previous work on London in these years has tended to focus upon the 1960s -in particular the 'Swinging London' phenomenon. Mary Quant, Carnaby Street and the King's Road, Chelsea, all appear in these pages, but it is argued that the 'swinging moment' of the mid-sixties was a passing symptom of a much broader transformation from an industrial to a service-based city, and it is that transformation which this book examines. London is too complex and diverse a city to be comprehended in a simple linear narrative; this book adopts instead an innovative approach to urban history, by which London life and London's transformation are examined through a number of case studies looking at specific themes and areas of the city. Consumerism and the 'experience economy', home ownership and gentrification,

deindustrialisation and deprivation, racial tension and unemployment, the attrition of public services and the steady loss of confidence in public agencies - national and local - emerge as overarching themes from the individual case studies in this book.

Their combined effect, it is argued, was to prepare the ground for the Britain that Margaret Thatcher is usually held to have created after 1979 - without Thatcher herself having anything to do it"--

How to Become a Straight-A Student Peterson's

Peterson's Graduate Programs in the Biological/Biomedical Sciences & Health-Related Medical Professions 2014 contains comprehensive profiles of nearly 6,800 graduate programs in disciplines such as, allied health, biological & biomedical sciences, biophysics, cell, molecular, & structural biology, microbiological sciences, neuroscience & neurobiology, nursing, pharmacy & pharmaceutical sciences, physiology, public health, and more. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate

distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. There are also valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Graduate Programs in the Humanities, Arts & Social Sciences 2014 (Grad 2) Vault Inc.

Peterson's Graduate Programs in Engineering & Applied Sciences 2015 contains comprehensive profiles of more than 3,850 graduate programs in all relevant disciplines-including aerospace/aeronautical engineering, agricultural engineering & bioengineering, chemical engineering, civil and environmental engineering, computer science and information technology, electrical and computer engineering, industrial engineering, telecommunications, and more. Two-page in-depth descriptions, written by featured institutions, offer complete details on a specific graduate program, school, or department as well as information on faculty research. Comprehensive

directories list programs in this volume, as well as others in the Peterson's graduate series.

Peterson's Graduate Programs in Biomedical Engineering & Biotechnology, Chemical Engineering, and Civil & Environmental Engineering 2011

Peterson's Peterson's Graduate Programs in the Biological Sciences 2012 contains a wealth of information on accredited institutions offering graduate degree programs in these fields. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty

members and their research, and more. There are also valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

The Iowa Engineer

Peterson's Indigenous oral narratives are an important source for, and component of, Coast Salish knowledge systems. Stories are not only to be recounted and passed down; they are also intended as tools for teaching. Jo-ann Archibald worked closely with Elders and storytellers, who shared both traditional and personal life-experience stories, in order to develop ways of bringing storytelling into educational contexts. Indigenous Storywork is the result of this research and it demonstrates how stories have the power to educate and heal the heart, mind, body, and spirit. It builds on the seven principles of respect, responsibility, reciprocity, reverence, holism, interrelatedness,

and synergy that form a framework for understanding the characteristics of stories, appreciating the process of storytelling, establishing a receptive learning context, and engaging in holistic meaning-making.

The Engineering Journal

Peterson's Peterson's Graduate Programs in Engineering & Applied Sciences 2012 contains a wealth of information on accredited institutions offering graduate degree programs in these fields. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program

or department, faculty members and their research, and more. There are also valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Graduate Programs in Engineering & Applied Sciences 2015 (Grad 5)

Peterson's

Established in 1871 on

the outskirts of London,

the Royal Indian

Engineering College at

Coopers Hill was arguably

the first engineering

school in Britain. For thirty-

five years the college

helped staff the

government institutions of

British India responsible

for the railways, irrigation

systems, telegraph

network, and forests.

Founded to meet the high

demand for engineers in

that country, it was closed

thirty-five years later

because its educational

innovations had been

surpassed by Britain's

universities – on both

occasions against the

wishes of the Government

of India. Imperial

Engineers offers a

complete history of the

Royal Indian Engineering

College. Drawing on the

diaries of graduates working in India, the college magazine, student and alumni periodicals, and other archival documents, Richard Hornsey details why the college was established and how the students' education prepared them for their work. Illustrating the impact of the college and its graduates in India and beyond, *Imperial Engineers* illuminates the personal and professional experiences of British men in India as well as the transformation of engineering education at a time of social and technological change.

Peterson's Graduate Programs in Engineering & Applied Sciences 2012

Peterson's

From two leaders of the FIRE (Financial Independence, Retire Early) movement, a bold, contrarian guide to retiring at any age, with a reproducible formula to financial independence. A bull****-free guide to growing your wealth, retiring early, and living life on your own terms. Kristy Shen retired with a million dollars at the age of thirty-one, and she did it without hitting a home run on the stock market, starting the next Snapchat in her garage, or investing in hot real estate. Learn how to cut down on spending without decreasing

your quality of life, build a million-dollar portfolio, fortify your investments to survive bear markets and black-swan events, and use the 4 percent rule and the Yield Shield--so you can quit the rat race forever. Not everyone can become an entrepreneur or a real estate baron; the rest of us need Shen's mathematically proven approach to retire decades before sixty-five.

Graduate Programs in the Biological/Biomedical Sciences & Health-Related Medical Professions 2014 (Grad 3) UBC Press

Looking to jumpstart your GPA? Most college students believe that straight A's can be achieved only through cramming and painful all-nighters at the library. But Cal Newport knows that real straight-A students don't study harder—they study smarter. A breakthrough approach to acing academic assignments, from quizzes and exams to essays and papers, *How to Become a Straight-A Student* reveals for the first time the proven study secrets of real straight-A students across the country and weaves them into a simple, practical system that anyone can master. You will learn how to:

- Streamline and maximize your study time
- Conquer procrastination
- Absorb the material quickly and effectively
- Know which reading assignments are critical—and which are not
- Target the paper topics that wow professors
- Provide A+ answers on exams
- Write stellar prose without the agony

A strategic blueprint for success that promises more free time, more fun, and top-tier results, *How to Become a Straight-A Student* is the only study guide written by

students for students—with the insider knowledge and real-world methods to help you master the college system and rise to the top of the class.

Forthcoming Books

Peterson's

Many guides claim to offer an insider view of top undergraduate programs, but no publisher understands insider information like Vault, and none of these guides provides the rich detail that Vault's new guide does. Vault publishes the entire surveys of current students and alumni at more than 300 top undergraduate institutions. Each 2- to 3-page entry is composed almost entirely of insider comments from students and alumni. Through these narratives Vault provides applicants with detailed, balanced perspectives.

Peterson's Graduate Programs in the Physical Sciences, Mathematics, Agricultural Sciences, the Environment & Natural Resources 2012 Princeton University Press
