Lucky child - what a wondrous world you live in! This is the theme of Little Blue Planet - a book meant to be read aloud to very young children. As you and the child explore the pages of this book, you will encounter the natural wonders of our world: forests, jungles, volcanoes, swamps, coral reefs and many more. Each of these wonders is captured in a two-page spread, with a scenic watercolor on the left and an imaginative view featuring a child on the right. This book is a first travelogue for the tiny set. It is primarily a picture book, but has just enough text to provide context and encourage the child to imagine what it would be like to visit this place. This book makes for a beautiful and quick read.

A Guide for Kids Createspace Independent Publishing Platform  
This is the story of a successful father describing his approach to parenting, making us think and consider what will make our children happy and successful individuals. Ravi Mahendra is a father of three young girls and he is passionate about parenting. He has personally gone on a journey of learning and developing the relationship between him and his daughters. Ravi delights in seeing his children become bigger and better individuals. Ravi believes passionately that parenting is about dedication and

focus. The book is based on the principle that you are the best teacher for your children; you can pass on your knowledge and experience to help to support the best development of your child. The parent is the figure of authority, with immense responsibility for decisions regarding the children. This book draws out the benefits of really pro-actively grasping the responsibility and making the decisions rather than running with the flow. The real strength of this book lies with the thought process on determining priorities, characteristics and values that will produce successful children. It will inspire you to look at your parenting approach with a fresh set of eyes and help you to succeed on your chosen path. The book uses well-chosen examples from the world of business, politics and historical figures to really illustrate what success means and what needs to be done to achieve it. Ravi uses connection of business ideas and stories with parenting to bring a fresh perspective on children's upbringing. . The book is drawing interesting connection from management and business theories to really focus on children leading successful lives. At a practical level, the book offers a vast array of examples on managing the prosaic day-to-day issues. Unless the practical challenges are resolved, it becomes very difficult to manage the more advanced parenting questions. Ravi does a great job in visualising the impact of our actions now on the children in the future. Ravi Mahendra lives with his three daughters in London. His career spans many areas: he has built a renowned business school in his native Sri Lanka, written business columns for newspapers and is a prize-winning Qualified Accountant with an MBA. Ravi is currently working as Global Finance leader in a large insurance organisation and he is also a regular blogger on LinkedIn. His aim is to live life to the fullest and to raise his children as successful and content individuals.

Experts tell us the best way to teach kids healthy eating habits is to involve them in the process. This irresistible cookbook presents 60 appealing recipes kids will beg to make themselves, in fun and charming illustrations they will love. Bursting with color, humor, cute animal characters, and cool facts (Did you know your brain actually shrinks when you're dehydrated? Drink water, quick!), Help Yourself empowers children to take charge of their own nutrition - for now and for life! Recipes include: fun-to-munch hand-held snacks like Life Boats bright fruit-flavored drinks like Tickled Pink the always-popular things on toast like Leprechaun Tracks salads they will actually eat like Tiger Stripes cozy small meals like Tomato Tornado and sweets like chocolatey Disappearing Dots, because everybody likes candy! Excerpt from the Intro: Since the day you were born, someone has been making you food and serving you meals (that's the life!). But wait a minute...what's that on the end of your arm? Why, it's a hand! And it turns out you need little more than your own two hands and a few ingredients to help yourself to healthy foods...and help the world, while you're at it! Because from the tip of your nose to the tip of an iceberg, the food we eat affects our bodies, our environment, and even strangers on the other side of the planet. It's amazing but true.

*The Help Yourself Cookbook for Kids* Little Bee Books

Written by the founders of Silicon Valley's the CoderSchool, Basher's Code Your Own Website is a really useful guide to basic programming that's packed with quirky, colorful characters—from URL and Domain to Browser and Router—who will explain exactly how the Internet works. Young readers will learn all about the three big website coding languages: HTML, CSS, and JavaScript, then follow the simple steps to code their own dynamic website. Combining Basher's trademark quirky and humorous illustration style with the very latest teachings on coding, Code Your Own Website also looks closely at online safety, helping young coders to spot the good guys... and the bad ones.

*What Country Is This? (See and Learn Coloring Book)* CRC Press Across the realms of multimedia production, information design, web development, and usability, certain truisms are apparent. Like an Art of War for design, this slim volume contains guidance, inspiration, and reassurance for all those who labor with the user in mind. If you work on the web, in print, or in film or video, this book can help. If you know someone working on the creative arena, this makes a great gift. Funny, too.

Mazes for Kids Createspace Independent Publishing Platform Web Design for Kids Little Bee Books

*Monk's Monster House* John Wiley & Sons

This book introduces standard and new HTML5 elements and attributes and CSS3 properties commonly used in Web design as well as design guidelines for their effective use. Its approach of explaining every line of code in the examples it uses to show the usage of the HTML elements and CSS properties introduced makes it an invaluable Web design resource for beginners as

well as intermediates looking to fill in gaps in their knowledge. In addition, the inclusion of user-centered design process stages and how they are best managed in website development makes the book unique in its area.

Also, the book's approach of including challenges after each topic to help refresh readers' knowledge, as well as make them think, ensures that there are ample activities to keep learners motivated and engaged. Key Features Comprehensively covers standard and new HTML5 elements and attributes and CSS3 properties. Includes a lot of challenges/exercises; one after each HTML element or CSS property introduced and demonstrated with examples. Example codes can be copied and pasted as-is to implement and experiment with. For every HTML element or CSS property introduced, guidelines are provided, where relevant, on how to best use them in a design to enhance usability and accessibility. Includes comprehensive explanation of flexible box and grid layout models and how to use them to create responsive and adaptive Web design. Covers the importance of visual aesthetics in design, including design elements and principles and examples of how they can be applied in Web design to produce good user experience. Includes comprehensive guidelines on how to design for standard and mobile screens, including discussion of touch gesture interaction design and standard gestures and the functions for which they are most commonly used.

Introduces the stages of user-centered design process, including Web accessibility and user-experience testing, and managerial aspects of Web development, including intellectual property. Provides a brief introduction

on how to make HTML and CSS codes more compact and more efficient and how to combine them with other languages commonly used in Web design and development, such as JavaScript, AJAX, and PHP.
