In The New Tribe,
pioneering author
Buchi Emecheta tells
the tale of a young
Nigerian boy adopted

by a white family. Life changes overnight for the Arlingtons when an abandoned baby girl, Julia, arrives unexpectedly on their doorstep. The couple take her in and settle into family life. But then, just two years later, their lives change once again when they are told a Nigerian mother is in desperate need of a loving home for her baby boy, Chester.

Instantly marked as different from the other children in his school – and even from his own family – Chester's pain and confusion at growing up an outcast ignites in him a desire to find out about his biological family. In this poignant, heartwarming story of Chester's journey through childhood, Buchi Emecheta weaves together a tale of love and acceptance while illuminating the vital importance of self-discovery. 'We are able to speak because [Buchi Emecheta] first spoke.' Chimamanda Ngozi Adichie 'Her name deserves to be embedded in our literary history.' Bernardine Evaristo 'A pioneer among female African writers.' Guardian

An African Elegy Nova Science Publishers

This moving poetry collection from the Booker Prize – winning author finds strength and hope while reflecting on the complex issues that have burdened Africa. First published in 1992, Ben Okri 's remarkable debut collection features poems that are now considered classics and taught in schools and universities worldwide. Here he plays with the mystique of the African continent, countering simplistic narratives of suffering that have been imposed on it with vibrant, nuanced portraits of the traditions and resilience of African peoples. An invaluable window onto Okri 's experiences as a Nigerian immigrant to the United Kingdom and as a writer discovering his calling, these poems also speak to universal truths about love, injustice, and the search for meaning.

An award-winning play about the relationship between

brothers. Nothing but the Truth is the story of two brothers, of sibling rivalry, of exile, of memory and reconciliation, and the ambiguities of freedom. The play was John Kani's debut as sole playwright and was first performed in the Market Theatre in Johannesburg. It won the 2003 Fleur du Cap Award for best actor and best new South African play. In the same year Kani was also awarded a special Obie award for his extraordinary contribution to theatre in the USA.

Our Common Future

The current logic of the market economy consists of extracting, producing, consuming and discarding. The efforts made to reduce the negative environmental impacts and promote recycling are not sufficient to offset the undesirable effects of this system described as "take, make and dispose. However, this linear approach to production and consumption, which prioritizes economic goals at the expense of environmental and social goals, has reached its

physical limit. The negative effects caused by this model threaten not only the stability of economies, but also the integrity of ecosystems, which are essential for human survival. More than ever, companies are pressured to adopt more sustainable models derived from the intensification of certain trends, such as: the increasing dependence on fossil fuels; the poor management of natural resources; climate change, which is caused mainly by the increasing emissions of greenhouse gases; and the competitiveness featured by an ever expanding global market. These trends are in line with the European 2020 Strategy, which sets out a number of objectives designed to ensure within this time-frame a change in current models regarding the impact on natural capital. The circular economy defends the same principles of sustainability, and both share the same concerns. The circular economy aims to eradicate waste not just from manufacturing processes, but systematically throughout the life cycles and uses of products, and their components contributing to make organisations and the economy more sustainable. This book presents a scientific perspective about sustainability and the circular economy, describing different approaches, focusing on different sectors and exploring various methodologies. Welcome to the world of the circular economy and sustainability.
