A fresh edition of the sustainable
design pioneer Victor Papanek ' s
classic and ever-relevant book
examining the important role of

design in combating climate change. Whether it ' s horror at the plastic littering the world ' s beaches or despair at the melting polar ice caps, the world is gradually waking up to the impending climate disaster. In *The Green Imperative*, Papanek argues for design that addresses these issues head-on. This means using materials that can be recycled and reused, no more pointless packaging, thinking about how products make us feel and engage all our senses, putting nature at the heart of design, working at a smaller scale, rejecting aesthetics for their own sake, and thinking before we buy. First published at the end of the twentieth century, this book

offered a plethora of honest advice, clear examples, and withering critiques, laying out the flaws of and opportunities for the design world at that time. A quarter of a century on, Papanek ' s lucid prose has lost none of its verve, and the problems he highlights have only become more urgent, giving today ' s reader both a fascinating historical perspective on the issues at hand and a blueprint for how they might be solved.

In a small town, uplifting romance tugs at the heartstrings Jordan Harrison no longer trusts relationships, so when her widowed mother is swept away by a handsome, wealthy architect, Jordan fears the hasty engagement will end in disaster. After all, how well can her mother know the guy after only a few months? Intent on saving her mother from certain heartbreak, Jordan races to Breckenridge Manor to delay the wedding, but runs into more than she's bargained for—a handsome, understanding man intent on helping her heal

past wounds and open her mind to new possibilities. Known as the man with nerves of steel, Tanner Breckenridge lives up to his reputation, but it doesn't take long for him to discover he has a soft spot for Jordan Harrison, the daughter of his father's future bride. Loyal to his father, but captivated by Jordan, Tanner puts his heart on the line and risks everything for a chance at love.

Archaeologists and anthropologists have long studied artifacts of refuse from the distant past as a portal into ancient civilizations, but examining what we throw away today tells a story in real time and becomes an important and useful

tool for academic study. Trash is studied by behavioral scientists who use data compiled from the exploration of dumpsters to better understand our modern society and culture. Why does the average American household send 470 pounds of uneaten food to the garbage can on an annual basis? How do different societies around the world cope with their garbage in these troubled environmental times? How does our trash give insight into our

attitudes about gender, class, religion, and art? The Encyclopedia of Consumption and Waste explores the topic across multiple disciplines within the social sciences and ranges further to include business, consumerism, environmentalism, and marketing to comprise an outstanding reference for academic and public libraries. *Georgialina* Time Life Custom Pub

Air Force Manual Demos Medical Publishing Veteran journalist and southern storyteller Tom Poland has been writing about the disappearing rural South for nearly four decades. With a companionable appreciation for nostalgia, preservation, humor, and wonder,

Georgialina: A Southland as We Knew It brings to life once more the fading and often-forgotten unfiltered character of the South as Poland takes readers down back roads to old homeplaces, covered bridges, and country stores. He recalls hunting for snipes and for lost Confederate gold; the joys of beach music, the shag, and cruising Ocean Drive; and the fading	traditions of sweeping yards with homemade brooms, funeral processions, calling catfish, and other customs of southern heritage and history. Peppered with candid memoir, Georgialina also introduces readers to a host of quirky and memorable characters who have populated the southland of Poland's meanderings. As commercialization, homogenization, and relocation have	slowly altered distinctive regions of the country, making all places increasingly similar, southern traditions have proven to be more resilient than most. But Poland notes that many elements that once defined day-to-day life in the South are now completely foreign to contemporary generations. Set primarily in Poland's native Georgia and
