Overview of WebLogic Server Management -
Oracle

A WebLogic Server not started as a Managed
Server is an Administration Server. In a typical
configuration for a production system, the
applications and components with your business
logic would be deployed across Managed Servers

and the role of the Administration Server would be
that of configuring and monitoring the Managed
Servers.

Oracle WebLogic Server 12c (12.2.1) Tutorials
Node Manager is a WebLogic Server utility that
enables you to start, shut down, and restart the
administration server and managed servers from a
remote location. Although Node Manager is not
required, it is recommended if your WebLogic
Server environment hosts applications with high
availability requirements.
