Social-Ecological Resilience and Sustainability Random House Trade Paperbacks

[This book] examines the Western tradition - those unique patterns of

thought and systems of values that constitute the Western heritage. While focusing on key ideas and broad themes, the text also provides a balanced treatment of economic, political, and social history for students in Western civilization courses. The text is written with the conviction that history is not a meaningless tale. Without a knowledge of history, men and women cannot fully know themselves, for all human beings have been shaped by institutions and values inherited from the past. -Pref. Western Civilization W. W. Norton Considered by many the greatest war novel of all time, All Quiet on the Western Front is Erich Maria Remarque ' s masterpiece of the German experience during World War I. I am young, I am twenty years old; yet I know nothing of life but despair, death, fear, and fatuous superficiality cast over an abyss of sorrow. . . . This is the testament of Paul Bäumer, who enlists with his classmates in the German army during World War I. They become soldiers with youthful enthusiasm. But the world of duty, culture, and progress they had been taught breaks in pieces under the first bombardment in the trenches. Through years of vivid horror, Paul holds fast to a single vow: to fight against the principle of hate that meaninglessly pits young men of the same generation but different uniforms against one another . . . if only he can come out of the war alive. " The world has a great writer in Erich Maria Remarque. He is a craftsman of unquestionably first rank, a man who can bend language to his will. Whether he writes of men or of inanimate nature, his touch is sensitive, firm, and sure. " —The New York Times Book Review

CLEP Western Civilization II with Online Practice Exams National Academies Press
 More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to

dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our divided world.

History of Western Civilization Houghton Mifflin College Division Originally published in 1948, at the height of post-World War II optimism and confidence in collective security, Ideas Have Consequences uses "words hard as cannonballs" to present an unsparing diagnosis of the ills of the modern age. Widely read and debated at the time of its first publication, the book is now seen as one of the foundational texts of the modern conservative movement. In its pages, Richard M. Weaver argues that the decline of Western civilization resulted from the rising acceptance of relativism over absolute reality. In

spite of increased knowledge, this retreat from the realist intellectual tradition has weakened the Western capacity to reason, with catastrophic consequences for social order and individual rights. But Weaver also offers a realistic remedy. These difficulties are the product not of necessity, but of intelligent choice. And, today, as decades ago, the remedy lies in the renewed acceptance of absolute reality and the recognition that ideas—like actions—have consequences. This expanded edition of the classic work contains a foreword by New Criterion editor Roger Kimball that offers insight into the rich intellectual and historical contexts of Weaver and his work and an afterword by Ted J. Smith III that relates the remarkable story of the book's writing and publication. The Shaping of Western Civilization Vintage

In 1412, Europe was a miserable backwater ravaged by plague, bad sanitation and incessant war, while the Orient was home to dazzling civilizations. Yet, somehow, the West came to dominate the Rest for most of the next half millennium. In this vital, brilliant book, Niall Ferguson reveals the six 'killer applications' that the Rest lacked—competition, science, property rights, medicine, consumerism and the work ethic. And he asks—do we still have these winning tools? Or is this the end of Western ascendancy? Winner of the Estoril Global Issues Distinguished Book Prize 2013

Lexington Books

Used by more than a million students since its original publication, *Western Civilizations* became the leading text for the course by combining historical scholarship with classroom innovation. Master scholars/teachers Joshua Cole and Carol Symes enhance coverage of the West in a global context with a new focus on migration and nationalism. Dynamic digital resources, including award-winning InQuizitive activities and new History Skills Tutorials for every chapter, guide students from basic understanding basics to analysis and interpretation.

The Best Review for the CLEP General Exams Rowman & Littlefield Publishers A longtime professor of Ethnic Studies at the University of California at Berkeley, Ronald Takaki was recognized as one of the foremost scholars of American ethnic

history and diversity. When the first edition of *A Different Mirror* was published in 1993, Publishers Weekly called it "a brilliant revisionist history of America that is likely to become a classic of multicultural studies" and named it one of the ten best books of the year. Now Rebecca Steffoff, who adapted Howard Zinn's best-selling *A People's History of the United States* for younger readers, turns the updated 2008 edition of Takaki's multicultural masterwork into *A Different Mirror for Young People*. Drawing on Takaki's vast array of primary sources, and staying true to his own words whenever possible, *A Different Mirror for Young People* brings ethnic history alive through the words of people, including teenagers, who recorded their experiences in letters, diaries, and poems. Like Zinn's *A People's History*, Takaki's *A Different Mirror* offers a rich and rewarding "people's view" perspective on the American story.

The West: A New History Columbia University Press

The Rise of the West, winner of the National Book Award for history in 1964, is famous for its ambitious scope and intellectual rigor. In it, McNeill challenges the Spengler-Toynbee view that a number of separate civilizations pursued essentially independent careers, and argues instead that human cultures interacted at every stage of their history. The author suggests that from the Neolithic beginnings of grain agriculture to the present major social changes in all parts of the world were triggered by new or newly important foreign stimuli, and he presents a persuasive narrative of world history to support this claim. In a retrospective essay titled "The Rise of the West after Twenty-five Years," McNeill shows how his book was shaped by the time and place in which it was written (1954-63). He discusses how historiography subsequently developed and suggests how his portrait of the world's past in *The Rise of the West* should be revised to reflect these changes.

"This is not only the most learned and the most intelligent, it is also the most stimulating and fascinating book that has ever set out to recount and explain the whole history of mankind. . . . To read it is a great experience. It leaves echoes to reverberate, and seeds to germinate in the mind."—H. R. Trevor-Roper, *New York Times Book Review*

A Concise Survey of Western Civilization W. W. Norton

Renowned historian William H. McNeil provides a brilliant narrative chronology of the development of Western civilization, representing its socio-political as well as cultural aspects. This sixth edition includes new material for the twentieth-century period and completely revised bibliographies. An invaluable tool for the study of Western civilization, the Handbook is an essential complement to readings in primary and secondary sources such as those in the nine-volume University of Chicago Readings in Western Civilization.
