The Day Lincoln Was Shot is a gripping, minute-by-minute account of April 14, 1865: the day President Abraham Lincoln was tragically assassinated. It chronicles the movements of Lincoln and his assassin John Wilkes Booth during every movement of that fateful day. Author and journalist Jim Bishop has fashioned an unforgettable tale of tragedy, more gripping than fiction, more alive than any newspaper account. First published in 1955, The Day Lincoln Was Shot was a huge bestseller, and in 1998 it was made into a TNT movie, with Rob Morrow as Booth.

I Remember Me weaves an American tapestry of colorful tales, beginning with the timid musings of a young boy on the verge of becoming a man in the Jewish section of New York's Bronx neighborhood, and bringing us up to date with the mature insight of a man whose remarkable trajectory has sent him to the top of Hollywood's elite and sparked the careers of dozens of household-name entertainers. Along the way, Reiner treats his loyal readers to everything from the ordinary to the truly unforgettable: a family trip to a nude beach, French lessons with Mel Brooks, a chapter dedicated to Rinnie the dog who unfortunately mistakes a skunk for a cat, a surprise early-morning visit from the McCarthy era FBI, a heart wrenching story of loss describing the day of his wife's passing, and then in a revealing chapter of Reiner's character, he describes "the most theatrically triumphant day" of his young career. Through his memoir, we meet the man behind the success in roles rarely seen before: son to Romanian immigrant Irving Reiner, husband to fellow Bronx native and renowned singer Estelle Reiner, father to the prolific filmmaker Rob Reiner, Dr. Annie Reiner psychoanalyst & gifted singer, and Lucas Reiner, a globally recognized fine artist. Written with the same combination of playful jest and modest humility that has garnered the love and respect of fans for generations, I Remember Me remembers the creative and inspiring journey of one of the most revered comedic icons of the past hundred years. "Carl Reiner is at that wonderful point in life where he knows absolutely everything. Especially, how to tell a wonderful story. I just love being in his world and this book is the Grand Tour." Jerry Seinfeld "Great stories from the great Carl Reiner. I liked Chapter 29 the best." Albert Brooks "At a time when so much of comedy can be cruel and mean spirited... Carl Reiner is a perfect example of comedy and kindness mixed with just the right amount of biting wit to make for a really satisfying read." Jay Leno "Crime and Punishment has always been my favorite book... Until Now!" Mel Brooks

In this collection of taxidermy art, you'll find a winged monkey with a fez and a martini glass, a jewel-encrusted piglet, a bionic fawn, and a polar bear balancing on a floating refrigerator. Author Robert Marbury makes for a friendly (and often funny) guide, addressing the three big questions people have about taxidermy art: What is it all about? Can I see some examples? and How can I make my own? He takes readers through a brief history of taxidermy (and what sets artistic taxidermy apart) and presents stunning pieces from the most influential artists in the field. Rounding out the book are illustrated how-to lessons to get readers started on their own work, with sources for taxidermy materials and resources for the budding taxidermist.

More than once, Carl Reiner has had friends say, "Hey, Reiner, you ought to write those things down." And at eighty, he finally has. In this funny and engaging memoir, one of the best raconteurs on the planet recalls his life in show business in short comic tales. Reiner tells of how, after answering an ad for free acting classes on his brother Charlie's advice, he forsakes a budding career as a machinist for an acting career. In "Sidney Bechet and His Jazz Band Meet Franz Kafka," he captivates the legendary jazz man and his band with an unusual reading of The Metamorphosis, during a thunderstorm at a Catskills resort in 1942. Reiner also recalls the highlights of the succeeding decades: his first sweaty audition, impersonating a dog impersonating movie stars; his forays into the theater; his work on Your Show of Shows and The Dick Van Dyke Show during TV's golden days; and his long friendship and collaboration with Mel Brooks which

gave birth to the Two Thousand Year Old Man. In "A Recipe to Remember," he recites a recipe for cream cheese cookies to a star-studded audience that includes Paul Newman, Leonard Bernstein, and Barbra Streisand. In "The Gourmet Eating Club," he gives an insider's take on the now-legendary group that included Mario Puzo, Joseph Heller, Zero Mostel, and other luminaries. Mary Tyler Moore, Sid Caesar, Mickey Rooney, Johnny Carson, Cary Grant, Dinah Shore, Ann Bancroft, Jean Renoir – the list goes on and on – also appear in what Reiner calls the "literary variety show" that captures the highs and lows of his extraordinary life. Through it all, Reiner displays the wit and warmth that have made him one of the most beloved figures in the entertainment business. This charming memoir will delight anyone who wants a behind-the-scenes look at five decades of Hollywood and television history.

This new book from the author of USB Complete shows how small systems can take advantage of the same wealth of USB devices available to conventional PCs. The book begins with a review of USB host communication protocols. Readers then learn which USB host requirements are relaxed for embedded systems and what new requirements some embedded systems must meet. To help in selecting a development platform, the book explores available hardware and software for USB host communications in small systems. The heart of the book focuses on communicating with USB devices. The topics (with example code) include USB drives, keyboards, virtual serial ports, network bridges, mics, speakers, video cameras, and printers, plus devices that don't fit defined USB classes. Also discussed are systems that support both USB host and device functions. The example code is written for the BeagleBoard-xM open development board using a distribution of Linux targeted to small systems. Also covered is how to use Linux commands and utilities to learn about, monitor, and debug communications with USB devices.

Can drinking coffee help people live longer? What makes a stock's price go up? Why did you get the flu? Causal questions like these arise on a regular basis, but most people likely have not thought deeply about how to answer them. This book helps you think about causality in a structured way: What is a cause, what are causes good for, and what is compelling evidence of causality? Author Samantha Kleinberg shows you how to develop a set of tools for thinking more critically about causes. You'll learn how to question claims, identify causes, make decisions based on causal information, and verify causes through further tests. Whether it's figuring out what data you need, or understanding that the way you collect and prepare data affects the conclusions you can draw from it, Why will help you sharpen your causal inference skills.

"Unforgettable . . . Behind her brilliantly witty and uplifting message is a remarkable vulnerability and candor that reminds us that we are not alone in our struggles—and that we can, against all odds, get through them." —Lori Gottlieb, New York Times best-selling author of Maybe You Should Talk to Someone Part memoir and part joyful romp through the fields of imagination, the story behind a beloved pseudonymous Twitter account reveals how a writer deep in grief rebuilt a life worth living. Becoming Duchess Goldblatt is two stories: that of the reclusive real-life writer who created a fictional character out of loneliness and thin air, and that of the magical Duchess Goldblatt herself, a bright light in the darkness of social media. Fans around the world are drawn to Her Grace's voice, her wit, her life-affirming love for all humanity, and the fun and friendship of the community that's sprung up around her. @DuchessGoldblat (81 year-old literary icon, author of An Axe to Grind) brought people together in her name: in bookstores, concerts, and coffee shops, and along the way, brought real friends home—foremost among them, Lyle Lovett. "The only way to be reliably sure that the hero gets the girl at the end of the story is to be both the hero and the girl yourself." —Duchess Goldblatt

The Sustainable Development Goals introduced by the United Nations in 2016 call for the significant mobilisation of finance. However, although sustainable investments are steadily increasing, there still remain large gaps within financing and the information that financial markets rely on is often incomplete or incorrect. For instance, the

financial system has been structured around short-term frameworks and goals while the most pressing environmental and social challenges are long-term. Prices do not convey the cost of externalities associated with social and environmental challenges. It is therefore important to implement the effective pricing of externalities and create a common language and taxonomy between investors, issuers and policy-makers in order to best serve sustainable development. Addressing this challenge, the authors delve deeper into the levers that can be pulled within the financial system to prompt an efficient ecosystem of sustainability-related information, allowing social and environmental externalities to be incorporated into the decision-making process of all market agents. Incentives needed for investors, issuers and intermediaries are proposed along with regulation that can trigger these incentives. This book offers a comprehensive collection of chapters which explore the ongoing evolution of the European regulatory framework, providing essential reading for policymakers, practitioners and researchers alike.
