A WebLogic Server running the
Administration Service is called an

Administration Server. The Administration
Service provides the central point of control for
configuring and monitoring the entire domain.
The Administration Server must be running in
order to perform any management operation on
that domain.

Chapter 1

Master the Configuration and Administration
of Oracle WebLogic Server 11g Oversee a
robust, highly available environment for your
mission-critical applications using the expert
information in this Oracle Press guide. Oracle
WebLogic Server 11g Administration
Handbook explains the latest management
techniques for the de facto application server
for Oracle Fusion Middleware 11g> and
provides detailed examples and best practices.
