Ever wondered what it would be like to be a street magician in Paris? A fish farmer in Norway? A costume designer in Bollywood? This playful and accessible look at different types of work around the world delivers a wealth of information and advice about a wide array of jobs and professions. The value of this book is twofold: For young people or middle-aged people who are undecided about their career paths and feel constrained in their choices, A World of Work offers an expansive vision. For ethnographers, this book offers an excellent example of using the practical details of everyday life to shed light on larger structural issues. Each chapter in this collection of ethnographic fiction could be considered a job manual. Yet not any typical job manual—to do justice to the ways details about jobs are conveyed in culturally specific ways, the authors adopt a range of voices and perspectives. One chapter is written as though it was a letter from an older sister counseling her brother on how to be a doctor in Malawi. Another is framed as a eulogy for a well-loved village magistrate in Papua New Guinea who may have been killed by sorcery. Beneath the novelty of the examples are some serious messages that Ilana Gershon highlights in her introduction. These ethnographies reveal the connection between work and culture, the impact of societal values on the conditions of employment. Readers will be surprised at how much they can learn about an entire culture by being given the chance to understand just one occupation.

In this monumental book, sociologist Robert Castel reconstructs the history of what he calls "the social question," or the ways in which both labor and social welfare have been organized from the Middle Ages onward to contemporary industrial society. Throughout, the author identifies two constants bearing directly on the question of who is entitled to relief and who can be excluded: the degree of embeddedness in any given community and the ability to work. Along this dual axis the author locates virtually the entire history of social welfare in early-modern and contemporary Europe. This work is a systematic defense of the meaningfulness of

the category of "the social," written in the tradition of Foucault, Durkheim, and Marx. Castel imaginatively builds on Durkheim's insight into the essentially social basis of work and welfare. Castel populates his sociological framework with vivid characterizations of the transient lives of the "disaffiliated": those colorful itinerants whose very existence proved such a threat to the social fabric of early-modern Europe. Not surprisingly, he discovers that the cruel and punitive measures often directed against these marginal figures are deeply implicated in the techniques and institutions of power and social control. The author also treats the flipside of the problem of social assistance: namely, matters of work and wage-labor. Castel brilliantly reveals how the seemingly objective line of demarcation between able-bodied beggarsthose who are capable of work but who chose not to do soand those who are truly disabled becomes stretched in modernity to make room for the category of the "working poor." It is the novel crisis posed by those masses of population who are unable to maintain themselves by their labor alone that most deeply challenges modern societies and forges recognizably modern policies of social assistance. The author's gloss on the social question also offers us valuable perspectives on contempo
