An Autobiography Springer Science & Business Media

As plant physiology increased steadily in the latter half of the 19th century,

problems of absorption and transport of water and of mineral nutrients and problems of the passage of metabolites from one cell to another were investigated, especially in Germany. JUSTUS VON LIEBIG, who was born in Darmstadt in 1803, founded agricultural chemistry and developed the techniques of mineral nutrition in agriculture during the 70 years of his life. The discovery of plasmolysis by NAGEL (1851), the investigation of permeability problems of artificial membranes by TRAUBE (1867) and the classical work on osmosis by PFEFFER (1877) laid the foundations for our understanding of soluble substances and osmosis in cell growth and cell mechanisms. Since living membranes were responsible for controlling both water movement and the substances in solution, "permeability" became a major topic for investigation and speculation. The problems then discussed under that heading included passive permeation by diffusion, Donnan equilibrium adjustments, active transport processes and antagonism between ions. In that era, when organelle isolation by differential centrifugation was unknown and the electron microscope had not been invented, the number of cell membranes, their thickness and their composition, were matters for conjecture. The nature of cell surface membranes was deduced with remarkable accuracy from the reactions of cells to substances in solution. In 1895, OVERTON, in U. S. A., published the hypothesis that membranes were probably lipid in nature because of the greater penetration by substances with higher fat solubility.

Impudent and irresistible, Charandas is a thief with a difference. Having vowed never to lie, he manages to keep his word while robbing the rich blind. A typical folk hero, street-smart and savvy, he runs rings around the forces of law and order till he comes up against one wall he cannot scale his own commitment to the truth. And the unexpected twist at the end of this heartwarming comedy lifts the play onto another plane. This play by veteran playwright/director Habib Tanvir, performed by Naya Theatre's Chattisgarhi folk artists, is a contemporary Indian classic. When it was first staged in 1975, it made a tremendous impact.

Folk actors on the contemporary stage, vibrant and self-confident, speaking their own dialect and performing their own material, albeit under the guiding hand of a master director, was a novel experiment in Indian theatre. Moreover, it was an experiment that worked, and that opened up a new direction in theatre practice. Twenty years later, Charandas Chor is still popular. It has been performed all over India, and at many forums and festivals abroad, winning the top award at the prestigious Edinburgh Fringe Festival in 1982. This volume contains, along with the translated playscript, an introduction to Habib Tanvir's work in theatre by theatre scholar and critic Javed Malick and a long interview with the playwright/director in which he discusses the milestones in his long career. Anjum Katyal, the translator, is an editor and writer who lives and works in Calcutta.
