This landmark text discusses current issues and trends to help employee assistance and human resource professionals do their jobs better and help people live happier, more productive lives by providing them with the resources to deal with personal problems. The current spiraling and escalating rate of change within the business and working world, fueled by other events and phenomena since September 11, 2001, were the impetus and driving force behind the initiative and development of this new

fourth edition. This book contains 43 chapters; a total of 21 are from the first two editions, eleven were written specifically for the third edition, and eleven new chapters were exclusively written for this new fourth edition. While savoring the still pertinent, meaningful and relevant-to-today materials from the previous editions, there are nine new updates, written by an all-star team of experts in their respective areas. The topics include history and philosophy, structure and organization, client services and characteristics, program planning and evaluation, professional and paraprofessional training and development, special issues, selected examples and future directions. An excellent textbook for college and university courses and preparation source, this book is a must for professionals wanting to be up-to-date on employee assistance programming, for students in graduate courses and seminars, for college and university courses, and in-service training and continuing education programs.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are

intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Fact: Wellness programs benefit the bottom line. Motorola, for example, found that each dollar invested in wellness benefits returned \$3.93 in health and disability cost savings. Next-Generation Wellness at Work tells how to get in on the action. A nuts-and-bolts, how-to guide for managers, it delivers the latest thinking on how to take full advantage of the benefits that wellness programs can offer both employees and companies. And the effort couldn't be more important. With the soaring cost of medical care and the increase in obesity and lifestyle-related illnesses, there is growing recognition that companies must build a culture of health and enable employees to become better guardians of their own well being. This book illustrates, in detail, exactly how to accomplish those goals. Good health saves in ways that go beyond smaller insurance premiums. It also has a direct relationship with employee productivity, making wellness a matter of high-level strategy. However, many workplace wellness programs are not as effective as they could be. They are not comprehensive, not long-term, and not marketed to the

people who could benefit most. Wellness expert Stephenie Overman helps managers take practical steps to overcome these deficiencies and build successful workplace wellness programs that result in tangible, bottom-line benefits for organizations. And the book starts from the ground up, first by explaining how to take a company's temperature, get management buy-in, and design a program that fits a company's unique needs and situation. Building a program is one thing, but will they come? That's where Overman's expertise is essential: She shows how to motivate workers to take advantage of the program and reap its many benefits. And she explains how to partner with local health providers and integrate methods to promote psychological well being, two key ingredients for success. Not many corporate programs benefit both employees and the company equally, but a well-planned wellness initiative will boost the health and productivity of employees, leading to a happier-and more competitive-workplace.

Painting a Target on HPV is an evidence-

based, detailed exploration of everything that is known about the human papillomavirus--the virus that causes cervical cancer. With an emphasis on non-surgical treatment, Dr. Nicholas LeRoy imparts twenty years of experience in treating and researching HPV and cervical dysplasia. In contrast to what your doctor has likely told you, a "wait-and-see" strategy for a HPV infection and for mild dysplasia may not be in your best interest and often results in unnecessary surgery and years of recurrent dysplasia, grief and fear that you will get cervical cancer. Don't make poor treatment decisions at the start that you may regret for years to come. Arm yourself with the facts! After reading *Painting a Target on HPV* you will understand how HPV transforms a normal cell into an abnormal one; HPV cofactors, the "partners-in-crime" that assist in the formation of cancer; that you are not cursed! There are always reasons why some women have persistent HPV infections and recurrent dysplasia and others do not; the research that supports nutritional supplementation and dietary changes to help eliminate dysplasia and HPV; and how escharotic

therapy can cure even the most difficult cases of severe dysplasia (CIN3) without surgery!
