Psychology Press
During the 2016 presidential election, America's election infrastructure was targeted by actors sponsored by the Russian government. *Securing the Vote: Protecting American Democracy* examines the challenges arising out of the 2016 federal election, assesses current technology and standards for voting, and recommends steps that the federal government, state and local governments, election administrators, and vendors of voting technology should take to improve the security of election infrastructure. In doing so, the report provides a vision of voting that is more secure, accessible, reliable, and verifiable.

This work meets a long-standing need in the helping professions by being the first and only comprehensive book on how counselors and psychotherapists can work with clients around values, goal-setting, decision-making and action planning. Helping clients determine their priorities, set goals, make decisions, and take action to improve their lives are common tasks for virtually all helping professionals when engaging with clients. This is the process known as "values clarification" (or "Values Clarification"). While counselors and psychotherapists widely practice values clarification-some knowingly, others unaware-they typically do so with a limited understanding of its theory, methods and various applications.

This book demonstrates, with great precision, case studies, and hundreds of clinical examples, how counselors and psychotherapists in many fields can ask good clarifying questions, conduct clarifying interviews, and employ dozens of values clarification strategies with individuals, couples, families, and groups. To illustrate how values clarification can be used to explore a myriad of counseling topics, the examples throughout the text are often grouped around more specific applications for marriage and family counseling, career counseling, substance abuse and recovery counseling, geriatric counseling, grief counseling, pastoral counseling, financial counseling, school counseling, rehabilitation counseling, counselor/clinical education and supervision, health counseling, and personal growth. There are clear descriptions of what values clarification is and is not, theory and research, multicultural and diversity issues, and how counselors and therapists can handle value and moral conflicts with clients. Values clarification is compared and contrasted to other approaches to counseling and psychotherapy, including person-centered, cognitive-behavioral, reality therapy-choice theory, existential, individual psychology, solution-focused, narrative, motivational interviewing, acceptance and commitment therapy, appreciative inquiry, life coaching, and positive psychology.

Media Flight Plan Longman
Media Flight Plan was developed in response to the need for affordable media planning simulations in the university classroom. Professional level media planning software ranges in price from hundreds to thousands of dollars. *Media Flight Plan*, including both the textbook and the online simulation, sells at or below the average price of a used textbook. MFP provides university students' access to not only realistic simulations of planning software, but also includes access to professional syndicated data like MRI, SRDS, Nielsen data, (all by permission) and other syndicated sources that only large corporations and agencies can afford. Besides the online software simulation, the text includes eight chapters that cover

basics like basic math models involved in media buying/planning, and exercises that cover calculation of audience ratings, media share, reach and frequency, and gross rating points. Case studies are included for actual Fortune 500 clients. All cases require students to interpret and apply professional syndicated data and employ the basic methods for writing marketing driven media plans. Both authors, Dennis Martin and Dale Coons, have professional ad agency experience. Coons is executive vice president in a major agency where he directs research, media planning and client development. He is among the most sought-after experts in the field of advertising research. Martin worked on national brands as a copywriter and creative director and co-authored *Strategic Advertising Campaigns*, a national best-seller for Advertising Age's publishing division. Earning his Ph.D. at University of Illinois, he achieved national and international recognition as a professor of marketing communications.

The End of Power Xlibris Corporation
Brilliant and engagingly written, *Why Nations Fail* answers the question that has stumped the experts for centuries: Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, geography? Perhaps ignorance of what the right policies are? Simply, no. None of these factors is either definitive or destiny. Otherwise, how to explain why Botswana has become one of the fastest growing countries in the world, while other African nations, such as Zimbabwe, the Congo, and Sierra Leone, are mired in poverty and violence? Daron Acemoglu and James Robinson conclusively show that it is man-made political and economic institutions that underlie economic success (or lack of it). Korea, to take just one of their fascinating examples, is a remarkably homogeneous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The south forged a society that created incentives, rewarded innovation, and allowed everyone to participate in economic opportunities. The economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of

people. Sadly, the people of the north have endured decades of famine, political repression, and very different economic institutions—with no end in sight. The differences between the Koreas is due to the politics that created these completely different institutional trajectories. Based on fifteen years of original research Acemoglu and Robinson marshall extraordinary historical evidence from the Roman Empire, the Mayan city-states, medieval Venice, the Soviet Union, Latin America, England, Europe, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, including: - China has built an authoritarian growth machine. Will it continue to grow at such high speed and overwhelm the West? - Are America's best days behind it? Are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority? - What is the most effective way to help move billions of people from the rut of poverty to prosperity? More philanthropy from the wealthy nations of the West? Or learning the hard-won lessons of Acemoglu and Robinson's breakthrough ideas on the interplay between inclusive political and economic institutions? Why Nations Fail will change the way you look at—and understand—the world.

Our Common Future GRIN Verlag

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest

to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that *Public Examinations Examined*, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations." Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

Public Examinations Examined Ibadan University Press

This book gathers high-quality research papers presented at the 2nd AUE international research conference, AUEIRC 2018, which was organized by the American University in the Emirates, Dubai, and held on November 13th-15th, 2018. The book is

broadly divided into two main sections: Sustainability and Smart Business, and Sustainability and Creative Industries. The broad range of topics covered under these sections includes: risk assessment in agriculture, corporate social responsibility and the role of intermediaries, the impact of privatizing health insurance, political events and their effect on foreign currency exchange, the effect of sustainable HR practices on financial performance, sustainability integration in the supply chain and logistics, gender inequality in the MENA economies, the panel data model, the model of sustainable marketing in the era of Industry 4.0, micro-enterprises as a tool for combating unemployment, the impact of financial education and control on financial behavior, measuring financial and asset performance in agricultural firms, a comprehensive strategic approach to sustainability in the UAE, sustainability and project finance, HR analytics, FaD or fashion for organizational sustainability, a conceptual framework of sustainable competitive advantages, psychology of organizational sustainability, Blockchain technology and sustainability, veganism and sustainability, institution building from an emotional intelligence perspective, sustainable concrete production using CWP, occupants' behavior and energy usage in Emirati houses, the effect of shop lighting on consumer behavior, multimedia applications in digital transformation art, integrating biomimicry principles in sustainable architecture, experimental sustainable practices in fashion education, technology-assisted student-centered learning for civil engineering, and a 10-step design process for architectural design studios. All contributions present high-quality original research work, findings and lessons learned in practical development.

Essentials of Educational Measurement

Lucky Odoni (Nig.) Enterprises

An interdisciplinary and quantitative account of human claims on the biosphere's stores of living matter, from prehistoric hunting to modern energy production. The biosphere—the Earth's thin layer of life—dates from nearly four billion years ago, when the first simple organisms appeared. Many species have exerted enormous influence on the biosphere's character and productivity, but none has transformed the Earth in so many ways and on such a scale as *Homo sapiens*. In *Harvesting the Biosphere*, Vaclav Smil offers an interdisciplinary and quantitative account of human claims on the biosphere's stores of living matter, from prehistory to the present day. Smil examines all harvests—from prehistoric man's hunting of megafauna to modern crop production—and all uses of harvested biomass, including energy, food, and raw materials. Without harvesting of the biomass, Smil points out, there would be no story of human evolution and advancing civilization; but at the same time, the increasing extent and intensity of present-day biomass harvests are changing the very foundations of civilization's well-being. In his detailed and comprehensive account, Smil

presents the best possible quantifications of past and current global losses in order to assess the evolution and extent of biomass harvests. Drawing on the latest work in disciplines ranging from anthropology to environmental science, Smil offers a valuable long-term, planet-wide perspective on human-caused environmental change.

Harvesting the Biosphere New York : McGraw-Hill

Master's Thesis from the year 2014 in the subject Book Science, Nnamdi Azikiwe University Awka, course: Mass Communication, language: English, abstract: The study has five objectives, namely: to find out the contributions that indigenous publishers are making towards the development of the Nigerian economy, to identify the various ways Literamed Publications market their books, to explore the challenges facing the book industry in general and Literamed in particular as well as the prospects available for Literamed Publications. Five research questions were also generated for which the study sought to answer. In carrying out the study several relevant literatures were reviewed including communication texts, past studies, online and offline articles, journals as well as papers presented at different fora that have bearing on the subject. The theoretical framework for the study is the libertarian theory of the press. The study being a survey utilized the questionnaire as instrument for data collection. A survey was conducted among the staff of Literamed publications limited by administering the questionnaire to a sample of 190 staff drawn through a simple random sampling. The findings indicate that publishers are contributing to the growth of the Nigerian economy (96.2%). The major challenges confronting the publishing industry include book piracy (39.3%) and inadequate infrastructure such as electricity (25.1%) while the prospects include the ever expanding population of schools enrolment and the policy of compulsory education coupled with government bulk purchases. The findings also indicate that the company uses a multi-sectoral approach in marketing their books such as institutional sales, supply to distributors, bookshops and more importantly to schools and end users. The study recommends, among other things, a synergistic approach in fighting copyright violations involving all stakeholders: authors, printers, publishers, booksellers, Nigerian Copyright Commission and other law enforcement agencies.

Think Like a Freak (Republish) Basic Books

Five hundred years ago, Martin Luther's Ninety-Five Theses caught Europe by storm and initiated the Reformation, which fundamentally transformed both the church and society. Yet by Luther's own estimation, his translation of the Bible into German was his crowning achievement. The Bible played an absolutely vital role in

the lives, theology, and practice of the Protestant Reformers. In addition, the proliferation and diffusion of vernacular Bibles—grounded in the original languages, enabled by advancements in printing, and lauded by the theological principles of sola Scriptura and the priesthood of all believers—contributed to an ever-widening circle of Bible readers and listeners among the people they served. This collection of essays from the 2016 Wheaton Theology Conference—the 25th anniversary of the conference—brings together the reflections of church historians and theologians on the nature of the Bible as "the people's book." With care and insight, they explore the complex role of the Bible in the Reformation by considering matters of access, readership, and authority, as well as the Bible's place in the worship context, issues of theological interpretation, and the role of Scripture in creating both division and unity within Christianity. On the 500th anniversary of this significant event in the life of the church, these essays point not only to the crucial role of the Bible during the Reformation era but also its ongoing importance as "the people's book" today.

Teaching and Learning in the Secondary School World Bank Publications

WAEC in Review is a practical intervention strategy in transforming the weakening educational system of Liberia where academic excellence is unceasingly diminishing. LIPACE Pilot Study Guide is not only a landmark achievement in the educational history of Liberia but a remarkable stride towards the proper preparation of Liberian students for future diets of the WAEC exam. As a member of the National Committee of the West African Examinations Council and a Stakeholder in the Liberian Education System, I wish to recommend the use of this study guide to adequately prepare each and every Liberian student for future examinations thereby setting the stage for an easy transition to the emerging West African Senior Secondary Examinations (WASSCE). I am explicitly confident that you will definitely find your journey through this guide very rewarding as you prepare to sit the next WAEC Exam.—David S. Massaquoi, Sr., director of Education, The Salvation Army–Liberia Command Education Secretariat Our students sit the exam in constant fear of proctors and supervisors. They know nothing about the exam and its structure and this fear lead to them failing massively. We need to build the confidence level of our students and help them to study hard and understand the roles of proctors and supervisors to stop the intimidation during the exam. Thanks to LIPACE and the “Turning

the Tide” project, we have helped our students achieved an amazing achievement for the first time in the history of Gbarpolu County where all senior students successfully passed the exam.—Lartey Bemah, principal of Bopolu Public School (2012-2013), Gbarpolu County, Liberia

Emerging Africa National Academies Press

A rare and timely intervention from Kingsley Chiedu Moghalu, Deputy Governor of the Central Bank of Nigeria, on development in Africa. To many, Africa is the new frontier. As the West lies battered by financial crisis, Africa is seen as offering limitless opportunities for wealth creation in the march of globalization. But what is Africa to today's Africans? Are its economies truly on the rise? And what is its likely future? In this pioneering book, leading international strategist Kingsley Moghalu challenges conventional wisdoms about Africa's quest for growth. Drawing on philosophy, economics and strategy, he ranges from capitalism to technological innovation, finance to foreign investment, and from human capital to world trade to offer a new vision of transformation. Ultimately he demonstrates how Africa's progress in the twenty-first century will require nothing short of the reinvention of the African mindset. 'Africans seriously analyzing Africa's opportunities are all too rare. Kingsley Moghalu writes with insight and authority' Paul Collier 'Savvy . . . distinguished' Mark Malloch-Brown 'Unique in the depth of its insight, the ambition of its scope, and the clarity of its argument. Kingsley Moghalu brings a remarkable intellect and his vast experience to this tour de force on Africa's economic transformation. This is a truly weighty contribution to understanding Africa's developmental dilemma and its quest for a more prosperous future' Ngozi Okonjo-Iweala 'Insightful and analytical . . . sheds instructive light on Africa's position in the world. It is a testament to the palpable optimism that encompasses Africa while frankly addressing the myriad challenges that lie ahead for its economic transformation' Shashi Tharoor Kingsley Chiedu Moghalu is Deputy Governor of the Central Bank of Nigeria. He was the Founder and CEO of Sogato Strategies S.A., a global strategy and risk management consulting firm in Geneva, Switzerland. He has previously worked for the United Nations for 17 years in strategic planning, legal, development finance and executive management. His previous books include Global Justice and Rwanda's Genocide.

Lonely Days Teach Yourself

Responsible Science is a comprehensive review of factors that influence the integrity of the research process. Volume I examines reports on the incidence of misconduct in science and reviews institutional and governmental efforts to handle cases of misconduct. The result of a two-year study by a panel of experts convened by the National Academy of Sciences, this book critically analyzes the impact

of today's research environment on the traditional checks and balances that foster integrity in science. *Responsible Science* is a provocative examination of the role of educational efforts; research guidelines; and the contributions of individual scientists, mentors, and institutional officials in encouraging responsible research practices.

Stepping Up Skills in Urban Ghana Currency

A large percentage of workers and firms operate in the informal economy, outside the line of sight of governments in emerging market and developing economies. This may hold back the recovery in these economies from the deep recessions caused by the COVID-19 pandemic--unless governments adopt a broad set of policies to address the challenges of widespread informality. This study is the first comprehensive analysis of the extent of informality and its implications for a durable economic recovery and for long-term development. It finds that pervasive informality is associated with significantly weaker economic outcomes--including lower government resources to combat recessions, lower per capita incomes, greater poverty, less financial development, and weaker investment and productivity.

Education in Nigeria University Press, Nigeria

Weiner introduces -- and offers his own motivation for producing - - this most impressive work with the following:

There are two distinct approaches to the study of motivation. One stratagem is a product of academic, experimental procedures, while the second is an outgrowth of clinical, non-experimental methods. Each of the approaches has unique advantages and disadvantages. But all investigators in this field are guided by a single basic question, namely, "Why do organisms think and behave as they do?" To help answer that basic question, *Human Motivation* presents an entire range of motivation studies -- from psychoanalytic, social learning and humanistic theory; to social facilitation, arousal, emotions, personal responsibility, and the irrationality of attributions; through chapter and verse of Hullian and Lewinian theory.

Principles of Economics Simon and Schuster

????????????? Stop Listening to Authors Who Won't Show You Proof!

????????????? Condensed stats can be found at - linkpony.com/97stats - with a link to full statistics included in Chapter 6 In this book, best-selling, no-BS, finance author Tim Morris goes over a swing trading strategy which he has coined The 97% Swing Trade. By proving the results with over 10 years of data, which include

multiple corrections and the crash of 2020, Tim lays out a swing trading strategy that has a 17.50% annual return, an average trade duration of just 10 days, and a 97.71% win rate (with all statistics shown in Chapter 6). There are no special programs, confusing algorithms, or costly subscriptions required. Everything needed to use this strategy is free on FinViz! Here's the concept behind the trade: ? Use the free website FinViz to find the stocks which are eligible to trade (which takes less than 5 minutes). ? Put in your order and wait for it to get executed. ? Once executed, sell at the exact exit point Tim provides. You may have read some books where you could spend hours searching for a good setup. Who wants to do that? This trade is limited to just a handful of stocks, which take all of 5 minutes to find on your computer. This is easily done on the website FinViz, which Tim of course shows you how to do in the book. Tim includes detailed charts, trading examples, and statistics to help you understand the concepts behind the strategy. He also gives you the exact entry and exit points, and even where to set your stop loss.

Meaning you know exactly where to get in and get out. No guess work! It really can't get any simpler than the strategy Tim shows you in this book!

???????????????????????????????? As a complimentary bonus, only for book buyers, you'll receive Tim's special report titled *Crush the Market*. This special report is packed with 14 incredibly beneficial tips to help you make money in the stock market! This report is not available to the general public, or anywhere else. It exists solely as a "thank you" to buyers of this book. ????????????????????????????? Sick of reading about trade ideas that don't work? Click the "Buy Now" button at the top of this page and pick up your copy of *The 97% Swing Trade* NOW!

The People's Book ASCD

The Skills Toward Employment and Productivity (STEP) Survey is an initiative of the World Bank in cooperation with other development partners and nongovernmental agencies and carried out in more than 14 countries globally. In Ghana, the first phase of the survey focusing on adults in urban communities was carried out in cooperation with the University of Ghana's Institute of Statistical, Social, and Economic Research (ISSER), the Ministry of Education, the Council for Technical and Vocational Education and Training (COTVET), and the Ghana Statistical Service (GSS).

Human Motivation Noura Books

This encyclopedia is the first major reference guide for students new to the field, covering traditional areas while pointing the way to future developments. *The 97% Swing Trade* Springer Nature Research and writing on secondary education is often a specialised treatment of isolated themes. This reader draws together the most significant work of recent years across a whole range of themes to give students and new teachers an overview of some of the most important issues and challenges that faced secondary teachers in the 1990s. It looks at the central players - the children and the teachers - at the classrooms in which they work together; at the curriculum, both implicit and overt; and at the wider community and political context of secondary education. Divided into sections to allow easy access to material of interest, the book covers: * learners * teachers * classrooms * curriculum * schools. Throughout, the reader addresses the crucial issues of effectiveness, quality and achievement and how these will influence the work of the secondary teacher in the coming years.
