Translinguistics represents a powerful alternative to conventional paradigms of language such as bilingualism and

code-switching, which assume the compartmentalization of different 'languages' into fixed and arbitrary boundaries. Translinguistics more accurately reflects the fluid use of linguistic and semiotic resources in diverse communities. This groundbreaking volume showcases work from leading as well as emerging scholars in sociolinguistics and other language-oriented disciplines and collectively explores and aims to reconcile the distinction between 'innovation' and 'ordinariness' in translinguistics. Features of this book include: 18 chapters from 28 scholars, representing a range of academic disciplines and institutions from 11 countries around the world; research on understudied communities and geographic contexts, including those of Latin America, South Asia, and Central Asia; several chapters devoted to the diversity of communication in digital contexts. Edited by two of the most innovative scholars in the field, Translinguistics: Negotiating Innovation and Ordinariness is essential reading for

scholars and students interested in the question of multilingualism across a variety of subject areas.
