' KUMBA AFRICA ' , is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven ' t tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

Fresh from the Farm 6pk Springer Science & Business Media

Ranging from simple model variations to those machines built for specific purposes, this industrial-grade volume chronicles the "other line" of John Deere machinery. A mainstay in heavy industry and construction sites throughout the world, John Deere Industrials begins with coverage of the popular A-series with its yellow paint and the letter "I" added to the model designation that has become the hallmark of these incredible machines. (Delayed from Spring 2002)

Over 100 practical recipes related to network and application security auditing using the powerful Nmap About This Book Learn through practical recipes how to use Nmap for a wide range of tasks for system administrators and penetration testers. Learn the latest and most useful features of Nmap and the Nmap Scripting Engine. Learn to audit the security of networks, web applications, databases, mail servers, Microsoft Windows servers/workstations and even ICS systems. Learn to develop your own modules for the Nmap Scripting Engine. Become familiar with Lua programming. 100% practical tasks, relevant and explained step-by-step with exact commands and optional arguments description Who This Book Is For The book is for anyone who wants to master Nmap and its scripting engine to perform real life security auditing checks for system administrators and penetration testers. This book is also recommended to anyone looking to learn about network security auditing. Finally, novice Nmap users will also learn a lot from this book as it covers several advanced internal aspects of Nmap and related tools. What You Will Learn Learn about Nmap and related tools, such as Ncat, Ncrack, Ndiff, Zenmap and the Nmap Scripting Engine Master basic and advanced techniques to perform port scanning and host discovery Detect insecure configurations and vulnerabilities in web servers, databases, and mail servers Learn how to detect insecure Microsoft Windows workstations and scan networks using the Active Directory technology Learn how to safely identify and scan critical ICS/SCADA systems Learn how to optimize the performance and behavior of your scans Learn about advanced reporting Learn the fundamentals of Lua programming Become familiar with the development libraries shipped with the NSE Write your own Nmap Scripting Engine scripts In Detail This is the second edition of 'Nmap 6: Network Exploration and Security Auditing Cookbook'. A book aimed for anyone who wants to master Nmap and its scripting engine through practical tasks for system administrators and penetration testers. Besides introducing the most powerful features of Nmap and related tools, common security auditing tasks for local and remote networks, web applications, databases, mail servers, Microsoft Windows machines and even ICS SCADA systems are explained step by step with exact commands and argument explanations. The book starts with the basic usage of Nmap and related tools like Ncat, Ncrack, Ndiff and Zenmap. The Nmap Scripting Engine is thoroughly covered through security checks used commonly in real-life scenarios applied for different types of systems. New chapters for Microsoft Windows and ICS SCADA systems were added and every recipe was revised. This edition reflects the latest updates and hottest additions to the Nmap project to date. The book will also introduce you to Lua programming and NSE script development allowing you to extend further the power of Nmap. Style and approach This book consists of practical recipes on network exploration and security auditing techniques, enabling you to get hands-on experience through real life scenarios.

[Geomorphology and Land Management in a Changing Environment](#) Edited by Duncan F. M. McGregor and Donald A. Thompson Royal Holloway, University of London, UK Geomorphology and Land Management in a Changing Environment highlights the practical application of geography to environmental management, through examination of the ways in which geomorphology is relevant to, and contributes to, proper management of land resources. Increasingly, effective land use is seen as dependent on the integration of geomorphological principles and practice within the decision-making process. The book elucidates the environmental effects of land management practices in terms of the geomorphological systems in which they take place and in the context of an environment subject to uncertainty and change. It critically reviews the progress of ' applied geomorphology ' in addressing the issues of practical applicability of geomorphology, and then focuses on four major themes within this interaction: ground instability and land management; the effect of land use on the hydrological and erosional response of geomorphological systems; modelling

geomorphological response to environmental change; and geomorphological aspects of the management of environmental risk. By integrating a wide range of case studies from the developed and the developing world, the book offers a distinctive insight into the range and utility of geomorphological research, and pointers for environmental planners and decision makers at all levels.

This book is dedicated to Prof. Dr. Heinz Gerhäuser on the occasion of his retirement both from the position of Executive Director of the Fraunhofer Institute for Integrated Circuits IIS and from the Endowed Chair of Information Technologies with a Focus on Communication Electronics (LIKE) at the Friedrich-Alexander-Universität Erlangen-Nürnberg. Heinz Gerhäuser's vision and entrepreneurial spirit have made the Fraunhofer IIS one of the most successful and renowned German research institutions. He has been Director of the Fraunhofer IIS since 1993, and under his leadership it has grown to become the largest of Germany's 60 Fraunhofer Institutes, a position it retains to this day, currently employing over 730 staff. Likely his most important scientific as well as application-related contribution was his pivotal role in the development of the mp3 format, which would later become a worldwide success. The contributions to this Festschrift were written by both Fraunhofer IIS staff and external project team members in appreciation of Prof. Dr. Gerhäuser's lifetime academic achievements and his inspiring leadership at the Fraunhofer IIS. The papers reflect the broad spectrum of the institute's research activities and are grouped into sections on circuits, information systems, visual computing, and audio and multimedia. They provide academic and industrial researchers in fields like signal processing, sensor networks, microelectronics, and integrated circuits with an up-to-date overview of research results that have a huge potential for cutting-edge industrial applications.

The aircraft industry is being transformed by the introduction of new techniques in design, production, and testing. New techniques for forming, bonding and manufacturing with existing materials as well as the development of new materials have made a considerable impact on the industry. After a short historical introduction, this book describes in detail operations and machinery concerned with light alloys, steels, nickel and titanium alloys, metal cutting, welding and brazing, surface and protective treatments, sheet metal working, non-metallic materials, assembly, inspection and testing. A final chapter describes estimating, planning and the role of computer aided design and machining (CAD/CAM).

[The ICE Conditions of Contract](#) Cambridge University Press

The ICE Conditions continues to be the dominant form of contract for civil engineering, despite the growing importance of the New Engineering Contract. The Seventh Edition of the ICE Conditions, published in 1999, introduced a number of changes, including: incorporating some of the concepts of the Latham Report amending certain provisions of the Sixth Edition which had attracted criticism rectifying conspicuous omissions from the text of earlier editions of the contract correcting small errors and faults from the previous edition modernising certain provisions and terms Brian Eggleston, whose previous book on the ICE Conditions was described as 'likely to become the authoritative reference source for the Sixth Edition', examines the contract clause by clause from a practical and legal viewpoint. There is extensive coverage of case law. Written by an experienced civil engineer and recognized authority on construction contracts, this book is an essential guide.

[Collector's Guide to Antique Radios](#) Harry N. Abrams

John Slusser, collector, full-time radio dealer, and well-known figure in the radio field, along with the staff of Radio Daze, have compiled this updated and expanded seventh edition of our popular series. Filling the need for an easy-to-use, complete price guide to these collectibles, Collector s Guide to Antique Radios, Seventh Edition, gives descriptions and current values for approximately 10,000 models of antique radios with over 800 full-color photographs. Our guide gives complete descriptions of every radio along with selected full-color photos and information about the radio manufacturers. The informative text provides explanations for the many confusing terms and abbreviations used in the radio field. Listed alphabetically by company, the radios are accompanied by current collector values. The book is devoted to the golden age of radios, the 1920s through the 1950s. Although the majority of these radios have long since vanished, many still remain as living examples of the quality and charm of products from this period. 2007 values.

"A bit of a masterpiece... reminded me of John Le Carré in its very plausible complexity, but a lot more engaging and exciting." — Alan Moore (Watchmen, V for Vendetta, Batman: The Killing Joke) THE ORIGINAL GRAPHIC NOVEL THAT INSPIRED THE MOVIE! November 1989. MI6 spy Lorraine Broughton was sent to Berlin to investigate the death of another agent, and the disappearance of a list revealing every spy working there. She found a powder keg of mistrust, assassinations and bad defections that ended with the murder of

M16's top officer, as the Berlin Wall was torn down. Now Lorraine has returned from the Cold War's coldest city, to tell her story. And nothing is what it seems. Don't miss the thrilling sequel, *The Coldest Winter*, available now.

Geomorphology and Land Management in a Changing Environment John Wiley & Sons

The latest edition of a popular price guide features all updated listings and values. Helping eliminate confusion in radio identification, this book contains over 5,000 model numbers and over 600 color photos, as well as basic descriptive information. This guide covers radios produced between 1920 and 1959, listing them in alphabetical order by company.

The art of darkroom developing and printing will never go out of style. Master darkroom specialist Steve Anchell is back to prove it in this long-awaited third edition of his enormously successful *Darkroom Cookbook*. Packed with over 200 "recipes," some common and others rare gems, you'll discover something new every time you open this guide, whether you're new to the darkroom or have been making your own prints for years. In addition to the formulas, you'll find tons of useful information on developers, push-processing, where to get darkroom equipment, how to set up your own darkroom, how to work and play in your darkroom safely, and much more. This handy guide will become a constant companion for every darkroom enthusiast creating prints at home or in the studio. In addition to complete updates throughout to reflect changes in the availability of chemicals and equipment, this third edition contains all new information on: *Reversal processing *Enlarged negatives *Pyro formulas *Plus expanded sections on printing, pyro, and toning prints Also included for the first time are special technique contributions as well as stunning black and white imagery by Bruce Barnbaum, Rod Dresser, Jay Dusard, Patrick Gainer, Richard Garrod, Henry Gilpin, Gordon Hutchings, Sandy King, Les McLean, Saïd Nuseibeh, France Scully Osterman, Mark Osterman, Tim Rudman, Ryuijie, John Sexton, and John Wimberly. Be sure to visit www.darkroomcookbook.com to find useful links, an interactive user forum, and more! Steve Anchell is a photographer and author of *The Variable Contrast Printing Manual*, and co-author of *The Film Developing Cookbook*. He has been teaching darkroom and photography workshops since 1979. Steve is a member of the Freestyle Advisory Board of Photographic Professionals. "With its unrivalled collection of photographic formulae and easy to understand explanations of photographic processes, *The Darkroom Cookbook* has long been a favorite with darkroom workers everywhere. Now, with further additions to its formulary, more topics, and contributions by renowned darkroom experts, this new edition promises to be an indispensable Aladdin's Cave resource to darkroom enthusiasts of all levels. -Tim Rudman, photographer and author "The Darkroom Cookbook is an essential compendium of photographic information for anyone interested in high-quality darkroom work. -John Sexton, photographer

Vision and Art (Updated and Expanded Edition)

Advances in Genetic Programming reports significant results in improving the power of genetic programming, presenting techniques that can be employed immediately in the solution of complex problems in many areas, including machine learning and the simulation of autonomous behavior. Popular languages such as C and C++ are used in many of the applications and experiments, illustrating how genetic programming is not restricted to symbolic computing languages such as LISP. Researchers interested in getting started in genetic programming will find information on how to begin, on what public-domain code is available, and on how to become part of the active genetic programming community via electronic mail.
