The *Ducati Bible* HarperCollins Over recent years biographical studies have gained an increasingly important place in academic study. The two are inextricably linked. Education uses biography in teaching, and in biography, education features strongly as a formative stage in personal development. This book elaborates on the analytical work that has drawn attention to biography and education, and seeks to expand the understanding of lives in educational contexts.

Mainstream sociology has been quick to embrace this treatment of individuals as biographical appearances, but it is even more relevant in the field of education.

Biography and Education From Noose to Needle

In this major work, the sociologists Eve Chiapello and Luc Boltanski go to the heart of the changes in contemporary business culture. Via an

unprecedented analysis of the latest management texts that have formed the thinking of employers in their organization of business, the authors trace the contours of a new spirit of capitalism. They argue that from the middle of the 1970s onwards, capitalism abandoned the hierarchical Fordist work structure and developed a new network-based form of organization which was founded on employee initiative and autonomy in the workplace — a 'freedom' that came at the cost of material and psychological security. The authors connect this new spirit with the children of the libertarian and romantic currents of the late 1960s (as epitomised by dressed-down, cool capitalists such as Bill Gates and 'Ben and Jerry') arguing that they practice a more successful and subtle form of exploitation. In a work that is already a classic in Europe, Boltanski and Chiapello show how the new spirit triumphed thanks to a

remarkable recuperation of the Left's critique of the alienation of everyday life — a recuperation that simultaneously undermined the power of its social critique. by Chicago Tribune, BBC, Wired, Epicurious, Leite's Culinaria Named "100 Best Cookbooks of All Time" by Southern Living Magazine For succulent results every time, nothing is more crucial than understanding the science behind the interaction of food, fire, heat, and smoke. This is the definitive guide to the concepts, methods, equipment, and accessories of barbecue and grilling. The founder and editor of the world's most popular BBQ and grilling website, AmazingRibs.com, " Meathead " Goldwyn applies the latest research to backyard cooking and 118 thoroughly tested recipes. He explains why dry brining is better than wet brining; how marinades really work; why rubs shouldn't have salt in them; how heat and temperature differ; the

importance of digital thermometers; why searing doesn't seal in juices; how salt penetrates but spices don't; when charcoal beats gas and when gas beats charcoal; how to calibrate and tune a grill or smoker; how to keep fish from sticking; cooking with logs; the strengths and weaknesses of the new pellet cookers; tricks for rotisserie cooking; why cooking whole animals is a bad idea, which grill grates are best; and why beer-can chicken is a waste of good beer and nowhere close to the best way to cook a bird. He shatters the myths that stand in the way of perfection. Busted misconceptions include:

- Myth: Bring meat to room temperature before cooking. Busted! Cold meat attracts smoke better.
- Myth: Soak wood before using it. Busted! Soaking produces smoke that doesn't

taste as good as dry fast-burning wood.

- Myth: Bone-in steaks taste better. Busted! The calcium walls of bone have no taste and they just slow cooking.
- Myth: You should sear first, then cook. Busted! Actually, that overcooks the meat. Cooking at a low temperature first and searing at the end produces evenly cooked meat.
