Western Civilization: Beyond Boundaries, Volume I: to 1715 Wadsworth Publishing Company
The Anthropocene is a concept which challenges the foundations of humanities scholarship as it is traditionally understood. It

calls not only for closer engagement with the natural sciences but also for a synthetic approach bringing together insights from the various subdisciplines in the humanities and social sciences which have addressed themselves to ecological questions in the past. This book is an introduction to, and structured survey of, the attempts that have been made to take the measure of the Anthropocene, and explores some of the paradigmatic problems which

it raises. The difficulties of an introduction to the Anthropocene lie not only in the disciplinary breadth of the subject, but also in the rapid pace at which the surrounding debates have been, and still are, unfolding. This introduction proposes a conceptual map which, however provisionally, charts these ongoing discussions across a variety of scientific and humanistic disciplines. This book will be essential reading for students and researchers in the environmental humanities,

particularly in literary and cultural studies, history, philosophy, and environmental studies. Beyond Boundaries Pearson Higher Ed

New and revised features encourage

"The Humanities through the Arts, tenth edition, explores the humanities with an emphasis on the arts. Examining the relationship of the humanities to values, objects, and events important to people is central to this book. We make a distinction between artists and other

humanists: Artists reveal values, while other humanists examine or reflect on values. We study how values are revealed in the arts while keeping in mind a basic question: "What is art?" Judging by the existence of ancient artifacts, we see that artistic expression is one of the most fundamental human activities. It binds us together as a people by revealing the most important values of our culture"--
