However, the WebSphere Application Server documentation is also provided as an information center in a format for offline use in local Eclipse environments, for your convenience. You can obtain the downloadable information center .zip file for the desired version and edition of the product information center and

setup your local system to display the information centers in a local Eclipse instance.

4 Installing and Configuring WebSphere 7.0 - Oracle

WebSphere Application Server (WAS) is a software product that performs the role of a web application server. More specifically, it is a software framework and middleware that hosts Java-based web applications. It is the flagship product within IBM's WebSphere software suite. It was initially created by Donald F. Ferguson, who later became CTO of Software for Dell.
