WebSphere 61 Community Edition

An open source community edition makes sense, but only if it is the same source base. Otherwise, it becomes a lead into the proprietary stuff. Its hard to make an apples to apples comparison with others such as JBoss or GlassFish. Another interesting note: the Websphere 7 open beta download is 870MB in a tar, vs the 54MB GlassFish download.

WebSphere Application Server Family (Editions Comparison)

WebSphere Application Server (WAS) is a software product that performs the role of a web application server. More specifically, it is a software framework and middleware that hosts Java-based web applications. It is the flagship product within IBM's WebSphere software suite. It was initially created by Donald F. Ferguson, who later became CTO of Software for Dell.
